Secy. to the Govt. of Bengal.

NOTIFICATION.

No. Marine.—In exercise of the powers conferred by section 5 of the Indian Explosives Act, 1884, and with the previous sanction of the Governor-General in Council, the Governor in Council of the Presidency of Fort William in Bengal is pleased to make the following revised rules to regulate the transport and importation of explosives, other than those mentioned in section 14 of the Act, in the Port of Calcutta, in supersession of the rules previously made.

These rules are supplementary to the revised rules relating to the transport and importation of explosives made by the Governor-General in Council and published under Government of India, Commerce and Industry Department, Notification No. 4013—33, dated the 6th June 1914.

Rules to regulate the transport and importation of explosives in the Port of Calcutta.

[The additions and alterations proposed to be made are shown in italics.]

N.B.—"Explosive," as defined in section 4, Act IV of 1884, and as used in these rules.—

(*a*) means gunpowder, nitro-glycerine, dynamite, gun-cotton, blasting powders, fulminate of mercury or of other metals, coloured fires, and every other substance, whether similar to those above mentioned or not, used or manufactured with a view to produce a practical effect by explosion or a pyrotechnic effect; and

(*b*) includes fog-signals, fireworks, fuzes, rockets, percussion caps, detonators, cartridges, ammunition of all descriptions and every adaptation or preparation of an explosive as above defined. It also includes any dangerous substance which may have been ordered by the Governor-General in Council, under section 17 of the Indian Explosives Act, 1884, to be deemed an explosive.

1. Except as is hereinafter provided for, no vessel shall have on board, within the limits of the port, any explosives, as defined in section 4, Act IV of 1884, except two storm or danger signals, six smaller lights of the same description, 24 blue lights, 24 rockets, *or 24 socket signals with friction tubes*, 24 detonating signals with friction tubes, or in lieu thereof 24 one-pound charges of gunpowder for use in a gun *together with a small box of friction tubes and a flask of priming powder*, 24 private signals of any Company, and 12 red lights for each boat *and life raft* carried under the statutory rules for life-saving appliances (made by the Board of Trade under section 427 of the Merchant Shipping Act, 1894), and a reasonable quantity of safety cartridges for the equipment of the vessel or for the personal use of the officers on board the ship, provided that the quantities held by them are declared in the prescribed Customs Forms A and B respectively, or in the case of foreign vessel, in the Stores List of such vessel. Detonators and their friction tubes to be stored separately. All explosives which vessels are by this rule permitted to keep on board in port shall be stored in all cases in separate, detached and completely

enclosed magazines for each description of signals. The magazines should be kept in a house on deck and stowed or ranged as far apart as possible, so that in the event of fire they can be removed or thrown overboard.

2. All inward-bound vessels carrying explosives, in excess of the quantity prescribed by rule 1, are prohibited from proceeding above Budge-Budge, and the Master of any vessel lying within the port, which shall have on board any explosives in contravention of these rules, shall be liable to a fine which may extend to the sum mentioned in clause (*a*) or clause (*b*), as the case may be, of the proviso to section 5 of the Indian Explosives Act, 1884.

3. Explosives of classes 1, 6 and 7, as laid down in the rules issued under Government of India, Commerce and Industry Department, Notification *No. 4013—33, dated the 6th June 1914*, that is to say, gunpowder, ammunition and fireworks in excess of the quantity prescribed in rules 1 and 2, shall be landed and deposited in the magazine at Moyapore.

4. For the convenience of vessels having ship's gunpowder, *ammunition and fire works* on board, a properly constructed powder-boat will be always in attendance off the magazine for landing and shipping *these explosives*. No charge will be made for the use of the boat for landing ship's *explosives*, but the responsibility of the keeper in respect of the ship's *explosives* shall not commence until *they are* landed on the bank, and shall cease as soon as *they are* shipped on board the boat. Every precaution will be taken to insure the safety of the *explosives* while in the boat, but the landing and shipping shall be at the risk of the vessel.

5. Vessels bringing consignments of trade explosives shall be allowed the use of the magazine boat; but should passing vessels require the use of the boat to put out or take in ship's *explosives*, such vessels shall be accommodated before the boat can be used to discharge explosives brought as cargo. The landing of *trade explosives*, whether the station boats or private boats are employed, shall be at the risk and expense of the consignees of the explosives, and no liability shall be accepted for damage sustained while in course of landing or until the consignments are stored in the magazine.

6. Explosives specified in the first division, class 6 of the rules published under Government of India, Commerce and Industry Department, Notification *No. 4013—33, dated the 6th June 1914*, viz., safety cartridges, safety fuzes for blasting, railway fog-signals, and percussion caps brought as part of a general cargo and which have been placed on board the vessels while lying in dock at ports of shipment, may be brought into port and landed at the docks or jetties in accordance with the regulations prescribed in that behalf in the Port Commissioners' bye-laws.

The term "safety fuze" means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze will not communicate laterally with other like fuzes.

The expression "safety cartridges" means cartridges for small-arms of which the case can be extracted from the small-arm after firing, and which are so closed as to prevent any explosion in one cartridge being communicated to other cartridges. The term also includes rifle-calibre machine-gun cartridges if they are of the above description, whether they are for use with machine-guns having chambers identical with those of rifles or with machine-guns which have special chambers.

The maximum diameter at which a small-arm or machine-gun cartridge can be accepted as "safety" is one inch.

7. In order to avoid unnecessary detention, Masters of vessels requiring the use of the powder-boat shall hoist a flag at the fore-topmast head on coming in sight of the magazine as a signal to the keeper to have the boat and coolies in attendance.

8. Masters of vessels shall mark the names of their respective vessels on the barrels and packages of ship's *explosives* previously to their being landed; if not marked, they shall not be received by the magazine boat.

9. Explosives shall not be landed within the port or at Moyapore or Diamond Harbour at any time when artificial lights are required to be used, and no explosives shall be landed, received into, or delivered from the magazine when artificial lights are required to be used.

10. The magazine-keeper shall give to the Master of any vessel landing explosives at the magazine a receipt for the number of packages, and the magazine-keeper shall be accountable to such Master for the re-delivery of such packages.

11. Before entering the limits of the port, the Master of every vessel having explosives on board shall make and sign a declaration in writing that to his knowledge and belief there is not on board any explosive exceeding the quantity prescribed in these rules.

12. A clerk shall be always in attendance in the powder-boat, and shall receive from the Master the declaration specified in the foregoing rule.

13. If any vessel shall be prevented, by stress of weather or by being in distress, from landing or depositing such explosives in excess of the quantity allowed as aforesaid, such vessel may be permitted to come up to the lower limits of the port, but shall not proceed above Matteabrooj Ghât, and the Master of such vessel shall forthwith give notice to the Harbour Master of his having such explosives on board, and shall obey the Harbour Master's directions relating to the same.

14. Masters of vessels, outward bound, who may require ship's *explosives* for their outward voyage, shall not take such *explosives* on board in any part of the river above Budge-Budge, with the exception of a quantity not exceeding that named and sanctioned in rule 1.

15. Masters of vessels, who have deposited ship's *explosives* at the magazine shall inform the Harbour Master of the date on which the vessel will pass the magazine outward bound, and on receipt of this information, orders shall be forwarded to the keeper to place the *explosives* in the boat, and send it off in such time as to avoid any detention of the outward-bound vessel. Before taking the *explosives* on board, the receipt granted by the magazine-keeper shall be given up.

16. Boats *as approved for this purpose by the Boat Surveyor to the Port Commissioners* shall be permitted to take on board at the Moyapore Magazine and bring as far as *Prinsep's* Ghât, under cover of passes to be granted by the Commissioner of Police and the Port Commissioners, 500 lbs. of trade gunpowder, the property of dealers and consignees. *For each boat the dealers shall supply an armed guard (pensioned sepoy) whom the Commissioner of Police, Calcutta, will select.*

17. Delivery of trade powder into boats at the Moyapore Magazine for conveyance to Calcutta shall only be granted upon orders issued by the Port Commissioners.

18. No boat containing powder, under the provisions of rules 16 and 17, shall be allowed to proceed above *Prinsep's* Ghât. All such powder shall be landed at *Prinsep's* Ghât, and no powder shall be landed at any other ghât, except with the special permission of the Port Commissioners.

19. No smoking, and no fire or light of any description, except the red lamps between sunset and sunrise, shall be permitted on board of any boat having explosives on board.

20. Masters of vessels having on board explosives belonging to the following classes, as laid down in the rules prescribed in the Notification of the Government of India, Commerce and Industry Department, No. 4013—33, dated the 6th June 1914, shall make their own arrangements for the discharge of the explosives :—

Compressed gunpowder for blasting purposes	...	...	...	*Class*	*1.*
Nitrate Mixture	...	...	...	,,	*2.*
Nitro Compound	...	...	...	,,	*3.*
Detonators	...	...	...	,,	*6.*

Explosives of the classes 2 and 3 shall not be landed at the Moyapore Magazine. They shall only be allowed to enter and pass through the port under the supervision of the police and subject to such restrictions as may, from time to time, be ordered by the Commissioner of Police and the Port Commissioners, in addition to the restrictions laid down in the rules promulgated by the Government of India, Commerce and Industry Department, Notification No. 4013—33, dated the 6th June 1914. But they may be landed at Diamond Harbour and conveyed thence by rail to Durgapur: provided they are taken direct from the vessel to wagons; or if

there be no wagons ready to receive them, arrangements are made for their safe custody after leaving the vessel.

As regards compressed gunpowder for blasting purposes, nitro-compounds and detonators intended for despatch upcountry, they may, as an alternative, be discharged at Moyapore and transported under police guard from Moyapore to the Bengal-Nagpur Railway siding at Bowreah and there loaded into Bengal-Nagpur Railway wagons for despatch to destination, provided the transport is covered by a pass to be granted by the District Magistrate of the 24-Parganas and the loading is done during daylight and no storage is allowed on shore, or, for more than 36 hours, in boats.

21. Boats containing explosives of the classes specified in the two foregoing rules may anchor at Diamond Harbour if it is intended to land the explosives at that place, but shall, in no case, anchor within port limits, or be made fast at any part of the river-bank or alongside any vessel, stage, jetty, or pier within the limits of the port. Such boats, if allowed to enter port, shall proceed direct through the port to the place licensed by the Local Government for the landing and storage of the explosives.

The 19th July 1917.

No. 66Marine.—Mr. C. F. Keys, Branch Pilot, who was on furlough, has been granted by His Majesty's Secretary of State for India, Extraordinary leave without allowances (on medical certificate) for three months.

No. 67Marine.—The 24th July 1917.—The following draft of amendments which, with the previous sanction of the Governor-General in Council, the Governor in Council, in exercise of the power conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), intends to make in the rules for regulating the importation, possession and transport of petroleum, published under Bengal Government Notification No. 143Marine, dated the 30th November 1914, is published for the information of persons likely to be affected thereby.

II. The draft amendments will be taken into consideration on or after the 25th August 1917, and any suggestion or criticism with regard thereto received by the undersigned before that date, will be duly considered.

F. A. A. COWLEY,
Secy. to the Govt. of Bengal.

Draft amendments.

1. *For* rules 14 and 15, Chapter II, Part II, the following shall be *substituted*, namely :—

"14. Petroleum which has been imported into any port specified in rule 1 of Part III and which has not been tested at the port of import in accordance with the rules contained in that Part, shall not be transported to any other port save one at which importation is permitted under rule 1 of Part III, and the provisions of all the rules of that Part, except rule 22, shall be deemed to apply to such petroleum when it arrives at such other port.

Transport by sea of petroleum which has not been tested.

15. Petroleum which has been tested at the port of import may be transported to any other port, and the provisions of rules 2, 3, 4, 14 (except the proviso), 16, 19 and 20 of Part III shall apply to such petroleum when it arrives at such other port."

Transport by sea of petroleum which has been tested.

2. *For* rules 20 and 21 of Part III, the following shall be *substituted*, namely :—

"20. When petroleum imported otherwise than in bulk is landed at a port, it shall be landed either at jetties provided for the purpose, or in cargo-boats, and except where electric light is exclusively used, only after sunrise and before sunset, and only at such place or places as the Con-

Landing of petroleum otherwise than in bulk

servator of the port shall direct, subject to any Customs Notification that may, for the time being, be in force:

Provided that the precautions laid down in rule 21A of this Part shall be observed.

Transhipment of petroleum

21. Petroleum may be transhipped from one ship to another for conveyance to any other port, whether within or beyond the limits of British India, provided that the petroleum shall not be transhipped between sunset and sunrise, except when electric light is exclusively used, and provided further that the precautions laid down in rule 21A of this Part shall be observed.

Precautions to be observed in loading or unloading petroleum.

21A. The following precautions shall be taken by all vessels and cargo-boats loading or unloading petroleum, whether for transhipment or otherwise:—

(1) Vessels discharging or loading petroleum shall have fire-hoses connected and all fire extinguishing appliances in readiness for immediate use, and, if the petroleum is dangerous petroleum, shall have their awnings furled.

(2) No fire or light of any description (other than lights required by the port or harbour rules) or any detonating article or substance whatsoever, or matches, shall be, or shall be taken, on board any cargo-boat used for the transport of dangerous petroleum, or, within the limits of any port, for the transhipment of non-dangerous petroleum to or from any vessel.

(3) No cargo-boat used for the carrying of dangerous petroleum shall be fitted with a caboose for cooking purposes when engaged in such work.

(4) Dangerous and non-dangerous petroleum shall not be conveyed to the shore or to another ship at the same time on the same cargo-boat.

(5) Leaky tins containing dangerous petroleum shall not be discharged into a cargo-boat containing sound tins.

(6) The bilges of every cargo-boat which has carried a cargo of petroleum shall, immediately after the cargo-boat has been unloaded, be thoroughly cleared of all traces of such petroleum and dried and the holds shall be thoroughly ventilated."

BOARD OF REVENUE, BENGAL.

NOTICE.

WHEREAS the Court of Wards, Bengal, has, under section 6 (*c*) of Act IX (B.C.) of 1879, as amended by Act V (B.C.) of 1915, declared on his own application that Mr. G. Hennessy, a proprietor of Mathurapur estate, in the district of Malda, is a disqualified proprietor and that it is expedient in the public interest that his estate should be managed by the Court of Wards; and, whereas, under sections 7 and 35 of the said Act, the said Court has assumed charge of the property of the said Mr. G. Hennessy, notice is hereby given, under section 10A of the said Act, that all creditors having claims against the said Mr. G. Hennessy or his immovable property are hereby required to submit the same in writing to the Court of Wards at the office of the Board of Revenue in Calcutta within six months from the date of publication of this notice. Creditors are also hereby warned that claims not submitted as required by this notice are liable to be deemed to have been duly discharged.

The Commissioners for the Port of Calcutta.

ENHANCED WAR SURTAX ON GOODS AND SHIPPING.

NOTIFICATION.

WHEREAS, owing to the further heavy loss of traffic due to the war, it appears to the Commissioners and to the Local Government that the ordinary revenue of the Trust, together with that derived from the war surtaxes, levied under Notification, dated 27th January 1915, published in the *Calcutta Gazette* of that date, will be insufficient to meet the working expenses and the Interest and Sinking Fund charges on loans raised, and that it is therefore necessary to resort temporarily to further special measures of taxation for the purposes of the Port.

It is hereby notified, for general information, under the provisions of section 109 of the Calcutta Port Act (B.C.) III of 1890, and with the approval of the Governor in Council, that the following charges framed by the Commissioners, under section 108 of the Act, will be levied, in addition to the ordinary river-dues, and in supersession (subject to the provisions of the note printed below) of the special war surtax authorised under the Notification, dated 27th January 1915, above referred to, upon goods landed from or shipped into any sea-going vessel lying or being within the limits of the Port, whether such goods shall or shall not be landed or shipped at any dock, wharf, quay, stage or jetty belonging to the Commissioners, with effect from the 1st August 1917 and until further notice, viz :—

On all goods excluding coal, manganese ore and pig iron ...	12	annas	per ton
On cargo coal	6	ditto.	
On bunker coal	3	ditto.	
On manganese ore	6	ditto.	
On pig iron	8	ditto.	

Note.—The surtaxes on coal and pig iron, both under the previous and this Notification, are to remain in force for a period not less than, but not exceeding, that for which the corresponding charges on other goods are in force.

In the case of goods, the landing and shipping charges on which are not levied by weight, the ton, for the purposes of the surtax, shall be as defined in the Inland Vessels Wharves Schedule, e.g., piece-goods, 4 bales or cases to the ton; Cement 6 barrels to the ton, etc.

With effect from the 1st August 1917, the miscellaneous charges payable by Shipping, exclusive of Pilotage, Port Dues and Hospital Dues, that is to say, on Jetty Hire, Mooring Hire and Dock Dues, Fees and Charges for work done by Harbour Masters, Cranage, Night Work and Overtime, Hire of Vessels and Appliances, Dry Dock Charges, Stevedoring (Petroleum Wharf only), and such charges on goods as are debitable to Vessels' account, shall, until further notice, be double those which were in force prior to the 1st February 1915.

By order of the Commissioners,

J. MCGLASHAN, Offg. Secretary.

The 24th July 1917. (1930—1)

Notification.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES viz.

CALCUTTA, MADRAS BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Simla, the 11th July, 1917.

An Ordinance to provide for the acquisition of silver imported into British India.

Whereas an emergency has arisen which makes it necessary to provide for the acquisition by the Governor General in Council of silver imported into British India after the commencement of this Ordinance.

Now, therefore, in exercise of the power conferred by section 72 of the Government of India Act, 1915, the Governor General is pleased to make and promulgate the following Ordinance :—

5 and 6 Geo. V., C. 61.

ORDINANCE No. IV OF 1917.

1. (*1*) This Ordinance may be called the Silver (Import) Ordinance, 1917.

Short title and extent.

(*2*) It extends to the whole of British India including British Baluchistan and the Sonthal Parganas.

2. In this Ordinance unless there is anything repugnant in the subject or context,—

Definitions.

"Coin" means metal used for the time being as money, and stamped and issued by the authority of some State or Sovereign power in order to be so used;

"Import" means the bringing, by sea or land, into British India.

"Silver" means silver coin or silver bullion other than silver coin which has been issued by the Government of India and which is legal tender within the meaning of the Indian Coinage Act, 1906.

III of 1906.

3. (*1*) Subject to the provisions of this Ordinance, the Governor General in Council or any person appointed by him in this behalf may, by order in writing, within ten days from the date of import, take possession of any silver imported into British India after the commencement of this Ordinance, and such silver shall thereupon vest absolutely in His Majesty.

Power to take possession of the imported silver.

(*2*) Where any silver is taken possession of in exercise of the powers conferred by sub-section (*1*), the Governor General in Council shall pay or shall provide for payment either in London or at such other place as may be agreed upon, to the owner of such silver or his duly authorised agent, upon the production, either at the place of import or at the place of payment, of the necessary documents, a sum calculated according to the weight of such silver at a rate five per centum below the rate of the London Silver Market for silver of like fineness in London on the day on which the order under sub-section (*1*) was made.

(*3*) If any dispute arises at the place of import as to the fineness of any such silver, a certificate of assay by the Assay Master of any mint established under the Indian Coinage Act, 1906, shall be conclusive.

III of 1906.

Sabang Bay—Alteration in Storm Signals.

No. 183 (second publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 471 of 1917), are republished :—

Position.—Penimpuan signal station, lat. 5° 54′ N., long. 95° 19¼′ E.

In connection with the new system of storm signals recently brought into use at Indian ports, the former signals made at Sabang from Penimpuan signal station with regard to meteorological information for the Bay of Bengal, have been cancelled, and the following signals are now in force :—

1. No weather disturbances exist in the Bay of Bengal

2. (*a*) There is a region of squally weather in which a storm may be forming.

(*b*) A storm has formed - - - - - - - -

In order to indicate the position of the disturbances described under paragraph 2 above, the Bay of Bengal is divided into six sections defined as follows :—

I.—Contains the area north of lat. 18½° N.;
II.—Lies south of I.; it is bounded on the south by lat. 13° N. and to the east by long. 88½° E.;

III.—Lies south of I. and east of II.; it is bounded to the south by lat. 13° N. and to the east by a line from the point lat. 13° N., long. 93° E. to Diamond Island together with the Arakan coast, thence up to lat. 18½° N.;

IV.—Lies south of II. and west of long. 86° E.;

V.—Lies east of IV., south of II. and III., and west of long. 93° E.;

VI.—Lies east of III. and V. and including the sea around the Andaman islands.

The following shapes have been allotted to each of the divisions:—

DIVISION	*I*	*II*	*III*	*IV*	*V*	*VI*
SIGNAL						

The signals denoting position will be hoisted under the signal indicating the disturbance;

Thus if there is squally weather in section V. of the bay the signal

would be hoisted at the various ports; and if a storm has formed in section II. the signal would be hoisted. If the centre of the storm is near the boundary of a division, two locality signals will be given the first indicating the division in which the centre is supposed to be and the second the neighbouring division near to which it is. In the event of a storm centre being near to the angles where three divisions meet, three locality signals will be hoisted The first will give the division in which the storm is supposed to be. the second the nearest adjoining division and the third the remaining division.

The data for these signals will be received at Sabang from the wireless station at Port Blair. Two balls placed vertically will denote that the last weather signal was not received; a request can be made for the last received weather signal by means of flags, Morse signals or wireless. Reply will be made free of charge by means of long distance signals or Morse signals; if the reply is made by wireless the charge will be made through Lloyd's Agents at Sabang at the usual tariff.

New Newchwang Light-vessel placed in position; Characteristics of light and Fog-signal changed.

No. 188 (second publication).—The following Notice to Mariners (No. 636 of 1917), issued by the Coast Inspector, Shanghai, is republished :—

REFERRING to Special Notice to Mariners No. 480, notice is hereby given that on the 25th May 1917 the old *Newchwang* Light-vessel was removed from her station and the new Light-vessel placed in position.

The new Light-vessel is built of steel, is 92 feet in length and 26 feet in beam, and is painted *red*, with the name "NEWCHWANG" on her sides in *white* letters.

The light, which is exhibited from a lantern surmounting a steel tower, is Dioptric, Double Flashing, of the Fourth Order, showing two *white* flashes in quick succession every 10 seconds. The power of the flash is about 18,000 candles.

The light is elevated 35 feet above the sea and should be visible in clear weather at a distance of 11 nautical miles.

In foggy or thick weather an automatic acetylene fog gun will be operated, giving one report every 30 seconds.

If the Light-vessel be driven from her proper station, the usual light will not be shown, but a fixed *red* light will be exhibited at each end of the vessel during the night and a *red* flag hoisted during the day.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 23rd July 1917.

Summary.—During the week under report light to moderate rain fell generally throughout the province. More rain is wanted in a number of districts for transplantation of winter rice. Harvesting of autumn paddy and jute is proceeding in Eastern Bengal, while weeding continues in Western Bengal. The condition and prospects of jute, paddy and other standing crops are on the whole good. Reports of damage by insect-pests have been received from parts of Nadia, Murshidabad and Hooghly. Scarcity of fodder still prevails in parts of the 24-Parganas, Hooghly and Dacca. Cattle-disease was reported from eight districts. The average price of common rice for the province has fallen by about 0·3 per cent., as compared with that of the previous week.

	Sirajganj ...	0·21	8	8	
19	MALDA ...	1·15	9	9	Weather hot and cloudy with occasional showers. Transplantation of winter rice continues: more rain is wanted in places. Fodder, water and stocks of food-grains are sufficient. Cattle-disease is reported from Gomastapur thana.
20	COOCH BEHAR	1·60	9⅜	9 11/16	Weather cloudy. Transplantation of *haimanti* seedlings and harvesting of *bitri* paddy are in progress. Prospects of standing crops are good, except those of the jute crop in Mathabhanga. Fodder and water are sufficient.
21	DACCA ...	1·03	9	8	Weather hot and humid. Prospects of jute and paddy are satisfactory. Harvesting of *aus* paddy and jute and transplantation of winter paddy continue. Owing to the coming of *aus* paddy into the market, the price of rice is declining, but some paddy and rice are still being imported from neighbouring districts. Fodder is getting scarce. Condition of cattle in Manikganj is unsatisfactory owing to want of fodder and shelter. Water is sufficient.

No. 883T.R.—The 28th July 1917.—The following rules for the grant of leases for the reclamation of arable waste lands in the Western Duars, in the district of Jalpaiguri, are published for general information, with the approval of the Government of India, in supersession of the rules published under Bengal Government, Revenue Department, Resolution, dated the 9th May 1888, at pages 422-23, Part I, of the *Calcutta Gazette* of the 16th idem :—

Jalpaiguri.

RULES FOR THE GRANT OF LEASES FOR THE RECLAMATION OF ARABLE WASTE LANDS IN THE WESTERN DUARS IN JALPAIGURI DISTRICT.

Preliminary.

RULES for the grant of leases of arable waste lands in the Western Duars were published in the *Calcutta Gazette* of 23rd June 1875, and these were superseded by rules published in the *Calcutta Gazette* of 16th May 1888. The following rules supersede all previous rules which are hereby cancelled, but nothing contained in these rules shall affect the rights of lessees holding lands under the previous rules, and such portions of the rules of 1888 as define those rights have been reproduced in these rules.

Lands available for lease.

1. The lands that will be generally available under these rules lie within that tract of country in the Western Duars which extends in an easterly direction from the east bank of the river Tista to the west bank of the river Sankos.

Lands not available for lease.

2. The following lands will not ordinarily be available under these rules :—

(*a*) Lands which by a notification in the *Calcutta Gazette* are held to constitute a reserve for the supply of timber, fuel, grazing, or any other article of general and public consumption.

(*b*) Lands not included in the above category, but which now bear India-rubber trees or other valuable timber (such as sal, khair, chelownee, sisoo, etc.,) in considerable quantities in compact blocks or patches.

(*c*) Lands in respect of which any person or persons or any village community possesses rights of occupancy or such other rights or privileges as would, in the opinion of the Local Government, render it impolitic or inadvisable to grant such lands to any other person or persons.

(*d*) Lands lying within a distance of 60 feet on either side from the centre of any public road or thoroughfare, provided that such road or thoroughfare shall have been constructed, or shall be kept in repair from public funds.

(*e*) Lands which the Local Government may at any time, by a notification in the *Calcutta Gazette*, expressly exempt from the operations of these rules.

Application for lease.

3. Every person desirous of obtaining a grant of land under these rules shall, in person, present an application with a court-fee stamp of the value of eight annas to the tahsildar of the tahsil in which the land lies.

4. The application shall specify :—

(*a*) The name, father's name, and address of the applicant.

Particulars thereof.

(*b*) The area, situation, and boundaries of the land applied for, as far as they can be ascertained without a detailed survey.

(*c*) A statement of the particulars, if any, which may appear to the applicant to bring the land applied for, or any part of it, within the exceptions mentioned in rule 2. The application shall also state whether the land or any part of it is, or has ever been, cultivated in any manner,

(*d*) A declaration as regards the particulars of the lands (if any) already held by the applicant in the Western Duars.

5. Every lot applied for shall be compact and capable of being enclosed in a ring-fence; and if any part of the land touches on a public road or navigable river, the length of such road or river frontage shall not exceed one-half the breadth of the lot applied for.

Compactness and frontage of land.

6. No application for an area more than 25 acres or less than 10 acres shall be registered.

Limit of area.

7. On receipt of an application the tahsildar will verify the declaration made in accordance with rule 4 (*d*), and if he finds that the grant of the land applied for will result in the applicant holding more than 25 acres of land in the Western Duars he will reject the application summarily. In such cases the tahsildar may advise the applicant to submit a revised application for an area which will not make the total area held by him exceed 25 acres. The tahsildar will also ascertain whether the applicant is possessed of sufficient means to cultivate the area applied for; and if the applicant holds other land in the Western Duars he will consider its situation with reference to the land applied for and decide whether it admits of the applicant cultivating both pieces of land himself. If the tahsildar is of opinion that a smaller area than that applied for should be granted for any reason other than that the grant of the whole area would make the total quantity of land held by the applicant exceed 25 acres he will refer to the Deputy Commissioner for orders.

Preliminary enquiry.

8. When the tahsildar has decided that the application is in order and that there is no objection to granting it he shall require the applicant to pay in a sum of three annas an acre on the area applied for to cover the cost of survey. No further sum shall be required except the actual cost of the work prescribed in rule 10. If the land for which the survey fee is paid or a portion of it is not ultimately surveyed the applicant shall be entitled to a refund of the survey fee or of a proportionate amount thereof under the orders of the Deputy Commissioner.

Cost of survey and enquiry.

9. The tahsildar or such other officer as the Deputy Commissioner may authorise in this behalf shall then inspect the land and ascertain whether it is khas land and available under the above rules; and if it appear to be so the amin shall proceed to lay down the boundary and make a survey as follows.

Inspection of land.

10. The amin shall fix the boundary and shall then clear it from end to end and afterwards survey the boundary placing mounds of earth or stone not less than 3 feet high at each bend in the boundary and at every point where two lots or patches of waste or other properties meet. The survey will be made in red upon a reproduction of the cadastral map which covers the area of the proposed grant. The grant will be connected in at least two places with permanent marks shown on the cadastral map. The survey will first be made with magnetic compass and then transferred to the cadastral map, the two or more permanent cadastral marks being used as fitting points. Thus the scale used will always be 16 inches to 1 mile.

Method of survey.

11. The map records will consist of a field book, an initial map, and a corrected cadastral map. The corrected cadastral map will form the map in which the grant is given out. The field book and initial map will be kept in the Deputy Commissioner's case with a copy of the cadastral map as amended by the amin.

Uses of the map records.

12. The tahsildar shall then report the case to the Deputy Commissioner stating whether he is satisfied that the amin's work has been properly done and giving any further information which may be required and in particular he shall report on the quality of the land and the difficulties of bringing it under cultivation with a view to the decision of the question of progressive rent during the first four years. The report of the tahsildar shall be based on a personal inspection and he shall be responsible for its correctness.

Report of case to Deputy Commissioner.

13. The Deputy Commissioner shall consider the report and finally pass orders granting or refusing a lease. He shall ascertain whether the applicant is already in possession of or holds a lease for other land in the Western Duars and if so he shall not lease to him any area which will make the total area held by him exceed 25 acres. He shall not grant a lease unless he is satisfied that the applicant intends to reside permanently on the land with his family or within such distance of it as he approves. Priority of application shall not confer any right to settlement unless other considerations are equal.

Grant or refusal of lease.

14. No rent shall be charged for the year of entry, *i.e.*, from the actual date of entry to 31st March following. Thereafter and until the land next comes under resettlement the rates of rent per acre shall be fixed as follows :—

Rate of assessment.

		Rs.	A.

Provided that in any case in which the Deputy Commissioner is satisfied that the applicant will not be able to get a full crop from the land in the first complete year of settlement he may fix half of the above rates for one or more of the first four complete years. In the case of parganas South Mainaguri, North Mainaguri and Chengmari, the Deputy Commissioner shall decide the class of the taluk on a consideration of the class of the group of settled jotes most nearly adjoining the land under settlement.

15. The order on the case and on any objection decided on by the Deputy Commissioner shall be appealable to the Commissioner within one month.

Appeal to Commissioner.

16. On receipt of an order to grant a lease, the tahsildar shall deliver to the applicant a lease in form A in the Appendix to these rules, together with a copy of the map, and shall place him in possession by planting a bamboo, or in any other way locally acknowledged, and shall report delivery and registration of the tenant in a separate register of lease-holders in form B in the appendix to these rules.

Grant of lease.

17. If the holder of a lease in form A is at any time found by survey or otherwise to be in possession of land in excess of the area described in his lease the tahsildar shall report particulars to the Deputy Commissioner with a view to action under clause 16 of the lease for the assessment of rent on the excess area and for decision whether the lessee shall be ejected from the excess area or shall be permitted to continue in occupation and to have his lease altered in accordance with clause 16 of the lease. When reporting to the Deputy Commissioner in such cases the tahsildar shall state the total area of land held by the lessee in the Western Duars.

Encroachments.

Transfer of application not allowed.

18. There will be no transfer of applications. If the land applied for is not granted to the applicant the application will be rejected, and any other candidate for the land must submit a fresh application.

Instructions for maintaining the conditions of leases.

19. It shall be the duty of the tahsildar to ascertain from time to time and to report to the Deputy Commissioner whether the lessees with whom settlement is made under these rules are adhering to the conditions prescribed in clauses 6, 7, 10, 13, 14, 15, 16, 18 and 19 of the lease in form A, and whether the lessees under the rules of 1888 are adhering to the conditions prescribed in clauses 2, 4, 7, 11, 12, 13, 14 of their renewed leases in form D, and it shall be the duty of the Deputy Commissioner to arrange that all jotes are duly and regularly inspected for this purpose and that proper action is taken when breaches of the conditions are detected.

In particular the Deputy Commissioner shall arrange for a detailed inspection of the jote during the course of the 4th complete year of each settlement made under these rules, with a view to ascertaining whether the jote has been brought under cultivation in the manner prescribed in clause 20 of the lease in form A, and to ensure that this inspection is regularly carried out he shall maintain a record of the dates on which 4 years will have expired from the date of each lease, and of the dates and results of inspections

Terms and conditions of renewed leases.

20. The terms and conditions of renewed leases (form D in the appendix to these rules; of arable lands which were settled under the rules of 1888 on preliminary leases in form C are as follows:—

Rent to be paid on renewal of lease.

(*i*) Subject to any general or special orders of Government the rent to be paid on the renewal of the lease shall be fixed by the Board of Revenue on the report of the Deputy Commissioner and Commissioner on each occasion of renewal, but shall not exceed the rates of rent per acre paid in the neighbourhood at the time of renewal for the different classes of lands included in the lease. Provided that in no case shall the total rent payable under the renewed lease be less than eight annas an acre for the entire area leased.

The rates paid at present in the Western Duars of Jalpaiguri are as follows:—

Term of renewed lease.

(*ii*) The term of every renewed lease shall coincide with the unexpired period of the then current settlement in the pargana in which the lands are situated.

Title conveyed by renewed lease is heritable and transferable.

(*iii*) The title conveyed by the renewed lease shall be heritable and transferable; provided (*a*) that the whole, and not a part, of the grant be transferred; but if in any case, on an application being made to the Deputy Commissioner, he finds, after due enquiry, that the transfer of only

a portion of the grant would be beneficial to the lessee, the Deputy Commissioner may, with the sanction of the Commissioner, permit the transfer of such portion : and *(b)* that no succession or transfer shall be valid as against the Government, but shall, on the contrary, be equivalent to a surrender of the lease, unless notification of the succession or transfer shall have been given, and the transfer registered in the Deputy Commissioner's office.

Area to be included in renewed lease when half area is not brought under cultivation under preliminary lease.

(iv) Where half the area of the grant has not been brought under cultivation during the term of the preliminary lease, as required by that lease, the renewed lease shall ordinarily include an area of waste land equal to the extent of land brought under cultivation during the currency of the preliminary lease. It will be in the discretion of the Deputy Commissioner, subject to the supervision of the Commissioner, to grant or refuse renewal of the lease in such cases, and also to include, if necessary, a larger area of waste, so as to make the grant under the renewed lease equal to the whole area granted under the preliminary lease. In the exercise of this discretion, the Deputy Commissioner should be guided by the consideration whether the excess waste is likely to be separately taken up by other applicants or not. If it is likely to be so taken up, he should settle it separately; if it is likely to remain on the hands of Government, he should include it in the new lease.

Assessment of extra land which ought to have been brought under cultivation.

(v) When extra waste land is included in the lease under condition *(iv)* above, such portion of it as ought to have been brought under cultivation during the preliminary lease will be assessed at the rate prescribed for cultivated land, and not at the rate of waste land. Unless this condition is insisted upon, it is probable that lessees will neglect cultivation during the term of the preliminary lease, in the hope of getting a renewal of their tenure at lower rates.

Management of land by agent.

(vi) The Deputy Commissioner may, in special cases of leases of 200 acres or less, and in all cases of leases of greater area, alter the terms of the lease so as to allow a lessee to manage his land by an authorized agent. In such cases, the agent must reside on or near to the land, and be provided with full legal power to act on behalf of the principal in all matters concerning it.

Assessment of excess land in possession of lessee.

(vii) If the lessee is found by survey or otherwise to be in possession of land in excess of the acreage declared in the lease, he shall pay rent for such excess land, within or without the boundaries therein described, from the date of occupation, at the rates entered in clause 3 of the lease.

Liability of lessee to eviction.

He shall also be liable to eviction at the discretion of the Deputy Commissioner from any lands that he may have occupied outside the boundaries specified in the lease. In case of dispute, the date of occupation shall be held to be the date of giving or taking possession under the preliminary lease, or where any subsequent survey has been held, the date of the last survey if the acquisition of such excess area be subsequent to such survey. All disputes to be decided on this basis by the Deputy Commissioner, subject to an appeal, to be preferred within thirty days, to the Commissioner.

Other conditions of renewed lease.

(viii) In other respects, the conditions of the renewed lease will be the same as those of clauses 3, 4, 5, 6, 9, 10, 11, 12, 13 and 14 of the preliminary lease in form C in the appendix to these rules.

21. In accordance with the provisions of clause 12 of the forms of lease C and D under the rules of 1888 whereby the Government reserves power to make rules to be observed by the lessee and his tenants it is hereby declared that adhiars who cultivate with their own cattle and ploughs shall be deemed to be tenants, and to have the rights of tenants, including protection from eviction, except by their own consent or under the orders of the Civil Court.

Preamble.

The lands covered by this lease are those specified in the following schedule and in the map which has been supplied to you and no others :—

Schedule of lands.

Boundaries—

North—
East—
South—
West—

The area is more or less acres and the description of the lands is as follows :—

The rent to be paid shall be as follows :—

	Rs. A. P.
Year of entry (*i.e.*, from actual date of entry to 31st March following)	Nil
First full year (*i.e.*, from 1st April following date of entry)	
Second year.	
Third year.	
Fourth year.	
Fifth year and until next resettlement.	

The rent will be payable in two kists annually, viz.,—

A six-anna kist on 30th November.

A ten-anna kist on 1st March.

In consideration of your agreement to pay the aforesaid rent, and on payment of the charges specified in clause 1 below this lease of the lands described as aforesaid is granted to you for a period of * years from † A.D. corresponding to † B.S. on the following conditions.

* Enter the number of years intervening before 1933-34 when next resettlement is due.

† Enter month and year.

Conditions.

1. You shall pay to the tahsildar such sums as may be required of you in respect of the actual costs of survey of these lands. And you shall further pay to the tahsildar the value of all *sissoo*, *sál*, *champ*, *semul* and *chelownee* trees of a girth of over three feet at a distance of three feet from the ground, and all such *khair* trees as may be fit to cut, as assessed by an officer of the Forest Department. Until these sums are paid possession of the land will not be given to you. All trees on the land other than those above specified become your property under this lease, free of charge.

2. You shall pay the rent and cesses at the tahsil office within whose jurisdiction your jote is situated on or before the days specified above or such other days as the Local Government may appoint for the purpose : and you will be given a receipt for all payment made by you on this account, which receipt shall be the only proof of payment that will be admitted.

The lands settled with you shall be subject to any cesses, such as road and public works cesses or any other cesses which may hereafter be imposed by law in addition to the rent assessed.

3. In the event of you, your successors or representatives failing to pay the rent or cesses according to the aforesaid instalments on the aforesaid dates, all arrears shall be realized by sale of your property, according to the provisions of the law for realization of arrears of Government revenue or any other law for the time being in force for the recovery of public demands.

4. Government reserves to itself the right to all minerals on the lands, together with such rights of way and other reasonable facilities as may be requisite for working, gathering and carrying away such minerals.

5. No right of fishery in any river is granted to you by this lease.

6. You will keep all boundary lines or marks in good order and repair and clear of jungle to the satisfaction of the Deputy Commissioner of Jalpaiguri or such other officer who may be appointed to look after the Duars Government estates. You will make all boundary marks which you may be required to do by an order in writing from the Deputy Commissioner. If you fail to do so the Deputy Commissioner or other officer, who may be appointed for this purpose, may cause the boundary to be made, and recover the cost thereof as a public demand.

7. You are forbidden to erect any embankment or bund on the bank or in the bed of any river or stream without the express permission of the Deputy Commissioner previously obtained in writing, and you are likewise forbidden to cut any channel or water-course in or leading from the bed of any river or stream, or to do any act which will cause or tend to cause any river or stream to change its course or to alter the distribution of the water within its bed without the express permission of the Deputy Commissioner previously obtained in writing. In the event of your contravening any part of this condition the Deputy Commissioner will be entitled to take such steps as seem to him necessary to avert any consequences of such unauthorized actions and to recover the cost of so doing from you as a public demand.

8. All markets and hâts in the Western Duars being the exclusive property of Government no right to establish such market or hât is granted to you, and you are absolutely prohibited from establishing any market or hât on land covered by this lease. If any hât or market be established in contravention of this condition, the Deputy Commissioner shall be entitled to resume the same and at once to take possession thereof. You will be granted an abatement of rent for all land so resumed, calculated on the basis of the classification and rates by which your rent has been assessed. Compensation for trees for which a valuation has been paid to Government will be awarded to you by the Deputy Commissioner, but no compensation will be paid to you for the land itself.

9. A public right-of-way is reserved over twenty feet on either bank of every navigable river or stream at all times of the year for the boat traffic, and all lands lying within a distance of sixty feet on either side from the centre of any public road or thoroughfare, which shall have been or may hereafter be constructed and kept in repair from public funds, are liable to be used for ordinary repairs of such roads.

10. Public access shall be allowed at all times to any springs of water on the lands leased, whenever such access is in the opinion of the Deputy Commissioner, necessary for the convenient supply of good water to persons residing in the vicinity; and the lessee is bound not to injure the springs or allow others to do so.

11. If any of the lands covered by this lease be required for a public purpose, the Deputy Commissioner shall be entitled to resume the same and at once to take possession thereof. You will be granted an abatement of rent for all lands so resumed, calculated on the basis of the classification and rates by which your rent has been assessed. Compensation for buildings, standing crops, and trees for which a valuation has been paid to Government will be awarded to you by the Deputy Commissioner, but no compensation is due to you for the land itself.

12. When required to do so by the Deputy Commissioner you are bound to furnish information regarding all particulars of your jote, and the crops grown on it.

13. If at any time it is found that tea is being cultivated on any part of your jote you shall be liable to have the rent of your jote enhanced to the highest rate which is charged for lands held in the pargana under the rules for the grant of leases for tea cultivation, and if you refuse to agree to pay such enhanced rent your lease shall be liable to be cancelled by the Deputy Commissioner. Such enhanced rent shall be due from you from the beginning of the year in which the cultivation of tea is discovered.

14. You must within two years from the date thereof erect a suitable homestead and reside permanently with your family on your jote or if outside the jote then within such distance of it as the Deputy Commissioner of Jalpaiguri may approve.

15. No clubbing or amalgamation of jotes is permitted In the event of your acquiring other jotes by inheritance the Deputy Commissioner must be informed within two months of your taking possession, and you shall register the name of your Agent who shall reside on the jote or if outside the jote then within such distance of it as the Deputy Commissioner may approve.

16. If you are at any time found by survey or otherwise to be in possession of land in excess of the area described in your lease you shall be liable to pay full rent for the excess area from the date of the commencement of the period of your lease. But if the Deputy Commissioner is satisfied that the encroachment took place at a date later than the commencement of the period of your lease he will be at liberty to remit the rent for the excess area for the period prior to the date of the encroachment. Such unauthorized occupation of land and the payment of rent for it shall give you no right to continued occupation and the Deputy Commissioner shall be entitled to eject you from the excess area. Provided that if within three months after the Deputy Commissioner has recorded an order declaring the amount of the excess area and the amount of the rent due therefor, he shall not record an order refusing to agree to your continued occupation of the excess area, he shall be deemed to have so agreed and your lease shall thereupon be corrected under the signature of the Deputy Commissioner so as to show the area and rent as revised.

17. Your heirs will succeed to this jote by inheritance and every such succession must be registered in the tahsil office within two months of possession being taken by the successor.

18. You shall not transfer your right or any share or interest therein by sale, gift, mortgage or otherwise, except with the sanction of the Deputy Commissioner previously obtained in writing. Such sanction will not ordinarily be withheld if the Deputy Commissioner is satisfied that the transferee is already or is about to become a *bonâ fide* resident cultivator, and that the result of the transfer will not be to give him a total area in excess of 25 acres in the Western Duars. The transferee will have the same rights and privileges as you have and will be liable to the same obligations as you are. Provided that in no case, shall you be permitted to transfer your jote or any portion thereof within five years from the date of this lease, and provided that you shall not allow your jote or any portion thereof to be sold in execution of a money decree.

19. You shall not be permitted to sublet any lands of your jote either on produce or cash rent and the introduction of adhiars is prohibited.

20. You must proceed to reclaim and cultivate your jote with due diligence to the satisfaction of the Deputy Commissioner of Jalpaiguri, and if you fail to bring it under cultivation to his satisfaction within four years from the date hereof it shall be lawful for the Deputy Commissioner at any time after the expiry of four years from the date hereof to re-enter upon the jote and thereupon this lease shall determine absolutely but without prejudice to any right of suit of Government in respect of any antecedent breach of any of the conditions herein contained.

21. If during the currency of this lease any condition herein contained shall not be duly and fully performed or observed it shall be lawful for the Deputy Commissioner at any time hereafter to enter upon the demised jote and thereupon this lease shall determine absolutely and without prejudice to any right of suit of Government in respect of any antecedent breach of any of the conditions thereof; or if the Deputy Commissioner sees fit, he may inflict a fine not exceeding Rs. 100 in lieu of cancelling your lease: such a fine will be recoverable as a public demand.

22. After expiration of the term of this your present lease you will, if you have duly observed the conditions thereof, receive a renewed lease at such rates and on such conditions as may then be determined on by Government.

PRELIMINARY LEASE OF ARABLE LANDS IN THE WESTERN DUARS GRANTED UNDER THE RULES OF 1888.

Preliminary lease for five entire years of land in granted by the of to of

1. The lands covered by this lease are situated within the boundaries shown by the red lines in map No. , dated , and attached to this lease and may be described as being bounded as follows :—

North—
East—
South—
West—

Their area is more or less acres, and they are situated in pargana , taluk in the tahsil of in the Western Duars.

2. This lease shall be for a period of five years from the commencement of the official year of actual entry, and the rights conveyed by it are heritable and also transferable ; provided—

(*a*) that the entire grant, and not a portion of it, be transferred, but if in any case on application being made to the Deputy Commissioner, he finds after due enquiry, that the transfer of only a portion of the grant would save the entire grant from sale for arrears of Government revenue or would specially benefit the lessee in any way, the Deputy Commissioner, may, with the sanction of the Commissioner, permit the transfer of such portion ;

(*b*) that the clearance conditions are duly observed by the transferer and transferee respectively ; and

(*c*) that the succession or transfer is registered in the Deputy Commissioner's office.

If any transfer of the rights conveyed by this lease is made otherwise than in accordance with the foregoing provisions and the rules, all rights in the land leased shall be liable to be forfeited to the Government. After the expiry of this preliminary lease no right shall be claimed otherwise than as expressly provided for hereinafter

The rent to be paid shall be as follows :—

Year of entry (*i.e.*, from actual date of entry to 31st March following) ...	Nil.
First full year (from 1st April following date of entry)	Nil.
Second year	3 annas per acre.
Third and fourth years	3 „ „ „
Fifth year	8 „ „ „

The rent shall be paid to the tahsildar of in the following instalments :—

3. The lessee shall himself reside on or near to the lands covered by the lease. He shall keep all boundary lines or marks in good order and repair and clear of jungle, to the satisfaction of the Deputy Commissioner, and shall within one year from the date of this preliminary lease, make such continuous boundary mark as he shall be required to do by a written order. If he fail to do so, the Deputy Commissioner may cause the boundary to be made, and recover the cost thereof under the Public Demands Recovery Act, or he may call on the lessee to make it within a specified time on pain of forfeiture of the lease.

4. Any land covered by the lease, which may at any time be required for a public purpose, may be taken up with the sanction of the Board of Revenue, free of cost, on a reduction being made in the rent payable under the lease proportionate to the area taken by Government. But the value of any improvements or property thereon shall be paid to the lessee, and shall be assessed under the provision of the law in force for the time being for the acquisition of land for public purposes.

5. All rights to minerals or quarries of all kinds are reserved to Government, together with such rights-of-way and other reasonable facilities as may be requisite for working, getting and carrying away such minerals.

6. No right of fishery and no right to dam up or otherwise obstruct the passage of any streams is given by this lease. A public right-of-way on either bank of every navigable stream, available at any time of the year, is reserved. Public access shall be allowed at all times to any springs of water on the lands leased, whenever such access is, in the opinion of the Deputy Commissioner, necessary for the convenient supply of good water to persons residing in the vicinity; and the lessee is bound not to injure the springs or allow others to do so.

7. All sissoo, sal, champ, semul, and chelownee trees of a girth of over three feet at a distance of three feet from the ground, and all such khair trees as may be fit to cut, are to be paid for by the lessee at the rates at which they may be valued by the Forest Department. All other trees may be disposed of by the lessee. The six kinds of trees above specified shall be counted and paid for previous to possession being given.

8. The Deputy Commissioner may at any time, and shall as soon as possible after the expiration of the lease, enter on, inspect, or measure the area under cultivation, and the lessee may at any time demand that such measurement be made Provided that the cost of any such inspection or measurement as may be made before the expiration of the lease on demand of the lessee shall be paid by him as rent due. If after such inspection by any officer deputed for the purpose, it shall appear that one-half of the total area held under the lease is occupied by homesteads or is cultivated, or left fallow, according to good husbandry, or otherwise fairly turned to account for agricultural purposes, the lessee shall be entitled to renewal of this lease for such further period as shall coincide with the termination of the settlement period then current, and thereafter to renewal for the period of each fresh settlement of the taluk, subject always to the following conditions:—

(*a*) The rent to be paid shall be fixed by the Deputy Commissioner on the order of the Board of Revenue on each occasion of renewal but without the special order of the Board of Revenue shall not exceed double the rent previously paid.

(*b*) The title conveyed by the renewed lease shall be heritable and transferable; provided (*a*) that no transfer shall be made of less than the whole, but if in any case, on an application being made to the Deputy Commissioner, he finds, after due enquiry, that the transfer of only a portion of the grant would be beneficial to the lessee, the Deputy Commissioner may, with the sanction of the Commissioner, permit the transfer of such portion; and (*b*) that no succession or transfer shall be valid as against the Government, but shall, on the contrary, be equivalent to a surrender of the lease, unless notification of the succession or transfer shall have been given and the transfer registered in the Deputy Commissioner's office.

9. The rights and privileges conveyed by this lease, and by any renewed lease granted in accordance with its provisions, shall be liable to be forfeited on failure of the lessee to comply with any condition thereof.

10. If before the expiration of this preliminary lease, no application for a renewal of the lease shall have been made in accordance with the above provisions, the lessee may be allowed to hold on as a tenant-at-will, but not otherwise, until other arrangements may have been made by the Deputy Commissioner.

11. The lessee may sublet any part of the land covered by this lease on such terms as he pleases, provided that he gives the same promise of renewal of the tenure to his sub-tenant on condition of bringing his land into cultivation as is given to himself by this lease. The rent to be paid on renewal

shall be determined, on the application of either party, by the Deputy Commissioner, who has the power to fix equitable rates of rent, as he has, under sections 76 to 79 of Act X of 1859, to fix terms of pottah.

12. No sub-tenant under the lessee shall sublet any part of his land on pain of forfeiture of his tenure; but this rule and the last shall not be held to prevent the employment of adhairs, projahs, and other labourers supplied with seed and paid by giving them half the crop. If a sub-tenant under the lessee sublets any of his land, no suit or proceeding for the recovery of rent in money or kind on his part shall lie in any court. The Government reserves power to make rules to be observed by the lessee and his tenants for the purpose of carrying out the provisions of this and the last preceding clause; and the lessee agrees to abide by such rules when published for general observance, and to hold the land subject to such rules on pain of forfeiture.

13. Tea may not be cultivated on the area covered by this lease if that area exceeds 200 acres.

14. No clubbing or amalgamation of grants is allowed, and all land bearing tea will be forfeited to Government if more than one grant becomes the property of the same owner, except by inheritance.

[Second publication.]

The 19th July 1917.

No. 67Marine.—The 24th July 1917.—The following draft of amendments which, with the previous sanction of the Governor-General in Council, the Governor in Council, in exercise of the power conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), intends to make in the rules for regulating the importation, possession and transport of petroleum, published under Bengal Government Notification No. 143Marine, dated the 30th November 1914, is published for the information of persons likely to be affected thereby.

II. The draft amendments will be taken into consideration on or after the 25th August 1917, and any suggestion or criticism with regard thereto received by the undersigned before that date, will be duly considered.

F. A. A. COWLEY,
Secy. to the Govt. of Bengal.

Draft amendments.

1. *For* rules 14 and 15, Chapter II, Part II, the following shall be *substituted*, namely :—

"14. Petroleum which has been imported into any port specified in rule 1 of Part III and which has not been tested at the port of import in accordance with the rules contained in that Part, shall not be transported to any other port save one at which importation is permitted under rule 1 of Part III, and the provisions of all the rules of that Part, except rule 22, shall be deemed to apply to such petroleum when it arrives at such other port.

Transport by sea of petroleum which has not been tested.

15. Petroleum which has been tested at the port of import may be transported to any other port, and the provisions of rules 2, 3, 4, 14 (except the proviso), 16, 19 and 20 of Part III shall apply to such petroleum when it arrives at such other port."

Transport by sea of petroleum which has been tested.

2. *For* rules 20 and 21 of Part III, the following shall be *substituted*, namely :—

"20. When petroleum imported otherwise than in bulk is landed at a port, it shall be landed either at jetties provided for the purpose, or in cargo-boats, and except where electric light is exclusively used, only after sunrise and before sunset, and only at such place or places as the Conservator of the port shall direct, subject to any Customs Notification that may, for the time being, be in force :

Landing of petroleum otherwise than in bulk

Provided that the precautions laid down in rule 21A of this Part shall be observed.

21. Petroleum may be transhipped from one ship to another for conveyance to any other port, whether within or beyond the limits of British India, provided that the petroleum shall not be transhipped between sunset and sunrise, except when electric light is exclusively used, and provided further that the precautions laid down in rule 21A of this Part shall be observed.

Transhipment of petroleum

21A. The following precautions shall be taken by all vessels and cargo-boats loading or unloading petroleum, whether for transhipment or otherwise :—

Precautions to be observed in loading or unloading petroleum.

(*1*) Vessels discharging or loading petroleum shall have fire-hoses connected and all fire extinguishing appliances in readiness for immediate use, and, if the petroleum is dangerous petroleum, shall have their awnings furled.

(*2*) No fire or light of any description (other than lights required by the port or harbour rules) or any detonating article or substance whatsoever, or matches, shall be, or shall be taken, on board any cargo-boat used for the transport of dangerous petroleum, or, within the limits of any port, for the transhipment of non-dangerous petroleum to or from any vessel.

(3) No cargo-boat used for the carrying of dangerous petroleum shall be fitted with a caboose for cooking purposes when engaged in such work.

(4) Dangerous and non-dangerous petroleum shall not be conveyed to the shore or to another ship at the same time on the same cargo-boat.

(5) Leaky tins containing dangerous petroleum shall not be discharged into a cargo-boat containing sound tins.

(6) The bilges of every cargo-boat which has carried a cargo of petroleum shall, immediately after the cargo-boat has been unloaded, be thoroughly cleared of all traces of such petroleum and dried and the holds shall be thoroughly ventilated."

BOARD OF REVENUE, BENGAL.

NOTICE.

WHEREAS the Court of Wards, Bengal, has, under section 6 *(e)* of Act IX (B.C.) of 1879, as amended by Act V (B.C.) of 1915, declared on his own application that Mr. G. Hennessy, a proprietor of Mathurapur estate, in the district of Malda, is a disqualified proprietor and that it is expedient in the public interest that his estate should be managed by the Court of Wards; and, whereas, under sections 7 and 35 of the said Act, the said Court has assumed charge of the property of the said Mr. G. Hennessy, notice is hereby given, under section 10A of the said Act, that all creditors having claims against the said Mr. G. Hennessy or his immovable property are hereby required to submit the same in writing to the Court of Wards at the office of the Board of Revenue in Calcutta within six months from the date of publication of this notice. Creditors are also hereby warned that claims not submitted as required by this notice are liable to be deemed to have been duly discharged.

C. E. LOW,
Secretary to the Govt of India.

The following notification, issued by the Government of India in the Home Department, published in the *Gazette of India*, dated the 14th July 1917, is republished for general information.

J. H. KERR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

POLICE.

Simla, the 5th July 1917.

No. 407.—In exercise of the powers conferred by section 27 of the Indian Arms Act, 1878 (XI of 1878), the Governor-General in Council is pleased to direct that the following amendments shall be made in Schedule II appended to the Indian Arms Rules, 1909, as subsequently amended, namely :—

1. To entry 7 the following shall be added as clause (*c*), namely :—

"(*c*) On that part of the Bhavnagar Railway which lies in the Ahmedabad district.	All arms, ammunition and military stores covered by any exemption or parwana granted under the Kathiawar State Arms Rules or the Kathiawar Agency Arms Rules, provided that the conditions of such exemption or parwana are observed.	Those contained in sections 13 to 16."

2. Against clause (*a*) of entry 8 the word "All" shall be substituted for the entry "Do." in the third column.

J. H. DUBOULAY,
Secretary to the Govt. of India.

After Rule 11D of the said rules, the following rule shall be inserted, namely :—

"11E. (1) The Governor-General in Council may, for the purpose of facilitating the collection of any article or thing which is, in his opinion, capable of utilisation in the prosecution of the present war, make orders for all or any of the following purposes:—

Power to require railways to give facilities for transport in certain cases.

(*a*) for requiring railways to give special facilities as to the transport of such article or thing,

(*b*) for enforcing the prompt loading or unloading of trucks or waggons, and

(*c*) for controlling other traffic in order to expedite the transport of such article or thing.

(2) Any order made under sub-rule (1) may be made so as to apply generally to all railways, or to any class of railways, or to any particular railway.

(3) If any person acts in contravention of, or fails to comply with, the provisions of an order made in the exercise of the powers conferred by sub-rule (1), he shall be deemed to have contravened these rules."

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 1368M.—The 30th July 1917.—The Commissioners of the Naihati Municipality, in the district of the 24-Parganas, having recommended that a local area should be excluded from the said Municipality, the Governor in Council is pleased to declare his intention to give effect to that recommendation.

24-Parganas.

This area is bounded on the—

North and East—The western boundary of villages Rajendrapur, Mamoodpur, Deulpara and Madral,

South—Muktearpur Khal,

West—The eastern boundary of the Eastern Bengal Railway property down to a point about 150 yards north of the Radhaballav Road. The boundary line will thence strike east till it meets the north-east end of the footpath running south by the house of Satya Bala Debi. It will follow the footpath to the Radhaballav Road, run east excluding the Radaballav Road to the north-east corner of the Arjuna tank, and south along the east of a footpath known as Makhaltala Road till it meets the Muktearpur Khal.

2. The boundaries of the Naihati Municipality after the exclusion of the said area will be as follows :—

North—The northern border of the Malapara Road, Banakpur Road and Balivara Road till it meets the western boundary of village Balivara; then the western boundary of villages Balivara, Rampur and Malancha,

East—The eastern boundary of the Eastern Bengal Railway property down to a point about 150 yards north of the Radhaballavpur Road. The boundary line will thence strike east till it meets the northern end of the footpath running south by the house of Satya Bala Debi. It will follow the footpath to the Radhaballav Road, run east including the Radhaballav Road to the north-east corner of the Arjuna tank, and south along a footpath known as Makhaltala Road till it meets the Muktearpur Khal,

South—Muktearpur Khal,

West—The river Hooghly.

3. Any ratepayer of the Municipality or any inhabitant of the said local area, who objects to the exclusion of the said local area from the said Municipality, should submit his objection in writing through the District Magistrate to the undersigned before the 1st October 1917.

No. 1374M.—The 31st July 1917.—The following draft of amendments which, in exercise of the power conferred by section 290 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council proposes to make in the rules published under notification No. 231M., dated the 1st February 1915, at page 22 of Part 1B of the *Calcutta Gazette* of 3rd idem, subject to which the Commissioners of the Howrah Municipality may allow communication-pipes to be laid down from the service-pipes of the Commissioners for the purpose of leading water to holdings within the Municipality for domestic purposes only, as subsequently amended by notifications Nos. 2799M., dated 8th December 1916 and 49M., dated 8th January 1917, is published for the information of persons likely to be affected thereby.

2. The draft will be taken into consideration on or after the 15th September 1917, and any objection or suggestion received by the undersigned before that date will be duly considered :—

Draft amendments.

To the preamble add the following proviso :—

"Provided that in the case of a holding exempted from assessment as being used exclusively for purpose of public worship, but of which the annual value is not less than Rs. 100 or such higher amount as may be fixed by the Commissioners at a meeting, the Commissioners may allow connection for domestic purposes only."

After rule 5 insert the following as rule 5A :—

"No holding shall have more than one separate connection, but if in any case the Commissioners are satisfied that an adequate supply to any holding cannot be given through a single connection, they may sanction a second connection thereto."

No. 1366L.S.-G.—The 30th July 1917.—In exercise of the power conferred by clause (*a*) of section 31 of the Cattle-trespass Act, 1871 (I of 1871), and in modification of the orders contained in paragraph 1(*a*) of Notification No. 317½T.M., dated the 16th August 1913, the Governor in Council is pleased to transfer to the Sainthia Union, in the district of Birbhum, all the functions of the Magistrate of that district, under Chapters II and III of the said Act, in respect of all pounds within the local area subject to the jurisdiction of the said Union.

Birbhum.

No. 1367L.S.-G.—The 30th July 1917.—In exercise of the power conferred by clause (*b*) of section 31 of the Cattle-trespass Act, 1871 (I of 1871), and in modification of the orders contained in clause (*a*) of Notification No. 318T.M., dated the 16th August 1913, the Governor in Council is pleased to direct that the whole of the surplus accruing, under section 18 of that Act, in the areas under the jurisdiction of the Sainthia Union, in the district of Birbhum, shall be placed to the credit of the Union Fund constituted for the said Union.

Birbhum.

No. 1364L.S.-G.—The 30th July 1917.—In exercise of the power conferred by section 38 of the Bengal Local Self-Government Act of 1885 (Bengal Act III of 1885), the Governor in Council is pleased to constitute the following group of villages comprising

Birbhum.

the Chaukidari Union of Sainthia in thana Sainthia, in the district of Birbhum, into a Union :—

Name of the District Board within whose jurisdiction the Union is constituted.	Name of Union.	Number of members of which the Union Committee shall consist.	Names of villages which constitute the Union, with their jurisdiction list numbers.	Boundaries of the Union.
Birbhum ...	Sainthia ...	9, of whom six to be elected and three appointed.	Senbongram Chak Boinchi 934 Chautari ... 942 Madanpur ... 951 Loutari ... 963 Kutubpur ... 964 Sainthia ... 1047 Sainthia Baje ... 1043 Muradihi ... 1050 Malberia ... 1051 Kustori ... 1052 Nituria ... 1053 Faridpur ... 1054 Faizullahpur ... 1055 Pariharpur ... 1058 Kherua ... 1059 Kooldaha ... 1060 Naugaon ... 1061 Baraichandi ... 1062 Chak Jhara ... 1066 Chak Dhitaipur ... 933 Khari Bongram ... 935 Arazi Punour ... 940 Tarulia ... 941 Arazi Laliapur ... 943 Kutabpur ... 944 Arazi Laliapur ... 962 Arazi Ammo or Udnagar 1046 Charakgarh ... 1048 Parihar ... 1049 Arazi Patiharpur ... 1056 Chakrapani ... 1063 Chak Dunaipur ... 1064 Arazi Sonwaldihi ... 952 Balia Chaturi ... 953 Arazi Madanpur ... 954 Arazi Raihat ... 955 Charakgarh ... 1042 Loutari ... 1044 Arazi Shahapur ... 1045 Arazi Sainthia ... 1057 Arazi Madanpur ... 945 Bherakopa ... 946 Arazi Madanpur ... 947 Arazi Punour ... 948 Nilambarpur ... 949 Arazi Rasidpur ... 950	*North.* River Mor. *West.* (961) Bherakopa (also called Bengrakopa), (870) Arazi Kamardanga, (939) Bhalan, (936) Chak Bongram, (937) Chak Lakshmanpur, (932) Dearpur. *South.* (1065) Mouza Amarpur and (1067) Masdaha. *East.* (1) Sojmant, (3) Bolsonda, (4) Dangalpara, (5) Mallikpur, (6) Tentuldihi, (11) Konora (*alias* Laloora), (15) Kundha, (18) Bilsa and (25) Baharpur.

2. In exercise of the power conferred by section 41 of the same Act, the Governor in Council is pleased to direct that the Committee of that Union shall consist of nine members, of whom three are to be appointed by the Commissioner of the Burdwan Division and six to be elected by the residents of the Union.

BOARD OF EXAMINERS, CALCUTTA.

NOTICE.

NAMES of Munshis qualified to teach Urdu can be had on application to the undersigned. A complete list is published in the *Gazette of India*, Part II.

O. F. JENKINS,
Secretary and Member, Board of Examiners.

OFFICE OF THE BOARD OF EXAMINERS, 1, COUNCIL HOUSE STREET, CALCUTTA, *the 31st October 1916.*

OFFICE OF THE DIRECTOR OF SURVEYS, BENGAL.

NOTICE.

THE Session of the Bengal Land Surveying School, Comilla, begins on the 16th November 1917.

Applications for admission, together with a registration fee of Rs. 3 and the following certificates, will be received by the Principal of the School on or before the 15th September 1917.

The qualifications for admission to the first year's course are :—

(*a*) A sound knowledge of Elementary Arithmetic.
(*b*) Ability to write simple English and some vernacular.
(*c*) A certificate of fitness for arduous field work signed by a qualified medical practitioner. The medical certificate must bear a date within one month of the date of application.
(*d*) A certificate of character from his last Schoolmaster.

The applicants should be under 21 years of age and willing to reside at the School hostel.

Two Junior Scholarships, each of the value of five rupees per mensem, shall be awarded annually by the Director of Surveys upon the recommendations of the District Officers to regular students entering the first year class.

CALCUTTA UNIVERSITY.

Regulations for the I. E. and B. E. Examinations.

THE following Regulations governing the I. E. and B. E. Examinations will come into force with effect from the 1st of November 1917 in place of the Regulations hitherto in force :—

CHAPTER LI.

INTERMEDIATE EXAMINATION IN ENGINEERING.

1. The Intermediate Examination in Engineering shall be held annually at such time and place as the Syndicate shall determine, the approximate date to be notified in the Calendar.

2. Any undergraduate of the University may be admitted to this examination, provided he has prosecuted a regular course of study in a College of Engineering affiliated to the University for two academical years after passing the Intermediate Examination in Arts or in Science.

3. The Intermediate Examination shall be divided into two sections, A and B, the limits of which are set down in the Syllabus.

Section A may be taken at the end of the first year of the Intermediate course, and in the event of a candidate failing in one group, Mathematics or Physics or Chemistry, he may be allowed to present himself for re-examination in that group when appearing at the Intermediate Examination in Engineering. Such a candidate may obtain credit for the remaining group of Section A, but he shall not be allowed to pass in Section B unless he has previously qualified in all groups of Section A.

4. Every candidate for admission to the examination shall send to the Registrar his application with a certificate in the form prescribed by the Syndicate and a fee of Rs. 15 for Section A or Rs. 30 for the Intermediate Examination in Engineering (whether he has previously passed in Section A or not) fourteen days before the date fixed for the commencement of the examination.

A candidate who fails to pass or to present himself for the examination shall not be entitled to claim a refund of the fee.

A candidate may be admitted to one or more subsequent examinations on payment of a like fee of the amount herein prescribed on each occasion.

5. Every candidate shall be examined in the following subjects :—

Section A—Mathematics and Science ;
Section B—Mathematics and Applied Science, Descriptive Engineering ; Surveying ; Drawing ; Estimating.

6. The limits of the subjects shall be as follows :—

MATHEMATICS.

SECTION A.

Computation and Mensuration.

(*a*) Approximate and abbreviated methods of performing numerical calculations.

The Theory of Logarithms. Use of Logarithmic tables. Application of Logarithms to Arithmetical and Trigonometrical calculations, including the solution of triangles and the determination of heights and distances. Proof of the formulæ used.

(*b*) Mensuration of plane and solid figures, including the areas of plane polygons in Cartesian and polar co-ordinates, and the application of Simpson's rules, the prismoidal formulæ and Guldin's theorems. Proof of the formulæ used.

Plane Analytical Geometry and Differential Calculus.

(*a*) Rectangular Cartesian co-ordinates and polar co-ordinates. Graphs of simple functions. Analytical Geometry of the straight line and circle. Standard equations of the parabola, ellipse and hyperbola.

(*b*) Differentiation in general, including Leibnitz's theorem ; partial differentiation of implicit functions. Orders of smallness ; infinitesimals,

and differentials. Elementary proof of Taylor's and Maclaurin's theorems. Expansions of functions of a single variable. Maximum and minimum values of function of a single variable.

(*c*) Tangents, normals, asymals, asymptotes and multiple points. Tracing of simple plane curves.

Statics.

Composition of concurrent and parallel forces acting on a rigid body. Centre of parallel forces; centres of mass; reduction of any system of co-planer forces acting on a rigid body to a single resultant force and couple and to a single resultant force or couple. Conditions of equilibrium: statically equivalent system of forces; problems on equilibrium. Friction machines.

SECTION B.

Plane Analytical Geometry.

Elementary Analytical Geometry with special reference to the properties of the parabola, ellipse, hyperbola and other commonly occurring curves whose equations are simple in form.

Integral Calculus.

Integration regarded as a process of summation and as the inverse of differentiation. The integrals of such simple functions as axn, $sebx$, $a \sin (bx\ c)$, $a \cos (bx\ c)$.

Applications to the evaluation of place areas, volumes and surfaces of revolution and centres of gravity.

Dynamics.

(*a*) Uniform and uniformly accelerated motion. Composition of velocities and accelerations. Relative velocities and accelerations. Projectiles.

The laws of motion with simple illustrations, such as the motion of a particle on an inclined plane, motion of two particles connected by a string, uniform circular motion of a particle.

(*b*) Impulse of a force; principle of linear momentum for a single particle and for a system of particles; simple cases of impact, including the impact of two spheres whose centres move in the same plane.

Work of a force; principle of energy for a single particle and for a system of particles; application of the principle to the solution of problems; elementary properties of liquid.

Elementary Applied Mechanics.

(*a*) *Definition of Terms.*—Structure. Stress. Strain. Working load. Factor of safety. Fatigue. Elasticity.

(*b*) *External Influences tending to produce Rupture in Simple Beams.*—Moments of flexure and resistance. Cantilevers. Beams supported at two ends. Moment of inertia. Shearing stress. Deflection.

(*c*) Application in simple cases of the principles of strength and deflection to simple timber and iron beams and roofs.

(*d*) *Foundations and Walls.*—Stability of walls. Failure by overturning, crushing and sliding.

Empirical rules for retaining walls.

CHEMISTRY.

SECTION A.—GENERAL CHEMISTRY.

Lecture Course.

The study of the preparation and properties of the following elements and their typical compounds.

Chlorine; Carbon, its allotropes and their economic uses; the technology of fuels, Coal gas, Oil gas, Producer gas; Silicon; Copper, including the more important alloys of copper; Calcium; Aluminium; Iron; Chromium; Zinc; Manganese; Arsenic; Antimony; Tin; Lead, including Red Lead, White Lead.

Outline of the study of Thermo-Chemistry, its methods; combustion; explosion.

Practical Chemistry.

The study of the characteristic reactions and the separation of Mercury, Lead, Copper, Arsenic, Antimony, Tin, Iron, Aluminium, Chromium, Zinc, Manganese, Barium, Calcium, Sodium, Potassium, Ammonia, Sulphuric Acid, Chlorine, Fluorine, Phospheric Acid.

SECTION B.—THE TECHNICAL APPLICATIONS OF CHEMISTRY.

Lecture Course.

The Chemical Technology of Bricks and Brick-earths, Lime, Cements, Mortars, Porcelain, Glass, Water-hardness, Clarks Scale of hardness, Determination of hardness, Water softening for boiler purposes, the more important paints and pigments, Tin plate, Galvanised iron, the Chemistry of the Accumulator Battery.

Metallurgy.—Physical properties of metals and alloys. Influence of impurities on the properties of iron and copper. Effect of temperature changes on metals and alloys with special reference to steel. Annealing, hardening, tempering.

Fuel.—Classifications, manufacture of coke, gas producers, calorimetry, assay of coal.

Materials.—Ores, Fluxes, Slag; Oxidising and reducing agents.

Furnaces.—Hearths for roasting and refining; shaft furnaces; the iron blast furnace; cupola; reverbatory furnaces; cupellation; cement; steel furnaces; the converter; chimneys; blowing engines; Cowper's and Whitwell's stoves.

Metallurgical processes.—Classification; outlines of typical processes; the blast process; puddling; Bessemer's process, acid and basic; processes for the manufacture of aluminium and ferro-manganese; chief processes of copper-smelting; manufacture of by-products of the smelting of sulphide ores; methods of recovery of gold from alluvial deposit and auriferous reefs; methods of producing sound castings.

Practical Course.

Qualitative analysis of brass, bronze, iron and iron ores, limestones, brick-earths and colour washes.

Quantitative analysis—

(*a*) Simple gravimetric determination of Iron, Copper, Zinc, Calcium, Magnesium, Silica and Carbonic Acid.

(*b*) Volumetric work, simple acidimetry and alkalimetry; determination of calcium; chlorine in water; determination of permanent and temporary hardness; determination of iron by permanganate; commercial analysis of iron.

Metallurgy.—Practical exercises in the preparation of common alloys and the determination of their mechanical properties; fire-testing of the qualities of clay and brick-earths; determination of ash, coke and sulphur in solid fuels; determination of furnace temperature by some form of pyrometer.

PHYSICS.

SECTION A.—GENERAL PHYSICS.

(*a*) *Heat.*

Expansion of solids, liquids and gases. Regnalt's experiments on the absolute expansion of mercury and the expansion of gases. Charles' Law. Principles of thermometry. Thermometers for various purposes. Absolute temperature. Density of solids, liquids and gases. Calorimetry; correction for radiation. Specific heats of solids and liquids. Determination of the specific heat of gases at constant pressure and constant volume. Dulong and Petit's Law. Change of state of aggregation. Critical temperature; continuity of state. Measurement of heat of fusion and vaporisation Influence of pressure on melting and boiling points. Methods of liquefying gases. Pressure of saturated steam. Hygrometry.

(*e*) *Light.*

Reflection and refraction. Velocity of propagation. Foucault's and Fizeau's experiments. Plane and spherical mirrors. Refraction. Prisms, minimum deviation. Determination of refractive indices of solids and liquids. Lenses. The Sextant, Telescopes and Field Glasses. Simple experiments on radiant heat and electrical radiation. Dispersion. Spectroscopes and spectra. Colour.

Practical Exercises.

Measurement of thickness of plates by wire-gauge, micrometer screw gauge, micrometer callipers, cover-glass tester, spherometer.

Determination of radius of curvature of lenses by the spherometer.

The cathetometer ; adjustments ; verification of Bowle's Law ; co-efficients of tensional elasticity.

Dividing machines and their uses.

The balance ; adjustments ; weighing by the method of vibration ; specific gravity of solids.

Moments of inertia.

The barometer ; reading and correction

Thermometer ; comparison, verification of fixed points.

Co-efficients of expansion.

Hygrometry ; dew-point hygrometers ; psychrometers ; comparison of results.

Calorimetry ; correction for loss of heat ; specific heat of solids ; heat of evaporation.

Melting and boiling points ; distillation.

Pressure of aqueous vapour.

Exercises with the spectroscope. Measurement of indices of refraction. Photometric experiments. Focal distances of mirrors and lenses.

Comparison of lengths. Determination of cross sections and volumes. Specific gravity of solids and liquids. Composition of moments. Co-efficient of friction. Efficiency of wheel and axle. Efficiency of crab winch. Efficiency of differential pulley and of system of pulleys. Efficiency of screw jack and hydraulic jack.

SECTION B.—APPLIED PHYSICS.

Conduction ; simple cases of steady flow across a plate and along a bar. The fundamental laws of thermodynamics. Joule's experiments. Adiabatic transformations. Cooling of gases by expansion. The diagram.

Outline of the action of Steam Engine, Gas Engine, Petroleum Engine.

(*b*) *Statical Electricity.*

Electrification by friction. Electroscopes. Ice-pail experiments. Induction. Electrophorus. Influence machine. Electric work and energy : potential, lines and tubes of force, equipotential surfaces. Quadrant electrometer. Electrostatic units. Condensers ; capacity. two concentric spheres, the Leyden jar. Specific inductive capacity. Statical comparison of capacities.

(*c*) *Current Electricity.*

Chemical and thermal methods of producing currents. Electrolytic conduction. Electrolysis of fused compounds and of saline solutions. Faraday's Laws. Coulometers.

Ohm's Law. Kichhoff's Laws. Units of resistance. Resistance coils. Wheatstone's bridge. Resistance of battery. Resistance of galvanometer. Electromotive force. Standard cells. Determination of Electromotive force ; the Potentiometer. Joule s Law.

(*d*) *Magnetism.*

Fundamental experiments. Magnetic fields. Magnetic curves. Declination theodolite ; dip circle. Methods of magnetisation.

Relation of magnetism to electricity. Oersted's experiment. Galvanometers. Electrodynamic experiments ; Electromagnets, types. Permeability and methods of measuring it · the ballistic galvanometer. Magnetic hysteresis. Magnetic flux, magnetomotive force, reluctance. Law of traction.

Induction of currents; Lenz's Law; Ruhmkorff's coil. Self-induction. Electromagnetic units.

Practical Exercises.

Study of magnetic field by iron-filings.
Faraday's ice-pail experiments.
Setting up and reading of galvanometers. Ohm's law; Wheatstone's bridge; the meter bridge; insulation resistance; the Potentiometer; current and voltage measurements; Kelvin's balance; current, voltage, wattage.
Heating effects of currents.
Electrolytic current measurements.

DESCRIPTIVE ENGINEERING.

Materials of Construction.—Structure, classification, and characteristic qualities of building stones, quarrying and blasting, preparation of bricks and tiles, cementing materials, plasters, paints, and varnishes, timber, iron and steel, lead, copper, zinc and the common alloys.

Details of Construction.—Brick, and stone masonry, earthwork, carpentry, foundations, walls, floors and roofs of buildings. Arches, construction of masonry, wooden and iron bridges, construction and maintenance of roads.

SURVEYING.

Prismatic Compass, Level, Theodolite, and Plane Table, Topographical surveying of limited areas. Practice of levelling. Route surveying and laying out curves. (Attested surveys executed by the candidate will be submitted to the Examiner, to which marks will be assigned.)

DRAWING AND ESTIMATING.

(i) Freehand Drawing.
(ii) Projection—(*a*) Orthographic, (*b*) Isometric, Topographical and Engineering Drawings.
(iii) The estimating and preparation of indents for materials of simple buildings, culverts; earthwork.

7. There shall be 4 papers and 2 practical tests in Section A and 9 papers and 4 practical tests in Section B.

The subjects and marks shall be distributed as follows:—

SECTION A (to be taken at the end of the first year)—

Mathematics—

8. The orders of merit on passing the Intermediate Examination in Engineering shall be determined only by the marks obtained by the candidate in Section B.

9. As soon as possible after the Intermediate Examination in Engineering the Syndicate shall publish lists in order of merit of those who have passed the Intermediate Examination in Engineering under the conditions laid down in rule 3. They shall also publish lists in alphabetical order showing the candidates who have qualified in any two groups of Section A and declaring the group in which a candidate may again have to present himself.

10. The pass marks for the Intermediate Examination in Engineering shall be one-third in each group of subjects and half of the aggregate.

11. Any candidate who has failed in one subject only, and by not more than 5 per cent. of the full marks in that subject, and has shown merit by gaining 60 per cent. or more in the aggregate of the marks of the examination, shall be allowed to pass.

12. If the Examiners are of opinion that in the case of any candidate not covered by the preceding Regulations, consideration ought to be allowed by reason of his high proficiency in a particular subject, or in the aggregate, they shall report the case to the Syndicate, and the Syndicate may pass such candidate.

CHAPTER LII.

BACHELOR OF ENGINEERING.

1. An examination for the Degree of Bachelor of Engineering shall be held annually at such time and place as the Syndicate shall determine, the approximate date to be notified in the Calendar.

2. The examination shall be held in the following branches :—

I. Civil Engineering;
II. Mechanical and Electrical Engineering;
III. Mining Engineering;

and the Diploma shall distinctly state in which branch the candidate has qualified.

3. Any undergraduate of the University may be admitted to this examination provided he has prosecuted a regular course of study in a College affiliated up to the standard of the B. E. Examination for two academical years after passing the Intermediate Examination in Engineering, in class, laboratory and workshop, in the particular branch in which he presents himself for examination.

4. A candidate shall not present himself for examination in any one year in more than one branch, but a Bachelor of Engineering who has graduated in one branch may present himself for examination in another branch, provided he has prosecuted a regular course of study in a College affiliated up to the standard of the B.E Examination for one academical year after passing the B. E. Examination, in class, laboratory and workshop, in the special subject of the branch in which he presents himself for examination. He shall be excused attendance and examination in subjects in which he has previously passed.

5. The B. E. Examination shall be divided into two sections as follows, according to the limits laid down in paragraph 8 :—

Non-Professional Section.

Mathematics and Science.

Professional Section.

Engineering and Design.

A candidate may be permitted to present himself for the non-professional section at the end of the first year of the B. E. Course, and in the event of his failing in either of the groups (Science, Physics, Geology and Mineralogy) or Mathematics he may be allowed to present himself again for examination in that group at the B. E. Examination. Such a candidate may obtain credit for the remaining group of the non-professional section, but he shall not be allowed to pass in the professional section unless he has previously qualified in all groups of the non-professional section.

6. Every candidate for admission to the non-professional section of the examination shall send to the Registrar his application with a certificate in the form prescribed by the Syndicate, together with a fee Rs. 20, at least fourteen days before the date fixed for the commencement of the examination.

A similar rule shall be observed in regard to the registration of a candidate's name for the Bachelor of Engineering Examination, in which case the fee shall amount to Rs. 40, irrespective of whether the candidate has previously passed or failed in the non-professional subjects.

A candidate who fails to pass or to present himself for either examination shall not be entitled to a refund of the fee.

A candidate may be admitted to one or more subsequent examinations on payment of fees of like amounts to those above noted.

7. Every candidate shall be examined in—

(i) Mathematics.	(iii) Engineering.
(ii) Science.	(iv) Drawing and Design.

The limits of the subjects shall be as follows :—

NON-PROFESSIONAL SECTION.

MATHEMATICS.

Integral Calculus and Differential Equations.

(*a*) Integral Calculus, including the standard integrals, integration by substitution and by parts.

Application of the integral calculus to the determination of lengths of curves, plane areas, volumes, centres of mass and moments of inertia in simple cases.

(*b*) Simple ordinary differential equations of the first and second orders.

Mixed Mathematics.

(*a*) Principle of virtual work. Analytical conditions of equilibrium. Solution of plane problems in statics by resolving and taking moments by the principle of virtual work and by graphical methods. Bending moments. The funicular polygon. The Catenary. Equilibrium of simple jointed frameworks.

(*b*) Units and dimensions.

Statical equivalence of the externally impressed forces with the effective forces in any system of bodies. The principles of linear and angular momentum. The principle of energy.

Gravitational potential energy; potential energy of a stretched elastic string and of a compressed spring.

Motion under gravity of a particle on a smooth vertical circle and on other simple curves.

Motion of a rigid body about a fixed axis.

Simple harmonic motion ; the simple, conical and compound pendulum.

(*c*) Nature and general properties of fluid pressure.

Density and specific gravity of a homogeneous mixture.

Relations between pressure, density and force.

Thrust on a plane area centre of pressure.

Resultant thrust on any immersed solid and any immersed surface, particularly in the case of a homogeneous liquid at rest under gravity.

Conditions for the equilibrium and for the stability of the equilibrium of a floating body.

Hydrostatic instruments. Determination of specific gravity. Properties of gases.

SCIENCE—GEOLOGY.

(For candidates in Civil Engineering and Mining Engineering.)

(*a*) *Astronomical Geology.*—Information obtained from meteorites and by the spectroscope. Probable history of the earth in its earliest stage of existence.

(*b*) *Geognosy.*—Probable internal condition; evidences of pressures and internal heat.

(*c*) *Petrography.*—Essential and accessory constituents. Classification of rocks. Characters and essential constituents of the more important Indian rocks.

(*d*) *Dynamical Geology.*—Volcanic phenomena. Theories of Volcanicity. Hot springs. Earthquakes. Secular upheaval and depression. Geological functions of air. Geological functions of water and ice. Chemical and mechanical actions, denudation and deposition; landslips. Peculiarities of Indian rivers. Lakes. Geological functions of plants and coral animals; islands.

(*e*) *Petrogenetic Geology.*—Origin of coal-beds. Origin of laterite. Origin of rock-cleavage. Ore deposits; origin and classification.

(*f*) *Architectonic Geology,*—Forms of bedding. Surface markings. Concretions. Overlap. Groups of Strata. Joints. Strike and dip; outcrop; monocline; syncline; anticline; Faults, origin and kinds. Intrusive phase of eruptivity; bosses, sheet, dykes, necks; interbedded phase of eruptivity; lavas, tuffs. Unconformability.

(*g*) *Palæontological Geology.*—Objects. Conditione for the entombment of organic remains. Preservation of organic remains in mineral masses; fossilisation. A general account of the uses of fossils in Geology.

(*h*) *Historical Geology.*—Leading principles of stratigraphy.

INDIAN GEOLOGY.

I. *Pre-Cambrian History*—.

1. The Archæan Group. The ancient gneisses and schists. Dome gneiss; anorthosites; the charnokite series: norites and pegmatites. The Dharwarian system.

2. The Purana Group. Lower and Upper subdivisions. Outlines of the Kaddapah, Karnul and Vindhyan systems. The Unfossiliferous Rocks of the Outer Himalayas.

II. *Cambrian and Post-Cambrian History*—

3. The Dravidian Group. The Cambrians of the Salt Range. Outlines of the distribution of the Dravidian formations in the Himalayas and in Burma; the Vaikritas and Haimantas.

4. The Aryan Group. Outline of the Aryan history of the Salt Range and of the Himalayas; the Sirmurs and Siwaliks: subdivisions and petrology. Outlines of the history of Sind, Baluchistan, and Burma during tertiary times. The Aryan history of the Peninsula. Gondwana Land; evidences of the existence of an old Indo-African continent; Lower and Upper Gondwanas; stages; a more detailed account of the Raniganj, Jherria and Giridih coal-fields. The cretaceous rocks of Madras and Assam. The Great Deccan Outburst. Laterite. Regur. The Indo-Gangetic Plain.

(*i*) *Field Geology.*—Geological surveying instruments. Tracing of boundaries and faults. Sections; how to find direction and amount of dip; Dalton's construction. Levelling; surface profile; datum level; bench marks; methods of geological levelling. Lithology; practical exercises in the identification of Indian rocks.

MINERALOGY.

(For candidates in Civil Engineering and Mining Engineering).

(*a*) Properties of crystals independent of direction.

Density and specific gravity ; methods of determining specific gravities ; hydrostatic balance ; Jolly's balance ; pycnometers ; flotation methods.

(*b*) Physical Crystallography—Cleavage ; fracture ; hardness.

Optical properties of minerals. Kind and decree of lustre. Double refraction and polarisation. Nicol's prism. Classification of crystals according to their optical properties.

Examination of crystals in parallel and convergent polarized light. Pleochroism.

(*c*) Geometrical Crystallography—Relation of physical properties to geometrical form. Crystalline form ; faces. Planes and axes of reference ; parameters ; indices ; symbols. Law of rationality of indices. Miller's notation. Parametral form ; its selection. Symmetry ; planes and axes. Systems. Simple forms and combinations. Habit. Isomorphism and heteromorphism. Crystalline aggregates. Measurement of angles ; contact and reflecting goniometers.

(*d*) Chemical Mineralogy—Outlines of classification of minerals. Group tests.

(*e*) Descriptive Mineralogy—A general description of the following minerals :—

Elements—Graphite, diamond, gold.
Sulphides—Pyrite, galena, sphalerite, chalcopyrite.
Oxides—Corundum, hematite, magnetite, quartz, cassiterite, limonite, manganese ores, bauxite.

Oxysalts :—

(i) Carbonates—Calcite, dolomite, siderite, aragonite.
(ii) Sulphates—Anhydrite, gypsum.
(iii) Phosphates—Apatite.
(iv) Silicates—Tourmaline, olivine, garnet, muscovite, biotite, talc, serpentine, pyroxene, amphibol, the felspars.

Haloid salts—Halite, fluorite.

APPLIED PHYSICS.

Thermodynamics of refrigeration. Technical Thermometry. Optical Instruments. Polarised Light. The Theory of illumination Röntgen and Becquerel rays.

The Laboratory course includes the following :—

Testing of spirit levels. Young's modulus by extensometer and by bending. Young's modulus of wires. Influence of temperature on Young's modulus. Modulus of rigidity by static and kinetic methods. Moments of inertia. Atwood's Machine. Kater's physical pendulum. Pyrometric measurement, thermal conductivity. Mechanical equivalent of heat. Photometric measurements ; intensity of emission and illumination.

PROFESSIONAL SECTION.

ENGINEERING—APPLIED MECHANICS.

(For all candidates.)

Definitions.

Elasticity :—Elasticity and rigidity. Stress, its nature and intensity. Tensile, compressive, and shearing stresses. Positive and negative senses of a stress. Stresses of uniform and variable intensities. Ultimate strength. Factor of safety.

Tension.

Simple tension :—Work done in stretching a rod. Thin pipes under internal fluid pressure. Strength of prismatic solids under tensile stress when the resultant of applied forces does not coincide with the axis of the solid. Safe tensile co-efficients of various materials.

Compression.

Classification of bars or pillars under compression :—Very short pillars, short pillars, long pillars, very long pillars. Methods of failure of these classes of pillars. Rondolet's, Hodgkinson's and Gordon's formulæ. Euler's formula. Fairbairn's formula for collapsing of tubes under fluid pressure. General remarks on the applicability of the above formulæ. Safe compressive co-efficients of materials usually subjected to a compressive stress : Impact, pile driving.

Transverse Strain.

Proof that the stress at each point varies as its distance from the neutral axis.

Determination of the position of the neutral axis.

Determination of the moment of resistance.

Calculation of moments of inertia of ordinary sections used in engineering construction.

Flanged girders.—Approximate and accurate methods.

Proportion of I beams for equal strength.

Beams of uniform strength.

Bending moments and shearing forces (treated graphically and analytically).

Cantilever under single load at free end.

Cantilever under uniformly distributed load.

Cantilever under uniformly distributed load, and one or more detached loads.

Beams supported at the ends and loaded with detached loads at any point.

Beams supported at the ends and loaded uniformly.

Beams supported at the ends and loaded uniformly, and also with one or more detached loads.

Beams supported at the ends and loaded with a single detached moving load.

Beams supported at the ends supporting an uniformly distributed moving load of length less than the span.

Beams supported at the ends supporting an uniformly distributed moving load of length greater than the span.

Beam supported at the ends and loaded at intermediate points : Conversion of the detached loads into equivalent uniformly distributed load.

Statics of Structures.

Framework loaded at the joints.

Triangular frames :—Diagram of forces for a single traingular frame. Triangular trusses. Cranes and derricks. Sheer-legs and tripods. Effect of the tension of the chain in cranes.

Incomplete frames :—Preliminary ideas. Simple trapezoidal or queen post truss. General case of a furnicular polygon under a vertical load. Suspension chains.

Compound frames :—Compound triangular frames for bridge trusses. Roof trusses in timber. Queen truss for large iron roofs. Diagram of force, in general.

Framework girders :—Warren girders under various loads. N trusses. Bowstring girders.

Girders with redundant bars :—Lattice girders flanged beams.

Deflection of Beams.

Deflection due to the maximum bending moment. General equation of deflection curve. Elementary cases of deflection and slope. Beams propped in the middle. Stiffness of beams. Stiffest beam that can be cut from a circular log.

Shearing.

Distinction between tangential stress and normal stress. Equality of tangential stress on planes at right angles. Tangential stress equivalent to a pair of equal and opposite normal stresses. Web of a beam of I section. Method of computing the intensity of the shearing stress at any point in a bent solid.

Resistance of Prismatic Solids to Simple Torsion.

Explanation of the phenomena of simple torsion.

A circular section, solid or hollow, most favourable form of prismatic solid for resistance to torsion.

Twisting moment. The limiting intensity of the resistance to torsion is that of the shearing stress.

Investigation of the resistance of a circular prism to torsion round its mean fibre.

The strength of axles subject to simple torsion. Values of the limiting intensity of working resistance to simple torsion for different materials.

Diameter of a shaft to transmit a given power.

Blockwork Structures.

Stability at a plane joint. Stability of a series of blocks. Centres of pressure or resistance. Line, polygon and curve of pressures. Line of resistance, or polygon of centres of pressures. Moment of stability.

(For Civil Engineering Branch only.)

Retaining Walls.

Theory of earth pressure. Angle of repose of different soils. Walls supporting a bank of earth with horizontal surface. Surcharged walls. Graphic methods of solution. Determination of the centre of pressure on any joint of a wall supporting a load of earth at its back. Maximum intensity of stress at any joint in a retaining wall. Minimum intensity of pressure. Tensile stress at a joint. Effect of cohesion of mortar. Connection between maximum intensity of pressure on foundation course and power of resistance of earth foundation. Methods of equalising intensity of stress on foundation courses.

Masonry Arches.

Definitions. Curve of pressures and line of resistance. Conditions of stability. Treatment of the weight of loads of different densities. Graphic process of determining the stability and resistance of any proposed arch by drawing the line of resistance. Depth of keystone.

Stability and Resistance of Abutments and piers.

Graphic process of determining the position of resultant pressure on any joint of an abutment. Design of piers.

Stability of foundations of structures in masonry and brickwork.

HYDRAULICS.

(For all candidates.)

General Principles.

Velocity and volume of flow. Principle of continuity. Flow in a stream. Steady and varying motion of streams. Fluid acting on piston. Theorem of Bernoulli. Hydraulic head.

The Flow of Liquids through Orifices.

Application of the theorem of Bernoulli. Velocity of flow due to given head. Co-efficient of velocity. Co-efficient of contraction. Co-efficient of discharge. Co-efficient of resistance. Connection between co-efficients of velocity and resistance. Discharge from large rectangular orifices. Borda's mouth-piece. Co-efficient of contraction for Borda's mouth-piece obtained theoretically. Incomplete contraction. Cylindrical and conical mouth-pieces. Flow-over notches. Triangular notches. Velocity of approach.

Application of results to measurement of flow in streams. Francis' formula. Discharge of measured quantities of water for irrigation purposes. Italian and Spanish modules. Other forms of apparatus answering the same purpose. Discharge under varying head. Jet pump. Separating weirs.

The flow of Liquids in Pipes.

Laws of friction between liquids and surfaces. Froude's and Unwin's experiments. Loss of head due to friction in pipes.

Hydraulic mean depth. Variation of co-efficient with velocity and diameter. Darcys' formula. Hydraulic gradient. Ordinary computations of size of pipes and volume of discharge. Loss of head due to bends, elbows, enlargements, etc.

Impulse and Reaction of water.

Pressure of a jet on a plane surface, fixed or moving. Energy communicated to the moving surface and efficiency of jet. Velocity of surface for maximum efficiency. Resultant pressure on curved surface, direct impulse and reaction. Condition to avoid loss by shock when jet is received. Condition for least loss of kinetic energy when jet is discharged

(For Civil Engineering Branch only.)

Movements of Water in Canals and Rivers.

Mean velocity corresponding to given gradient. Variation of the co-efficient. Velocity at different parts of the section of the stream. Mean velocity in terms of surface and bottom velocity. Ratio of mean to maximum velocity. Forms of section of channel, circular, trapezoidal, egg-profile. Most economical section of channel with given side-slopes. Form of section for a constant velocity with varying discharge.

IRRIGATION AND SANITARY ENGINEERING.

(For candidates in Civil Engineering.)

Well irrigation, Canal irrigation, Inundation canals, Permanent canals, Reservoirs, Distribution of water, Tank irrigation, River inundation and river improvement. Municipal water-supply. Sources of water. Quality and quantity of water, selecting sample for analysis and bacteriological examination. Collection of water—from springs, from wells, from tanks, from rivers. Purification of water. Raising and distribution of water. Intermittent and constant supply.

Drainage and sewerage, surfaces, sewers, flushing, house-drainage, urinals and latrines, disposal of sewage.

ROADS AND RAILWAYS.

(For candidates in Civil Engineering.)

Different classes of roads. Survey, construction and maintenance of metalled and unmetalled roads. Hill roads. Bridges and culverts.

Survey, Location, and Preparation o Railway Project. Construction of Formation and Permanent way. Tunnels and Bridges. Simple Railway appliances. Rolling Stock.

THE PRINCIPLES OF ARCHITECTURAL DESIGN.

(For the Civil Engineering Course only.)

Rise and development of building in pre-classic times.

Influences on subsequent work.

Greek Architecture.—The orders, application, materials and methods of construction.

Roman Architecture.—The orders employed, use in building, the arch, vault and dome. Architectural perspective. Design. The styles arising from the Roman. *Byzantine Architecture*, materials, construction and decoration; Romanesque work in Europe; Saracenic building in the East. *Gothic Architecture*, its rise and development, vaulting. Renaissance Architecture. Design.

MECHANICAL ENGINEERING.

(For all Branches.)

The following course will be taken in a simple manner for the Civil Engineering and Mining Branches; candidates in Mechanical and Electrical Engineering will be expected to possess a more detailed and special knowledge :—

Testing of Material, Mechanical testing of cement, lime, brick, stone, timber, metals.

Boilers.—Heating value of fuels and mechanical equivalent; conditions for economical combustion.

Various types of boiler; their construction and strength. Evaporative power. Management. Fittings. Piping. Feed pumps. Economisers. Superheaters. Boiler trials.

Steam Engines.—Expansion of steam. Steam consumption. Condensation in cylinder. Steam jackets. The Indicator and its uses. Valves and valve gearing. Reciprocating and Turbine Engines. Compounding. Governing. Condensers. Engine Tests.

Internal Combustion Engines.—Fuels used. Principles of action and construction of typical Engines. Ignition. Governing. Starting. Working. Testing.

Hydraulic and Pneumatic Engines.

(*Details of Machinery.*)

Bolts. Nuts. Keys and Cotters. Journals. Crank pins, pivot and collar. Bearings. Axles. Shafting and couplings. Gearing.

Theory of Machines.

(For candidates in Mechanical and Electrical Engineering.)

Types of Mechanism. Virtual centres. Velocity and acceleration diagrams. Gearing. Valve Gearing. Friction. Crank effort. Inertia of moving parts. Balancing. Governors. Fly-wheels. Dynamometers.

The course in Mechanical Engineering will be accompanied by a course of practical work in the Prime Mover, Hydraulic and Mechanical Testing. Laboratories.

ELECTRICAL ENGINEERING.

(For all Branches.)

The following course will be taken in a simple manner for the Civil Engineering and Mining Branches :—

Theoretical.

The Principles of telegraphy and telephony. Electric bells and indicators. Lightning conductors. Dynamo electric machinery, direct and alternate, monophase and polyphase. Types of armatures and field magnets. Reaction of armature and field. Motors; efficiency of motors and generators. Causes of loss of electric energy. Comparison with other systems of transmission of energy. Transformers. Accumulators. Electric Lighting system. Electric welding. Electric deposition of metals.

Practical.

Magnetic elements. Tracing of B. H. curves. Exploration of magnetic fields. Characteristic and magnetization curves of dynamos. Efficiency of dynamos and motors. Measurement of co-efficients of self-induction. Fault testing in electrical circuits. Testing lightning conductors.

Candidates in Mechanical and Electrical Engineering will be expected to possess a more detailed and special professional knowledge of the syllabus laid down for Civil and Mining Branches.

(For the Electrical and Mechanical Branch only.)

The principles, practice and the design of electric lighting installations, the principles of the *art* of illumination. Power distribution both A. C. and D. C. Long-distance transmission systems, transmission line calculations.

Traction. Electric Railways. Electric signalling. Dynamo, alternator and transformer design. Accumulators. Switchboard instruments, direct, single phase and polyphase. High tension system. Methods of testing used by Engineers. Electrical instrument testing.

MINING.

(For candidates in Mining Engineering only.)

Part I.

Geology applied to mining.

Boring by hand and power machines.

Sinking and lining shafts; various methods employed in special cases.

Systems of haulage, underground and above ground; aerial ropeways.

Hoisting; head gear; ropes; safety appliances.

Mining legislation.

Methods of working coal; shaft-pillars, preliminary work and various methods of working the seams. Special reference to thick coal working, as practised in England and different parts of the world.

Shot-firing; coal-cutting by machinery.

Surface subsidence and under-sea working.

Timbering and other supports.

Coal-mine plans and sections; connecting surface and underground surveys.

Prospecting for, and methods of working, mineral veins.

Alluvial mining and open workings.

Hydraulic mining; dredging for gold; ore-beds and deep-leads; overhand and underhand stopping. Hand and power; drilling; blasting; timbering.

Metal mine plans.

Part II.

Descriptive mineralogy; physical properties of minerals; description of various ores and fuels; methods of determination.

Prospecting operations.

Drainage of mines; adit levels; pumping machinery; dams; boring against old workings.

Ventilation of mines; natural and artificial ventilation; spliting and regulating air currents; types of fans; water-gauge and anemometer.

Power application in a mine; discussion of relative merits of steam, water, compressed air, electricity, and oil as sources of applied power.

Description of gases found in coal-mines; colliery explosions; safety lamps; instruments for detecting firedamp; treatment of men overcome by foul air.

Arrangements of surface works at a colliery; sorting and screening coals, coalwashing; briquette making; coking and bye-products.

Surface works of metal mines. Sorting, crushing, sizing, and concentration of various ores. Modern ore-dressing machinery, and slime tables.

Special reference to treatment of gold, silver, copper, lead and zinc.

Cyanide and chlorine treatment of slimes.

DRAWING AND DESIGN.

The written test (*for candidates in Civil Engineering*) will be confined to the preparation of detailed drawings from notes and sketches, as applied to Civil Engineering and Architecture: (*for candidates in Mechanical, Electrical and Mining Engineering*) it will be confined to the preparation of detailed drawings and designs from notes and sketches as applied to machinery and structures relating to these branches.

Practical Test (*for all candidates*).—Attested Drawings and Designs for Engineering Works and Buildings will be submitted for examination. Marks will be allotted for fieldwork and calculations.

9. The order of merit on passing the Bachelor of Engineering Examination shall be determined by the marks obtained in the professional section only.

10. As soon as possible after the Bachelor of Engineering Examination, the Syndicate shall publish lists in order of merit of those who have passed the Bachelor of Engineering Examination in each branch under the conditions laid down in rule 5. They shall also publish lists in alphabetical order of those who have qualified in either group of the non-professional section, showing also the group in which he may yet have to qualify.

11. The pass marks for the B. E Examination shall be one-third in each group of subjects and half of the aggregate for a second class. Two-thirds shall be required for a first class. The candidate who is placed first in the first class in each branch shall receive a gold medal and a prize of books to the value of Rs. 200.

12. Any candidate, who has failed in one subject only, and by not more than 5 per cent. of the full marks in that subject, and has shown merit by gaining 60 per cent. or more in the aggregate of the marks of the examination, shall be allowed to pass.

13. If the Examiners are of opinion that in the case of any candidate not covered by the preceding Regulation, consideration ought to be allowed by reason of his high proficiency in a particular subject or in the aggregate, they shall report the case to the Syndicate, and the Syndicate may pass such candidate.

By order of the Hon'ble Vice-Chancellor and Syndicate.

Sabang Bay—Alteration in Storm Signals.

No. 183 (third publication).—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 471 of 1917), are republished :—

Position.—Penimpuan signal station, lat. 5° 54′ N., long. 95° 19½′ E.

In connection with the new system of storm signals recently brought into use at Indian ports, the former signals made at Sabang from Penimpuan signal station with regard to meteorological information for the Bay of Bengal, have been cancelled, and the following signals are now in force :—

1. No weather disturbances exist in the Bay of Bengal -

2. (*a*) There is a region of squally weather in which a storm may be forming.

(*b*) A storm has formed - - - - - - - -

In order to indicate the position of the disturbances described under paragraph 2 above, the Bay of Bengal is divided into six sections defined as follows:—

I.—Contains the area north of lat. 18½° N.;

II.—Lies south of I.; it is bounded on the south by lat. 13° N. and to the east by long. 88½° E.;

III.—Lies south of I. and east of II.; it is bounded to the south by lat. 13° N. and to the east by a line from the point lat. 13° N., long. 93° E. to Diamond Island together with the Arakan coast, thence up to lat. 18½° N.;

IV.—Lies south of II. and west of long. 86° E.;

V.—Lies east of IV., south of II. and III., and west of long. 93° E.;

VI.—Lies east of III. and V. and including the sea around the Andaman islands.

The following shapes have been allotted to each of the divisions:—

DIVISION	*I.*	*II*	*III*	*IV*	*V*	*VI*
SIGNAL						

The signals denoting position will be hoisted under the signal indicating the disturbance;

Thus if there is squally weather in section V. of the bay the signal

would be hoisted at the various ports; and if a storm has formed in section II. the signal would be hoisted. If the centre of the storm is near the boundary of a division, two locality signals will be given the first indicating the division in which the centre is supposed to be and the second the neighbouring division near to which it is. In the event of a storm centre being near to the angles where three divisions meet, three locality signals will be hoisted The first will give the division in which the storm is supposed to be, the second the nearest adjoining division and the third the remaining division.

The data for these signals will be received at Sabang from the wireless station at Port Blair. Two balls placed vertically will denote that the last weather signal was not received; a request can be made for the last received weather signal by means of flags, Morse signals or wireless. Reply will be made free of charge by means of long distance signals or Morse signals; if the reply is made by wireless the charge will be made through Lloyd's Agents at Sabang at the usual tariff.

New Newchwang Light-vessel placed in position; Characteristics of light and Fog-signal changed.

No. 188 (third publication).—The following Notice to Mariners (No. 636 of 1917), issued by the Coast Inspector, Shanghai, is republished:—

REFERRING to Special Notice to Mariners No. 480, notice is hereby given that on the 25th May 1917 the old *Newchwang* Light-vessel was removed from her station and the new Light-vessel placed in position.

The new Light-vessel is built of steel, is 92 feet in length and 26 feet in beam, and is painted *red*, with the name "NEWCHWANG" on her sides in *white* letters.

The light, which is exhibited from a lantern surmounting a steel tower, is Dioptric, Double Flashing, of the Fourth Order, showing two *white* flashes in quick succession every 10 seconds. The power of the flash is about 18,000 candles.

The light is elevated 35 feet above the sea and should be visible in clear weather at a distance of 11 nautical miles.

In foggy or thick weather an automatic acetylene fog gun will be operated, giving one report every 30 seconds.

If the Light-vessel be driven from her proper station, the usual light will not be shown, but a fixed *red* light will be exhibited at each end of the vessel during the night and a *red* flag hoisted during the day.

REPORT ON THE ADMINISTRATION OF SALT DEPARTMENT IN BENGAL DURING THE YEAR 1916-17.

NOTIFICATION.

No. 1649S.R.—The 27th July 1917.—The following extracts from the Report of the Commissioner of Excise and Salt, Bengal, on the Administration of the Salt Department in the Presidency of Bengal during the year 1916-17 are published for general information.

J. DONALD,
Secy. to the Govt. of Bengal.

No. 2086E., dated Calcutta, the 25th June 1917.

FROM—A. N. MOBERLY, ESQ., I.C.S., Commissioner of Excise and Salt, Bengal
TO—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to submit the following consolidated report on the administration of the Salt Department for the year 1916-17. The report deals with preventive operations in the saliferous districts of the Presidency, which were under the control of the Commissioner of Excise and Salt, and with the importation and issues of salt under the control of the Customs authorities.

2. **Charge of the Department.**—I was in charge of the Department throughout the year.

CHAPTER I.

General.

3. **Credit system of payment of duty.**—From the statement furnished by the Collector of Customs, Calcutta, it appears that securities to the extent of Rs. 55,22,100 were deposited during the year, as compared with Rs. 45,58,800 in 1915-16. The amount of duty debited during the year under the system was Rs. 89,49,431½ against Rs. 87,57,960¼ in the previous year. There were 43 depositors during the year, one of whom closed his account, leaving a balance of 42.

4. **Salt *Golas* at Chittagong.**—The storage capacity was more than sufficient on account of diminished imports. At Moheshkhal the work of raising the floors was completed, and the result has continued to be satisfactory. The average wastage has been 1·06 only as compared with 2·17 before this work was carried out. There was, however, a large wastage in a *gola*, which was cleared after the close of the year.

The Sadarghat *golas* were handed over to the Chittagong Port Commissioners in July 1916 in exchange for the land on which the Moheshkhal *golas* were built. They continued, however, to be worked as before.

The new weigh bridges at Moheshkhal were completed : the first attempt to weigh salt on them proved a failure as the high tides prevailing at the time flooded the steel yard chamber. This has been remedied by the provision of a sluice and subsequent weighments have proved satisfactory.

5. **Consumption of duty-free salt for commercial purposes.**—The quantity of salt delivered free of duty for commercial purposes or on which a drawback of duty was subsequently allowed for the same reason amounted to 8,500 maunds as compared with 13,750 maunds in 1915-16.

6. **Damage to salt.**—There was a flood in September 1916, which caused considerable damage to the salt in store in the godowns of Messrs. Turner Morrison & Co., and Babus Digendra Nath and Moti Lal Pal at Jhalakati. One thousand seven hundred and six maunds in round figures were wasted in excess of the allowable limit.

CHAPTER II.

Stocks, Imports and clearances.

7. **Accounts of stocks and issues.**—The stocks, imports and clearances of salt in and from the ports of Calcutta and Chittagong for the years 1915-16 and 1916-17 are shown below :—

Stocks, Imports, etc.	1915-16.	1916-17.
	Mds.	Mds.
Total of all stocks at the commencement of the year	6,48,173	18,70,788
Total quantity imported during the year	1,41,91,910	1,06,28,404
Excess found in the *golas*	5,972	1,038
Total	1,48,46,055	1,25,00,230
Quantity on which duty was paid during the year	1,23,04,167	1,09,62,942
Quantity which passed free of duty for the manufacture of glazed stoneware, etc.	7,273	2,465
Quantity of non-duty paid salt removed under bond to all inland warehouses ...	5,88,052	5,69,390
Quantity written off during the year for wastage or otherwise	75,775	1,00,695
Total ...	1,29,75,267	1,16,35,492
Balance at the close of the year ...	18,70,788	8,64,738

Both the import and clearance figures show a considerable decrease.

8. **Imports.**— * * * * * * * * The total imports into Calcutta and Chittagong decreased by 22·3 per cent. and 45·6 per cent., respectively. There was an increase in imports into Calcutta from Madras and into Chittagong from Aden whilst 1,021 maunds were received in Calcutta from Tuticorin, against *nil* in the previous year. Imports from all other sources declined, and no German salt was received during the year.

Out of the total importation of 96,90,013 maunds into the port of Calcutta, 69,85,576 maunds or 72 per cent. were bonded in the Sulkea *golas* during the year as against a percentage of 64 in the previous year. The increase was due to the fact that there were no large clearances in February 1917, whereas in the last quarter of 1915-16, a large quantity of salt was cleared from boardship in anticipation of a rise in the rate of duty.

9. **Sales of inported salt from shipboard and bond.**— * * In Calcutta the sales direct from shipboard show a decrease of 42 per cent, and those from bond an increase of 1·9 per cent. In Chittagong the sales direct from shipboard exhibit a decrease of 68·7 per cent. and those from bond an increase of 1·8 per cent. There was a decrease of 9·8 per cent. in the total sales of imported salt. All the vessels carrying salt to Calcutta were steamers.

10. **Transactions in the *golas*.**—The total transactions at the *golas* in Calcutta and Chittagong for the past five years are given below :—

Year.	Calcutta.	Chittagong
	Mds.	Mds.
1912-13	1,89,70,290	23,01,492
1913-14	2,01,32,936	19,52,207
1914-15	1,58,60,486	15,95,103
1915-16	1,55,57,771	17,35,807
1916-17	1,45,87,255	15,24,260

* * * * * *

12. **Inland bonded warehouses.**—There were 11 private bonded warehouses in this Presidency against 9 in the previous year, viz., 2 at Narayanganj (Dacca), 1 at Bhairab Bazar (Mymensingh), 1 at Madaripur (Faridpur), 4 at Jhalakati (Bakarganj) and 3 at Chandpur (Tippera). Two new *golas* were opened at Chandpur. One of the 4 *golas* at Jhalakati was closed during the year. The quantity of salt despatched to these 11 inland warehouses from shipboard and *golas* in the ports of Calcutta and Chittagong was 5,26,790 maunds as compared with 5,22,052 maunds in 1915-16 showing an increase of ·9 per cent. The quantity of salt despatched from shipboard to the bonded warehouses at Chandbali in Bihar and Orissa and at Ajmiriganj in Assam was 6,000 maunds and 36,600 maunds, respectively, against 36,000 maunds and 30,000 maunds in the previous year, showing an aggregate decrease of 23,400 maunds or 35·4 per cent.

* * * * * *

CHAPTER III.

Consumption and prices.

15. **Consumption.**—The total quantity of salt which passed into consumption in this Presidency during the year 1916-17 was 70,76,573 maunds. This is exclusive of 41,73,157 maunds, the net export by rail, road or river, but inclusive of 43 maunds educed from saltpetre.

16. **Prices of salt in Bengal generally.**— * * There was an increase of 6 annas 6 pies in the average as compared with the previous year, which is attributed to the rise in the price of imported salt and to the enhancement of the salt duty in March 1916.

The retail prices in the saliferous districts showed an increase, the price per seer ranging from 1 anna 3 pies to 2 annas 3 pies. The average wholesale price per 100 maunds of Liverpool salt, as sold from ship's side in the port of Calcutta, exclusive of duty, was Rs. 145-9-5 against Rs. 142-8-9 in the previous year. In the ports of Calcutta and Chittagong high prices ruled throughout the year, due to abnormally high freights and lack of tonnage.

CHAPTER IV.

Preventive Measures.

* * * * * *

CHAPTER V.

Financial Results.

20. **Receipts and charges.**— * * * * As compared with 1915-16 receipts show an increase of Rs. 10,37,682, or 8·4 per cent., and charges of Rs. 16,944, or 5·3 per cent. The net revenue was Rs. 1,30,70,723, which was greater than that of the previous year by Rs. 10,20,738, or 8·4 per cent. The increase in the receipts occurred mainly under the head "Import Duty on Salt." The charges do not include any share of the cost of the Customs Preventive Service, which is largely employed in safeguarding the salt revenue.

* * * * * *

CHAPTER VI.

Miscellaneous.

21. **Saltpetre refineries and soda factories.**—There was only one licensed saltpetre refinery at Maniktola, as the license for the refinery at Kakurgachi was not renewed. Two new factories were licensed for the manufacture of sulphate of soda by artificial heat, at Pagladanga and Chingrighata, but the two old factories at Tangra and Pagladanga were closed in the year under review.

The quantity of refined saltpetre produced during the year was 7,534 maunds against 3,139 maunds in the previous year. The increase was due to greater demand for saltpetre on account of the European War. The quantity of salt educed in the process of refinement of saltpetre was 42 maunds as compared with 40 maunds in 1915-16. There was no production of *sitta* (impure salt). Forty-three maunds of educed salt were sold during the year against 60 maunds in the previous year, the duty realized being Rs. 53-12 against Rs. 60 in 1915-16. The license fees realized from the saltpetre refinery and the two factories for the manufacture of sulphate of soda were Rs. 50 and Rs. 4, respectively.

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Summer *Til* Crop of Bengal, 1917-18.

(Note.—On an average of the five years ending 1914-15, the area under til in Bengal has represented some 5·3 per cent. of the total area under til in British India.)

Character of the season.—The weather has been generally favourable for the crop in Western Bengal. In Eastern Bengal, where more than three-fourths of the crop is cultivated, the rainfall was deficient at sowing time. The crop, however, improved through subsequent rainfall. Excessive rain interfered with the harvest operations and caused some damage.

Acreage.—The total area sown this year is estimated at 172,100 acres compared with 170,600 acres last year. (Last year's figure has been altered owing to a revision of the Noakhali estimates in accordance with the Settlement records.)

Outturn.—According to the estimates of District Officers the average outturn of the crop for the Province works out to 70 per cent. of the normal against 67 per cent. last year. Taking the normal yield per acre at 4½ maunds, the gross outturn of the Province is estimated at 18,800 tons against 17,800 tons last year (now revised).

Offg. Director of Agriculture, Bengal.

Murshidabad ...	1,000	1,100	2,000	42	100	February to March. Normal.	June. Normal.	The increase in area is due to timely rainfall. The weather has been favourable and the growth of the crop good. The outturn is normal.
Jessore	3,300	1,200	1,600	58	75	February and March. Normal but late in Narail.	May and June. Normal but late in Narail.	The increase in area is due to favourable weather at sowing time. Subsequently there was heavy rainfall at the harvest time. About three annas of the crop have been damaged owing to continued rainfall from the beginning of June. The outturn has consequently fallen below the normal.
Khulna	4,400	3,500	3,600	77	89	Beginning of February. Normal.	Middle of June. Late.	The increase in area is due to the fact that a portion of land in Khulna thana has been brought under *till* cultivation for the first time this year. The weather was favourable at sowing time but subsequently want of timely rain has retarded the growth of the crop. The outturn has therefore fallen below the normal.
Burdwan	3,800	2,200	2,300	42	75	Latter end of February to middle of March. Normal.	Latter end of May to middle of June. Normal.	The increase in area was due to timely rainfall. DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 30th July 1917.

Summary.—During the week under report moderate to heavy rain fell generally all over the Province. Transplanting of winter paddy continues briskly. Autumn paddy and jute are being harvested in Eastern Bengal. In Western Bengal weeding of the crops is nearly over; harvesting has commenced in places. Condition and prospects of paddy, jute, sugarcane and other standing crops are on the whole good. Damage to the jute crop in varying degrees either by heavy rain, insect-pests or flood is reported from parts of the 24-Parganas, Nadia, Murshidabad, Khulna, Midnapore and Mymensingh. Cattle-disease exists in nine districts. The average price of common rice for the Province has fallen by about 0·7 per cent. as compared with that of the previous week.

ARTICLES OF AGREEMENT made this fourth day of April, One thousand nine hundred and seventeen BETWEEN THE BANK OF BENGAL duly incorporated under the Presidency Banks Act 1876 and having its Head Office at Strand Road in Calcutta with a Branch Office at Chandpur and other places (hereinafter called "the Bank") of the one part and THE SECRETARY OF STATE FOR INDIA IN COUNCIL hereinafter called 'the Secretary of State" of the other part, WHEREAS the Bank has applied to the Government of Bengal to acquire on behalf of the Bank under the provisions of the Land Acquisition Act No. I of 1894 of the Governor General of India in Council (hereinafter referred to as "the said Act") the land described and delineated in the Schedule and plan* hereto annexed and situate and being at Chandpur in the district of Tippera within the Registration district of Tippera subdistrict Chandpur and thana Chandpur for the construction of a Pay Office of the Bank for the convenience of Merchants and Traders there AND WHEREAS

*Not printed and published herewith but may be inspected in the office of the Collector of Tippera.

the Government of Bengal being satisfied by an enquiry held under its order pursuant to section 40 of the said Act that the said acquisition is needed for the purposes of the said Pay Office and will prove useful to the public has consented to the said acquisition pursuant to the provisions of the said Act and has required the Bank under section 41 of the said Act to enter into the Agreement hereinafter contained NOW THESE PRESENTS WITNESS that it is hereby agreed and declared as follows:—

1. The Bank shall and will pay and reimburse to Government within such time as may be fixed and notified to the Bank by the Collector the entire cost of acquiring the said land in accordance with the provisions of the said Act including all compensation damages and expenses which may have been or may be paid or incurred in respect of or on account of such acquisition and all law costs which have been or may be incurred by Government upon or in respect of or incidental to the said acquisition including the costs and expenses of any litigation arising thereout either in the Original or Appellate Courts and also a reasonable proportion of the cost of the establishment and of the salary of the Officer or Officers of Government employed or to be employed by Government in connection with or for the purposes of such acquisition.

2. Upon such payment by the Bank the Secretary of State shall execute and do all such acts deeds matters and things as may be necessary or proper for effectually vesting the said land in the Bank subject to the conditions hereinafter contained.

3. The Bank shall construct upon the said land a permanent building on the said plot of land for such Pay Office as aforesaid and the Bank shall use the said land and the building thereon for the purpose of a Pay Office in connection with the Bank's business at Chandpur and in the district of Chittagong and shall not assign transfer or part with the possession thereof or of any part thereof without the previous consent in writing of the Secretary of State or his officer duly authorised in that behalf first had or obtained.

4. That the said building shall be completed and fit for use within one year from the date when the said land and premises are transferred to the Bank and that the Bank so long as it shall use the said building to be so erected as aforesaid as such Pay Office shall be bound to maintain and keep the same in proper repair and condition.

5. That the public subject to the provisions of the Act and bye-laws for the time being regulating the Bank and the rules framed and to be framed by the Bank from time to time shall be entitled to the use of the said land and the said building for the purpose of availing themselves of the use of the said Pay Office in the ordinary course of business.

6. The Bank shall at any time permit the Local Government or any Officer deputed by the Government in that behalf to inspect the said building whether in the course of construction or otherwise and shall furnish to the Local Government on demand a correct statement of the money expended by the Bank in the construction of the said building upon the said land.

7. In case the Bank shall not erect upon the said land the building referred to in clause 3 hereof within the period mentioned in clause 4 then it shall be lawful for the Local Government at any time within six calendar months after the expiry of the said period to enter upon and to take possession of the said land or any part thereof and the said land shall *ipso facto* vest in the Secretary of State upon the following terms :—

(1) The Secretary of State shall forthwith pay to Bank a sum equal to the amount of compensation awarded under the provisions of the Land Acquisition Act and paid by the Bank for such acquisition including the amount awarded under section 23(2) of the said Act.

(2) The Bank shall be at liberty within 12 calendar months after the said land shall have become so vested in the Secretary of State or within such time as the Local Government shall consider reasonable and shall prescribe to enter upon the said land and pull down remove and carry away all or any buildings erections and other property belonging to the Bank and standing and being upon the said land at the cost of the Bank: Provided that any property of the Bank which may remain on the said

land after the expiry of the said period may be sold by the Local Government either by public auction or otherwise as the Local Government shall think fit and the proceeds of such sale after deduction of the expenses of and incidental to the sale shall be paid by the Local Government to the Bank.

8. If at any time or times any part or parts of the said land not directly utilised by the Bank for the purposes of the said Pay Office of the Bank as aforesaid shall be considered necessary to be possessed by the Government for the revenue administration or for the purposes of the public safety health or necessity (of which the Local Government shall be the sole judge) the Bank shall transfer the said part or parts of the land to the Secretary of State; and the Secretary of State shall pay to the Bank a sum equal to the amount of compensation awarded for the said part or parts of land upon the acquisition thereof for the Bank including the amount awarded in respect of the same under section 23 (2) of the said Act.

Secy. to the Govt. of Bengal.

Press Communiqué.

Dated Simla, the 18th July 1917.

ON account of the great difficulty experienced by officers sent on service to Mesopotamia in obtaining binoculars suitable for field service, His Excellency the Commander-in-Chief issued on the 2nd of June 1917 an appeal to private individuals in India who had suitable binoculars in their possession to give them on loan for issue to officers who cannot otherwise obtain a pair. It was intimated also that Government would be pleased to accept suitable binoculars from persons who desire to offer them as gifts without payment, and arrangements were made for the purchase, on the valuation of the Mathematical Instrument Office, Calcutta, of binoculars from owners who prefer to sell them outright. In response to this appeal, the numbers of binoculars received up to the 14th July is as follows:—

(1) On loan	...	...	159
(2) As gifts	...	...	48
(3) By purchase	...	...	59

The President of the Munitions Board on behalf of the Commander-in-Chief has made separate acknowledgments of the generosity of each donor and lender; but as large numbers of binoculars are still required, the arrangements for receiving them are republished, and the public are again invited to assist His Excellency in providing officers on service with suitable instruments.

Messrs. Lawrence and Mayo, Manufacturing Opticians, Bombay, have kindly offered their services for the examination of binoculars brought to them by residents in Bombay and other cities in which they have branch establishments. The firm will take charge of all suitable instruments and pack and despatch them at their own cost to the Mathematical Instrument Office, Calcutta.

Owners who are willing to give, lend, or sell binoculars are invited, therefore, either to send them to the Officer in Charge, Mathematical Instrument Office, 15, Wood Street, Calcutta, or to deliver them to Messrs. Lawrence and Mayo at their establishments in Bombay, Calcutta, Madras, Delhi, Lucknow, Simla, and Rangoon for despatch to the Mathematical Instrument Office.

When necessary, instruments will be put into good order and repaired by the Mathematical Instrument Office. The names of all persons who send in binoculars on loan will be registered with a view to the return of their property after the war, and, in the case of loss or damage, compensation will be paid on the valuation made by the Mathematical Instrument Office.

All binoculars with a magnification of not less than 3 diameters will be accepted. Suitable telescopes will also be accepted, but opera glasses are not required. The receipts of all instruments will, in future, be published weekly.

NOTIFICATION.

No. 10368P.—The 6th August 1917.—The following is published for general information :—

Extract (paragraphs 1 and 2) from a Resolution by the Government of India in the Home Department, Nos. 2951-64, dated the 18th December 1914, as amended by that Department Resolution Nos. 1286-1299, dated the 15th April 1915, and form of Certificate of Identity.

IN supersession of the orders contained in the Resolution of the Government of India in the Home Department, Nos. 2831-2842, dated the 8th December 1899, the Governor-General in Council is pleased to issue the following instructions with regard to certificates of identity.

2 Every Native of India who contemplates proceeding out of India to foreign countries is strongly urged before leaving to furnish himself with an authoritative certificate of identity, in the form appended to this Resolution, signed by the head of the district (in a Presidency town and in the town of Rangoon, the Commissioner of Police) in the case of residents of British India, and by the Political Officer in that of residents of Native States. In the case of a student the certificate should be signed by the head of his last school or college and countersigned by the District Officer (in a Presidency town and in the town of Rangoon, the Commissioner of Police) or Political Officer, as the case may be.

Appeals for assistance by destitute Indians who desire repatriation, and by students who, owing to embarrassed circumstances, are unable to complete their course of education, cannot be dealt with satisfactorily unless the parties are in a position to produce evidence of identity. The possession of a certificate of identity will be specially useful to young men of good family as it may enable the Secretary of State to obtain for them social and other attentions.

Those who are desirous, however, of travelling in countries where a passport will be necessary are advised to furnish themselves with such a document also before leaving India, in lieu of, or in addition to, a certificate of identity. It should be remembered that no person is entitled to a passport as of right, on the ground that he is a British subject, and the production before authorities outside India of a certificate of identity, unless supplemented by documentary evidence of respectability, is not sufficient to ensure that a passport will be granted.

† Countersignature of the District or Political Officer should be obtained on certificates signed by heads of schools or colleges.

NOTE.—Holders of certificates of identity intending to apply subsequently in England or elsewhere for a passport to visit a foreign country are warned that no person is entitled to a passport as of right on the sole ground that he is a British subject. The production of a certificate of identity, therefore, will not ordinarily be sufficient to secure the grant of a passport, unless it is supplemented by documentary evidence or respectability, endorsed by a local Government or other authority competent to issue passports in India, certifying that the holder is a fit and proper person to receive a passport.

CHAPTER I.

GENERAL RULES.

1. **Certificates of Competency granted to persons who pass requisite Examinations.**—Certificates of Competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed and arrangements have been made for holding the examinations whenever necessary at the port of Calcutta.

2. **How to Apply.**—Candidates for examination must fill up a form of application (form Exn. 3) and pay the appropriate fee at the Port Office. This must be done at least sufficiently early to ensure the form, properly filled in, together with the candidate's Certificate of apprenticeship, testimonials, discharges, etc., being lodged with the Port Officer not later than three days before the day of examination. As discharges and testimonials may have to be verified, it is desirable that they should be handed in, together with the form of application, as many days as possible before the date of the examination which the candidate desires to attend. In the absence of the necessary verification the candidate cannot be examined.

In all cases in which certificates of discharge in the home or other trade which have not been officially issued at a Mercantile Marine Office are produced as evidence of any part of a candidate's qualifying service, they should be submitted to the Port Officer for verification.

3. **Gaps in Service.**—The Examiner should be particularly careful to ascertain that there are no gaps in the candidate's service during which his conduct is not properly accounted for, before he is allowed up for examination.

4. **Calculation of Service.**—The candidate's service, as shown on his discharges, should be reckoned by the calendar month, *i.e.*, the time included between any given day in any month and the preceding day of the following month, both inclusive. The number of complete months from the commencement of the period, ascertained in this way, should be computed, after which the number of odd days should be counted The day on which the agreement commences as well as that on which it terminates should both be included, and all odd days should be added together and reckoned at 30 to the month.

5. **Service must be verified.**—Service which cannot be verified by proper entries in the Articles of Agreement of the ships in which the candidates have served cannot be counted.

6. **Application in Special Cases.**—In cases where the services of a candidate require verification, or where he is in doubt whether his service

complies with the regulations and wishes to submit his case for special consideration, all certificates, discharges and testimonials, together with the form of application,* properly filled in, should be submitted to the Port Officer, who will either deal with the case or transmit it to the Government for decision.

7. **Inquiries.**—All other inquiries regarding examination should be made and dealt with in the same way. The point on which information is sought should be clearly stated, and certificates, discharges, testimonials, etc., should be forwarded when they are material to the inquiry.

8. **Age.**—Should any doubt exist as to the age of a candidate, he will be required to produce a certificate of birth.

9. **Fraud and Misrepresentation.**—It is provided by section 104 of the Merchant Shipping Act, 1894, that any person who makes, assists in making, or procures to be made, any false representation for the purpose of procuring either for himslef or for any other person a Certificate of Competency, shall in respect of each offence be guilty of a misdemeanour, which is punishable, on summary conviction, with imprisonment for a term not exceeding six months, with or without hard labour, or with a fine not exceeding one hundred pounds.

10. **Testimonials: Shore Service.**—All candidates will be required to produce, in addition to the official discharge certificates, testimonials as to their workshop service and as to their service at sea. The testimonials as to workshop service must be signed by the employer, and must testify to the candidate's conduct and ability, and state what kind of work he was engaged on (*e.g.*, fitting, erecting, turning, machine work, etc.) and for how long. (*See* rule 35.)

11. **Testimonials: Sea Service.**—It is desirable that the whole of the candidate's sea service should be covered by testimonials certifying to his sobriety, experience, ability and general good conduct, but in future the usual testimonials will be required for at least the last 18 months at sea preceding the date of the application to be examined. They must be signed by the Master and Chief Engineer, or in the case of testimonials to Chief Engineers, by the Superintending Engineer, and must clearly state whether the applicant was on regular watch and in regular charge of a watch on the main engines or boilers; also, if not engaged on both engines and boilers, the length of time he served on each separately. It is desirable that testimonials of candidates should be endorsed by the Superintending Engineer.

If in any case testimonials appear to have been withheld for improper or inadequate reasons, full particulars should be reported by the Port Officer to the Government.

12. **Further as to Testimonials.**—In cases where a testimonial from the Chief Engineer, or from the Master, is for any sufficient reason not obtainable, one may be submitted from the Superintending Engineer in place of that of the Chief Engineer, and from the Marine Superintendent in place of that of the Master, or from the Managing Owner or Secretary or Chairman of a large Company in place of either or both; but in every such instance the testimonial must declare that the facts stated are in accordance with the reports made by the Chief Engineer or the Master, as the case may be, or else that the facts are within the writer's personal knowledge.

13. **Penalty for Misconduct.**—Candidates who have neglected to join their vessels after having signed Articles, or who have deserted their vessels after having joined, or who have been found guilty of gross misconduct, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Government, after having investigated the matter, should see fit to reduce the time.

14. **Physical Defects.**—When a candidate is observed to be hard of hearing, or is labouring under any other obvious physical defect, the signatories of his testimonials are required to mention that defect specifically, and to state whether it in any way interfered with the efficiency of the candidate as an engineer on watch. When these modified testimonials are such as to completely satisfy the Examiner that the defect is not such as to interfere with the efficient discharge of the applicant's duties as engineer, the examination is proceeded with; otherwise the case is referred to the Government. Candidates afflicted with nervous impediment in speech may write their answers to *viva voce* questions.

* Form Exn. 3 which can be obtained at the Port Office.

15. **Foreign Service.**—The testimonials of service of foreign or British engineers serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country, or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

16. **Foreign Engineers must know English.**—Foreign Engineers must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel. In every case before failing a candidate for insufficient knowledge of the English language the Examiner should refer the matter to the Port Officer.

17. **Issue of Certificate.**—If the candidate passes he will receive a form (form Exn. 16) authorising the Port Officer to whom it is addressed to issue the certificate. The candidate's testimonials and other papers will be returned to him when the examination is finished. It is therefore important that the port at which the Certificate is to be issued should be the same on both the form Exn. 16 and the form of application, Exn. 3 If circumstances should make any alteration necessary, the Examiner should see that it is made in both forms; otherwise delay in the issue of the Certificate may be caused.

18. **Service found to be insufficient.**—If after a candidate has passed the examination it is discovered on further investigation that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, the Certificate will not be granted to him; but if the Port Officer is satisfied that the error in the calculation of the candidate's services did not occur through any fault or wilful misrepresentation on his part, he may either have the fee returned to him or have it placed to his credit. Should his services entitle him to a certificate of a lower grade it may be granted to him, and the difference, if any, between the fee paid by him for the superior Certificate and the fee payable for the inferior Certificate will be returned to him or placed to his credit. The superior Certificate will not be granted until the candidate has performed the amount of service in which he was deficient, and has been re-examined in all the subjects, unless the Government see fit to dispense with the re-examination.

19. **Fee must be paid.**—Candidates for examination, in making their application on the form Exn. 3, will be required to pay the examination fee before any step is taken towards inquiring into their services or testing their qualifications, etc. If the candidate is found not to be qualified, the fee will either be returned to him or placed to his credit until he is qualified.

20. **Payment of Fees, and Penalty for offering Gratuity.**—The fee for examination must be paid to the Port Officer. If a candidate offers a gratuity to any servant of the department, he will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be examined for twelve months, either at the port where the offence was committed or at any other port.

21. **Fees not returned on Failure.**—If a candidate fails in his examination, no part of the fee he has paid will be returned to him.

22. **Table of Fees.**—The fees are as follow:—

	Rs.	A.	P.
Second-class Engineer's Certificate	15	0	0
First-class Engineer's Certificate	30	0	0
First-class Engineer's Certificate, if the candidate holds a Second-class Certificate of Competency granted by the Board of Trade or by the Government of a British Possession under the Merchant Shipping Act	15	0	0

23. **Copy of lost Certificate.**—An applicant for a certified copy of a lost Certificate, either of Competency or Service, must fill in a form of application, Exn. 23, giving the particulars required, and hand it to the Port Officer. A declaration as to the circumstances in which the Certificate was lost must be made by the applicant before a Magistrate.

No fee will be charged.

CHAPTER II.

QUALIFICATIONS REQUIRED FOR THE VARIOUS GRADES.

Ordinary Certificates.

24. **Value of Ordinary Certificates.**—Until January 1st, 1922, ordinary Certificates will entitle the holders to go to sea in the grade certified as Engineers of any vessel in the British Mercantile Marine: after that date they will not be available on ships propelled by internal combustion engines unless endorsed for the purpose. (*See* rule 32.)

25. **Second-class Engineer.**—A candidate for a Second class Engineer's Certificate must not be less than 21 years of age.

(*a*) He must have served as an apprentice Engineer for four years in Europe or five years in India at least, and prove that during the period of his apprenticeship he has been employed in the manner set forth in rule 35.

Journeyman's time will be considered as equivalent to apprenticeship.

Every applicant must produce testimonials of ability as a practical Engineer to the satisfaction of the Port Officer.

If the candidate has served as an apprentice Engineer or as journeyman, under the conditions above prescribed, for less than four years in Europe or five years in India, he will be required to make up the deficiency or to complete the equivalent of four years' European apprenticeship by service as Engineer at sea on regular watch on the main engines or boilers (1) of a foreign-going steamer of not less than 66 nominal horse-power, or (2) of a home-trade steamer of not less than 66 nominal horse-power, such service to be counted as equivalent in the case of (1) to two-thirds, and in the case of (2) to four-ninths, of service as apprentice Engineer or as journeyman.

If the candidate has not served at all as apprentice Engineer or as journeyman, he will be required to have served at sea, in lieu thereof, as Engineer on regular watch on the main engines or boilers, six years in a foreign-going steamer of not less than 66 nominal horse-power, or nine years in a home-trade steamer of not less than that power.

(*b*) In addition to the apprenticeship as above described, or the alternative sea service, the applicant must have served eighteen months at sea as Engineer on regular watch on the main engines or boilers of a foreign-going steamer of not less than 66 nominal horse-power, or twenty-seven months in a home-trade steamer of not less than that power. (*See also* rules 48, 49, 50 and 51.)

(*c*) He must write a legible hand, and have a good knowledge of arithmetic up to and including vulgar and decimal fractions and square root. He must also be able to apply these rules to questions relating to safety valves, coal consumption, consumption of stores, capacities of tanks, bunkers, etc., and other similar problems; and be able to calculate the suitable working pressure for a steam-boiler of given dimensions, and the stress per square inch on crank and tunnel shafts and other parts of the machinery when the necessary data are furnished.

(*d*) He must be able to pass a creditable examination as to the various designs of paddle and screw engines in general use, including turbines; and as to the details of the different working parts, external and internal, and the use of each part.

(*e*) He must have a satisfactory knowledge of the methods of construction of engines and boilers as used in the workshop, and of the attention required by the different parts of the machinery on board ship.

(*f*) He must be able to give a satisfactory description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes and connexions.

(*g*) He must understand the precautions necessary to be taken when raising steam in boilers and when opening stop valves to admit steam to pipes, etc.

(*h*) He must understand how to make good the results of ordinary wear and tear to the machinery, how to correct defects from accident, decay, etc., and how a temporary or permanent repair could be effected in case of derangement or total breakdown.

(*i*) He must understand the use of the water gauge, pressure gauge, barometer, thermometer and salinometer, and the principles on which they are constructed.

(*j*) He must be able to state the causes, effects, and usual remedies for incrustation and corrosion.

(*k*) He must be able to explain the methods of testing and altering the setting of the slide valves, and the methods of testing the fairness of shafts and adjusting them.

(*l*) He must understand the construction and working of evaporators, feed filters and feed heaters.

(*m*) He must understand the construction and working of centrifugal, bucket and plunger pumps, and the principles on which they act,

(*n*) He must understand the construction and working of steering engines, electric light engines and dynamos, electric motors, refrigerating machinery, hydraulic machinery, and such internal combustion engines as are used to drive ships' launches, emergency and auxiliary machinery on board ship.

(*o*) He must possess a creditable knowledge of the prominent facts relating to combustion, heat and steam.

(*p*) He must be able to take off and calculate indicator diagrams and understand the distribution of the steam in the cylinder as shown thereby.

(*q*) He must be able to make a dimensioned working sketch or drawing of some simple part of the machinery.*

26. **First-class Engineer.**—A candidate for a First-class Engineer's Certificate must be not less than 22½ years of age.

(*a*) He must—

(1) have served at sea for 18 months, with a Second-class Certificate of Competency or Service, on regular watch on the main engines or boilers of a foreign-going steamship of not less than 99 nominal horse-power, as Senior Engineer in charge of the whole watch (*see* rule 40) ; or

(2) have served at sea for two years and three months, with a Second-class Certificate of Competency or Service, as First Engineer of a home-trade steamer of not less than 99 nominal horse-power; or three years with a Second-class Certificate of Competency or Service as Second Engineer of a home-trade steamer of not less than 99 nominal horse-power ; or

(3) have served three years and nine months with a Second-class Certificate of Competency or Service as Third or Fourth Engineer of a home-trade steamer of not less than 99 nominal horse-power, and during the entire period have been the Senior Engineer in charge of the whole of a watch on the main engines and boilers (*see also* rules 48, 50 and 51); or

(4) possess, or be entitled to, a First-class Certificate of Service.

(*b*) He will be required to show a superior knowledge of all the subjects specified in the preceding paragraph [clauses (*c*) to (*q*) inclusive].

(*c*) His knowledge of arithmetic must include the mensuration of surfaces and solids and the extraction of square and cube roots, and the application of these rules to questions relating to the power, duty and economy of engines and boilers, and to the stresses in the rods, shafts and levers of the engine. He should also be able to calculate the effect of the application of the lever, pulley, inclined plane, and other mechanical powers.

(*d*) He will be required to make an intelligible hand sketch, or a working drawing, of one or more of the principal parts of a steam-engine, boiler or other part of the machinery, and to mark upon it all the necessary dimensions in figures, so that the sketch or drawing could be worked from.*

* *See* Appendix G.

(*e*) He must be able to calculate safety-valve pressures and the strength of the boiler shell and riveting, and of the furnaces, flat surfaces and stays.

(*f*) He must be able to state that the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct stress, the torsional stress, and the bending stress in round bars, and the direct stress and the bending stress in rectangular bars, with given loads.

(*g*) He must be able to take off and calculate indicator diagrams, and to recognise and know how to correct defects in the working of the engine caused by a faulty distribution of the steam in the cylinders as shown thereby.

(*h*) He must be able to explain the method of testing and altering the setting of the slide valves, and to sketch approximately the difference any alteration in the slide valve will make in the indicator diagram.

(*i*) He must be conversant with the principles and practice of surface condensation, superheating, and the working of steam expansively.

(*j*) He must understand the construction and working of, and be able to maintain in working condition, the auxiliary machinery which may be placed under his charge, viz., refrigerating machinery, electric light engines and dynamos, electric motors, hydraulic machinery, the various descriptions of steering engines, and internal combustion engines as used in launches and for auxiliary and emergency machinery on board ship, etc.

(*k*) He must know how to provide against defects and breakdowns of the machinery, and be able to direct and carry out any ordinary repairs that may be required either to the engines or the boilers.

27. **First-class Certificates without Second.**—The Government may see fit to allow an applicant who, in consequence of service abroad, has had no opportunity to obtain a Second-class Certificate, to be examined for a First-class Certificate, although he does not possess a Certificate of the lower grade, provided he is able to satisfy them as to the satisfactory character of his services; but these must be ample both as regards length and experience. As a rule, at least four years' sea service, a fair proportion of which must have been in a responsible capacity and qualifying for a First-class Certificate, will be required.

If any such candidate fails to pass the examination for the First-class Certificate, but passes that for the lower grade, he may be given a Second-class Certificate of Competency, but no part of the fee will be returned. If he fails in practical knowledge, he may be re-examined for a Second-class Certificate only, subject to the usual regulations relating to such failures.

This rule applies equally to Motor Engineers' Certificates. (*See* rule 31.)

CERTIFICATES FOR ENGINEERS OF SHIPS PROPELLED BY INTERNAL COMBUSTION ENGINES (MOTOR CERTIFICATES).

28. **Value of Motor Certificates.**—These certificates will entitle the holders to go to sea in the grades specified as Engineers of any vessels in the British Mercantile Marine propelled by internal combustion engines using oil, spirit, gas or other similar substance as fuel, but are not available for service in steamships except when endorsed as hereinafter provided.

29. **Second-class Motor Engineer.**—A candidate for a Second-class Motor Certificate must not be less than 21 years of age.

(*a*) He must have served for at least four years in Europe or five years in India as an apprentice or journeyman Engineer. Not less than two years in Europe or three years in India of this service must have been spent at fitting, erecting or repairing internal combustion engines. The remaining two years may be occupied on the same kinds of work, or spent at an approved technical school, or in work on internal combustion engines at one of the other branches of the trade named in rule 35, with the allowances specified therein.

Service as journeyman will be considered as equivalent to apprenticeship, but no time served before the age of 15 is reached will be accepted.

Workshop service other than the above may be accepted if it is considered useful training for a Motor Engineer, but all such cases must be

submitted to the Examiner of Engineers for consideration before the candidate is examined, and at least an additional three months of qualifying service on marine internal combustion engines, either in the works or on regular watch in the main engine-room of vessels propelled by these engines, must have been performed in respect of each twelve months of workshop service of this nature, or other than on the making or repairing of internal combustion engines, so accepted. If the service is not altogether satisfactory, a longer additional period than that specified may be required.

Any deficiency in the requisite four years' workshop service in Europe or five years in India may, as in the case of the ordinary Engineers' Certificates, be made up by service at sea on regular watch in the main engine room of a vessel of not less than 500 indicated horse-power or 373 brake horse-power propelled by internal combustion engines. If the vessel is a foreign-going vessel one and a half times the period of deficiency must be served, and if a home trade vessel two and a quarter times the period of deficiency will be required. Thus a candidate who has no workshop service must put in six years in a suitable foreign-going vessel or nine years in the home trade in lieu of his apprenticeship.

Until January 1st, 1922, workshop service in works where steam-engines, boilers, etc., are made or repaired will be accepted as qualifying, as regards service, for a Motor Certificate.

(*b*) In addition to the workshop service as above described, or the alternative sea service, the candidate must have spent 18 months at sea as Engineer on regular watch on the main engines of a foreign-going ship propelled by internal combustion engines of not less than 500 indicated horse-power or 373 brake horse-power, or 27 months in a similar home trade vessel. (*See also* rules 48, 49, 50 and 51.)

(*c*) He must write a legible hand and have a good knowledge of arithmetic up to and including vulgar and decimal fractions and square root. He must also be able to work out questions relating to spring or lever-loaded safety and relief valves; consumption of oil and stores; capacities of tanks, bunkers, etc.; speed of vessel, and other similar problems; and be able to calculate suitable working pressures for air receivers of given dimensions, and the stress per square inch on crank and tunnel shafts and other parts of the machinery when the necessary data are furnished.

(*d*) He must be able to give a clear explanation of the principles on which oil, gas or other internal combustion engines work, including the methods of ignition, to point out the differences between them, and to show by means of illustrative sketches and otherwise that he understands the details of the construction of those in general use.

(*e*) He must be familiar with the various methods of supplying air and fuel to the cylinders in the different types of engines, the construction of the apparatus for carburetting, atomising, or gasifying the fuel, and the means for cooling the cylinders, pistons, etc.

(*f*) He must have a satisfactory knowledge of the processes employed in the construction of internal combustion engines in the workshop, and of the methods used in fitting the machinery on board ship.

(*g*) He must know what attention is required by the various parts of the machinery, and understand the use and management of the different valves, cocks, pipes and connections.

(*h*) He must be able to state and describe the chief causes which may make the engine difficult to start and to explain how he would proceed to remedy any defects arising therefrom. He must also be able to show that he understands the mechanism of the starting and reversing arrangements, and is competent to deal with defects therein.

(*i*) He must understand how to make good the results of ordinary wear and tear to the machinery; how to test the fairness of shafting, etc.; how to correct defects from accident, decay, etc.; and how a temporary or permanent repair could be effected in case of derangement or total breakdown.

(*j*) He must understand the construction of the pressure-gauge, barometer, thermometer, and other instruments used in the engine-room, and the principles on which they work.

(*k*) He must understand the construction and working of centrifugal, bucket and plunger pumps, and the principles on which they act.

(*l*) He must understand the construction and working of air compressors, gas producers, steering engines, electric light engines and dynamos, electric motors, refrigerating, hydraulic and other auxiliary machinery found on board ship.

(*m*) He must possess a good working knowledge of the construction and management of the auxiliary steam boilers and machinery, and be familiar with the prominent facts relating to combustion, heat and steam.

(*n*) He must be familiar with the nature and properties of the various oils, etc., generally used in internal combustion engines; must understand what is meant by the "flash point"; and have a knowledge of the explosive properties of gas or the vapour given off by these oils, etc., when mixed with definite quantities of air; and be thoroughly conversant with the danger of exposing such gas or vapour to a naked light, or of allowing any leakage from the oil tanks, particularly into the vessels, bilges, and unventilated spaces, or from gas producers, pipes, vaporizers, etc.

(*o*) He must thoroughly understand the precautions to be taken against fire or explosion from oil or gas, and know how to deal with fire should it break out. He should also be familiar with the action of wire gauze diaphragms when placed in pipes and connections to oil tanks, etc., for the purpose of preventing the explosion or ignition of oil vapour therein.

(*p*) He must be able to explain the principle, construction and arrangement of primary and secondary batteries and induction coils, so far as is necessary for the efficient management of an oil-engine.

(*q*) He must be able to take off and calculate indicator diagrams and understand the action of the gas in the cylinder as shown thereby.

(*r*) He must be able to make a dimensioned working sketch or drawing of some simple part of the machinery.*

30. **First-class Motor Engineer.**—A candidate for a First-class Motor Certificate must not be less than 22½ years of age.

(*a*) (1) He must—have served at sea for 18 months with a Second-class Motor Engineer's Certificate on regular watch on the main engines of a foreign-going ship propelled by internal combustion engines of not less than 750 indicated horse-power or 560 brake horse-power as Senior Engineer in charge of the whole watch, or have been the second senior in a watch of three, or third senior in a watch of six or more Engineers and have been in responsible charge of a definite section of the main machinery; or

(2) have served at sea under similar conditions in a similar home trade vessel for two years and three months as First Engineer, or three years as Second Engineer, or three years and nine months as Third or Fourth Engineer. (*See also* rules 48, 50 and 51.)

(*b*) He will be required to display a superior knowledge of all the subjects specified in rule 29 [clauses (*c*) to (*r*) inclusive].

(*c*) His knowledge of arithmetic must include the mensuration of surfaces and solids and the extraction of square and cube roots, and the application of these rules to questions relating to the power, duty, and economy of engines, and to the stresses in the rods, shafts, and levers of the engine. He should also be able to calculate the effect of the application of the lever, pulley, inclined plane, and other mechanical powers.

(*d*) He will be required to make an intelligible hand sketch or a working drawing of one or more of the principal parts of an engine or other part of the machinery, and to mark upon it all the necessary dimensions in figures, so that the sketch or drawing could be worked from.*

(*e*) He must be able to state the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct stress, the torsional stress, and the bending stress in round bars, and the direct stress and the bending stress in rectangular bars, with given loads.

(*f*) He must be able to take off and calculate indicator diagrams, and to recognise and know how to correct defects in the working of the engines caused by a faulty distribution of the gas in the cylinders, as shown thereby.

(*g*) He must be able to explain the effects of altering the points of opening and closing the various valves, and to sketch approximately the difference any alteration in the action of the valves will make in the indicator diagram.

* *See* Appendix O.

(*h*) He must understand the construction and working of, and be able to maintain in working condition, the auxiliary machinery which may be placed under his charge, viz., air compressors, refrigerating machinery, electric light engines and dynamos, electric motors, hydraulic machinery and the various descriptions of steering engines, etc.

(*i*) He must know how to provide against defects and breakdowns of the machinery, and be able to direct and carry out any ordinary repairs that may be required either to the main engines or to the auxiliary steam or other machinery.

(*j*) He must know how the flash-point of an oil is ascertained, and be capable of determining that of any sample experimentally if the necessary apparatus is provided.

31. **First-class Motor Certificates without Second.**—Rule 27 applies equally to Motor Certificates. *Until January 1st*, 1922, the holder of a Second-class Ordinary Certificate may be examined for a First-class Motor Certificate without previously obtaining a Second-class Motor Certificate, provided that he proves that he has served for at least 18 months at sea in a capacity qualifying for First-class in a suitable motor vessel and can satisfy the Port Officer as to the general sufficiency of his experience of marine internal combustion engines either in the works or at sea.

This permission will carry with it exemption from all the requirements as to workshop service and all other requirements which a candidate for a Second-class Motor Certificate has to comply with, but particulars of all such cases must be submitted to the Chief Examiner of Engineers before any such candidates are allowed to be examined for a First-class Motor Certificate.

32. **Endorsement of Certificates.**—The holder of an Ordinary Certificate may have it endorsed to the effect that he is competent for service in a motor ship, provided that he complies with the conditions specified for a Motor Certificate of the grade required and passes the appropriate examination. The holder of a Motor Certificate may also have it endorsed for service in steamships on corresponding terms.

Until January 1st, 1922, the holder of a First-class Ordinary Certificate may have it endorsed for service in motorships if he can prove at least 18 months' sea service in motor ships in a qualifying capacity, and can satisfy the Port Officer as to the general sufficiency of his experience of marine internal combustion engines either in the works or at sea and provided that he passes the appropriate examination. Every such case must be submitted to the Examiner of Engineers before the candidate is examined.

33. **Notice Required.**—Intending candidates should, where possible, give at least a week's notice of their intention to sit for a Motor Certificate

34. **Suspension of Issue of Home-Trade Motor Certificates.**—The issue of Second-class Certificates for Engineers of Home Trade Passenger Ships propelled by oil-engines is now suspended.

35 **Workshop Service.**—The workshop service of a candidate for an Ordinary Certificate must have been performed in works where steam-engines, boilers, etc., are made or repaired. The workshop service of a candidate for a motor Certificate must have been performed in works where internal combustion engines are made or repaired. No time served before the age of 15 will be counted.

Not less than two years of the apprentice time in Europe or three years in India must have been spent at fitting, erecting or repairing engines and machinery either in the works or outside. The remaining two years may be made up of time spent in engine works at fitting, erecting or repairing engines and machinery, or at one of the other branches of the trade given below, or at an approved technical school (*see* Appendix II); the time so spent to count as follows:—

Fitting, erecting, repairing or turning.	Full time.
Working in drawing office ...	Full time up to one year, and beyond one year one-half time.
Pattern-making	One-half time with a maximum allowance of one year.
Planing, slotting, shaping and milling.	One-third time.

Boiler-making or repairing	...	One-half time.
Smith work ...	...	One-half time with a maximum allowance of one year.
Coppersmith work ...	...	One-third time with a maximum allowance of six months.

In the event of the apprentice time being extended to five years in Europe or six years in India or more, four years at turning *followed* by one year in Europe or two years in India at fitting or erecting may be accepted as qualifying.

This Rule applies only to works at which the making and/or repairing of engines, boilers, etc., forms part of the regular business for which the works exist. Service at works where the repairing of engines, boilers, etc., is merely incidental to the running of plant, however large, which is used for the production of power for other machinery, etc., should be dealt with under rule 36, each case being considered on its merits.

36. **Workshop Service other than the above.**—Workshop service other than the above may be accepted if it is considered useful training for an Engineer, but every such case must be submitted to the Examiner of Engineers for consideration before the candidate is examined. For each twelve months of such service accepted the candidate must have performed at least an additional three months' service on marine engines (steam-engines for an Ordinary Certificate and internal combustion engines for a Motor Certificate) either in the works or on regular watch in the main engine room or on day work at sea. If the service is not altogether satisfactory a longer additional period than that specified may be required, but if a portion only of the apprenticeship has been spent on work other than that specified in rule 35, the additional service named above will only be required in respect of that portion.

This rule applies to service on internal combustion engines by a candidate for an Ordinary Certificate and to service on steam-engines by a candidate for a Motor Certificate. *Until January 1st*, 1922, however, workshop service in works where steam-engines, boilers, etc., are made or repaired will be accepted as qualifying for a Motor Certificate.

37. **Service in Colonial and Foreign Workshops.**—Rules 35 and 36 apply to service in the United Kingdom and India only. Service in a Colonial or foreign workshop will not be accepted unless the Examiner is satisfied in each case that its value is substantially equivalent to that of service performed in the United Kingdom and India. In cases where the Examiner is not satisfied that the value is equivalent, he will refer the matter for decision.

Workshop service in India is in no case to be taken as equivalent to more than four-fifths of the same period of service in the United Kingdom.

38. **Technical Schools.**—Time spent after the age of 15 at a technical day school (recognised by the Government as suitable), where there is an engineering laboratory, may be taken into account and accepted as equivalent to artisan service, usually at the ratio of three years in the technical school to two in artisan service, provided that the applicant has taken the full engineering course and can produce the Principal's certificate for regular attendance at all the approved classes and for satisfactory progress; and provided also that the remaining portion of the time has been spent in works where engines, boilers, etc., are made or repaired, in accordance with the scale of values indicated above.

Time spent in attending evening classes in Engineering at approved technical schools will similarly be allowed to count under the following conditions:—

(1) Each candidate claiming an allowance for time spent in attending evening classes at a technical school must produce a certificate signed by the Principal of the school to the effect that he has attended regularly at a definite class or classes, which should be specified, and has made satisfactory progress. This certificate must also state the total number of hours spent by the candidate in attending each class

(2) Time spent by the candidate in attending such classes as have a direct bearing on the training of a Marine Engineer will be reckoned at the rate of five hours to one day. The total number of days so obtained will then be accepted in lieu of a certain

fraction of the same period of workshop service. This fraction will be fixed for each school at the time of approval, and will generally be two-thirds.

(3) A candidate who has attended a technical school in the evening, while being employed as an apprentice or journeyman Engineer during the day, must, in order that the school time may be accepted, produce satisfactory proof that he has spent the full working day in the works at which he is employed, before attending the school. Such proof will usually take the form of a statement in the testimonial as to workshop service given by the employer.

(4) Allowance will only be given for classes attended after the candidate has reached the age of 15.

Time spent in foreign technical schools can in no circumstances be recognised.

For list of approved technical schools and time allowed for attendance at each *see* Appendix H.

39. **Sea-service.**—The sea-service required by these Regulations is, unless otherwise stated, service performed in foreign-going ships of at least the horse-power specified for the respective grades of Certificate. The nominal horse-power, as given on the Certificate of Registry of a steamship, may in all cases be accepted by the Examiners.

Service in a qualifying capacity in a motor ship (of the horse-power required in the case of Motor Certificates) may be accepted as forming part of the 18 months' sea-service in steamships required for an ordinary First-class or Second-class Certificate, an allowance of half the time so served being given with a maximum allowance of 6 months. Qualifying service in steamships of the required horse-power will be accepted on similar terms as part of the sea service required for a Motor Certificate.

40. **Qualifying Service defined.**—In the case of candidates for First-class Certificates qualifying service means, as a rule, service on regular watch on the main engines or boilers as Senior Engineer in charge of the whole watch. When, however, three or four Engineers are on watch at the same time the service of the two seniors may be allowed to count, and when not less than six Engineers are on watch together that of the three seniors, provided a certificate from the Superintending Engineer is produced stating the number of Engineers on watch, the rank held by the applicant and that he was in charge of a watch on a definite section of the main engines or boilers During the whole of the period claimed, candidates must have been in possession of Second-class Certificates.

In the case of candidates for Second-class Certificates qualifying sea service means service as Engineer on regular watch on the main engines or boilers. In no case will time spent in clerical or day work be allowed to count as sea service.

All candidates for Ordinary Certificates, including those for First-class who have not been in charge of the whole of a watch but qualify under this paragraph as the second or third senior of the watch and have been in charge of a section of the machinery only, will be required to have served at sea on regular watch on both the main engines and the boilers, not less than six months being spent on each.

41. **Further as to Qualifying Service.**—Only such service as gives the experience required to make a man thoroughly competent as a sea-going Engineer is accepted as qualifying service Even for a Second-class Certificate the candidate must prove to the satisfaction of the Examiner that he is qualified by experience and knowledge to act as Chief Engineer in an under-powered vessel on a voyage, say, from India to Egypt, taking full responsibility for engines, boilers and machinery.

42. **Marine Technical Schools.**—A candidate for either a Second-class or a First-class Ordinary or Motor Certificate, who, within two years from the date of application to be examined, has attended an approved course comprising general mathematical and scientific instruction at a technical school recognised by the Government as suitable for the training of *Marine* Engineers, will be allowed to count time so spent as equivalent to sea service in the ratio of three months at the technical school to two months at sea. Time so spent cannot be accepted as equivalent to more than one-sixth of the total sea service required for either Certificate, but a candidate who has been allowed to count such time on examination for a Second-class Certificate,

will not be debarred from counting similar subsequent time on applying for examination for a First-class Certificate.

In every case in which an allowance is made for time spent at a marine technical school, the candidate will be required to produce the Principal's certificate for continuous and regular attendance at all the approved classes and for satisfactory progress.

The candidate must also produce his class note-books, which will be forwarded to the Examiner of Engineers, in order that he may satisfy himself that the candidate has followed the approved course of instruction, and that the remission of sea service claimed may be allowed accordingly.

Application for examination of candidates claiming remission of sea service should, as a rule, be made at least a week before they desire to sit.

A list of the marine technical schools recognised for this purpose is given in Appendix H.

43. **Recognition of Study by Engineers interned in Germany and elsewhere.**—The Government will accept time spent by a candidate for a First-class or Second-class Ordinary or Motor Certificate in attending courses of lectures or classes at Ruhleben or other internment camp in lieu of a portion of the sea service required to qualify him for the Certificate, subject to the following conditions :—

(1) If nine hours a week are spent in attending lectures or classes, five weeks spent in this way will be accepted in lieu of one week's sea service. If eleven hours a week are spent in this way, four weeks will be accepted as one week's sea service. In no circumstances can a remission of more than three months' sea service be made.

(2) The lectures must form part of a definite course of study which may be regarded as useful training for a Marine Engineer.

(3) The candidate must produce a certificate, signed by the Lecturer or by some other recognised Officer of the camp, that he has attended regularly and has profited by the instruction given. If possible, the candidate should also produce his note-books.

Every case in which an allowance is claimed under this Rule must be submitted to the Examiner of Engineers.

44. **Foreign Engineers.**—Foreign Engineers cannot be examined for a First-class Certificate unless they have performed the sea-service stated in rules 26 and 30, respectively, with the requisite British Certificate. The service may have been performed in foreign vessels if the candidate can produce satisfactory testimonials as to conduct and character, and is able to prove that the service has been in the required capacities, and that during the period of service he has held a British Certificate of Competency of the rank required by these rules. (*See* rule 15.)

45. **Names on Articles.**—In all cases the candidates' names must have been duly entered on the ship's Articles as Engineers in their proper ratings.

46. **Regular Watch.**—Being on regular watch means being on watch for at least eight hours each day.

47. **Home-trade Service.**—Service in the home or coasting trade is regarded as being equivalent to two-thirds of the same period of time served in the foreign trade except where other allowances are specified [*see* rules 26 (*a*) (2), and (3), 30 (*a*) (2), 48, 50 and 51]. Also except in the case of Indian coasting voyages extending beyond a distance of 500 miles from the port of departure in steamships commanded by masters holding foreign-going certificates, when such service will count as foreign-voyages, and will be reckoned as full time ; but the time spent in the port of departure or Home port will not be allowed to count. In all cases the length of service is deemed to commence on the date of sailing from the port of departure or Home port and to end on the date of arrival at the Home port. Such service must be vouched for in the form laid down in Appendix J.

48. **Lake or River Service.**—Service as watch-keeper on a lake or river vessel of not less than the required horse-power may be accepted under the following conditions for either an Ordinary or a Motor Certificate :—

(*a*) the service will only count half as much as sea service, *i.e.*, every two months of lake or river service is only equivalent to one month's foreign-going sea service ;

(*b*) candidates for Second-class Certificates must prove that, in addition to lake or river service, they have had at least three months' qualifying service at sea in a foreign-going ship of not less than the horse-power specified in rules 25, and 29 or four and a half months' similar service in the home trade ;

(*c*) candidates for First-class Certificates in addition to lake or river service in vessels of not less than the horse-power named in rules 26 and 30 must prove that they have had at least six months' qualifying service at sea, with a Second-class Engineer's Certificate, in foreign-going vessels of not less than the horse-power specified, or nine months' similar service in the home trade.

49. **Service in Auxiliary Screw Ships.**—Service as Engineer performed on board auxiliary screw whalers and other vessels with auxiliary power of not less than that required for a Second-class Certificate may be allowed to count as qualifying for examination for a Second-class Engineer's Certificate to the extent of one-half the time the vessel is actually at sea. If the candidate is able to prove that the main engines were running for longer than this, he will be allowed to count the whole of such extended time.

50. **Service in Dredgers, Fishing-boats, Tug-boats, or Pilot-vessels.**—Service in sea-going dredgers, fishing-boats, or tug-boats, and in sea-going pilot-vessels when on their station or when going to or returning from the same, may be accepted under the following conditions :—Two months of such service is only equivalent to one month's qualifying service in a foreign-going vessel. Candidates for Second-class Certificates may perform all their sea service in sea-going dredgers, fishing-boats, tug-boats, or pilot-vessels, but they must have been on regular watch on the main propelling machinery and the horse-power of the vessels must not be less than that required. Candidates for First-class Certificates must, while in possession of a Second-class Certificate, have served in vessels of at least the horse-power named in rules 26 and 30, and have been in charge of the whole of a watch on the main machinery. They must also have served in a qualifying capacity for not less than six months in a foreign-going ship, or nine months in a home-trade ship. This rule will not apply to service on the steam pilot-vessels at the Sandheads. Service on the regular watch on board such vessels for the period the vessels are on the station, or when going to or returning from the same, shall be accepted as equivalent to two-thirds of the time performed in foreign-going trading vessels, as in the case of steam yachts.

Where an Engineer is employed on a fishing or other vessel and is required to do stoking or other work not usually performed by an Engineer in the Mercantile Marine, such service cannot be accepted as qualifying.

The Port Officer will in all cases satisfy himself that service on fishing boats, when claimed as qualifying for a certificate as Engineer, is of a similar nature to that performed by Engineers in the Mercantile Marine.

51. **Service in Yachts.**—Service performed in yachts, either within or beyond home-trade limits, may be accepted as equivalent to two-thirds of the time performed in foreign-going trading vessels, provided that the candidate's name is entered on the vessel's Articles, and that he can prove, to the satisfaction of the Examiner, that the time claimed was actually served at sea.

Candidates for Second-class Certificates may perform all their service in yachts, but the candidate must have been on regular watch on the main machinery, and the vessel must be of not less than the horse-power stated in rules 25 and 29.

Candidates for First-class Certificates must have served on vessels of the requisite horse-power, and must have been in regular charge of the main machinery. They must also have served for at least three months in a qualifying capacity on board a suitable foreign-going ship. This additional service will, however, not be required in the case of a candidate who has served for 27 months as First Engineer, or for three years as Second Engineer, of a yacht of the requisite power.

52. **Certificates of Service.**—An officer who has attained the rank of Engineer Lieutenant or Engineer Sub-Lieutenant in His Majesty's Navy, or the rank of Engineer or Assistant Engineer in the Royal Indian Marine, is entitled without examination, if an Engineer Lieutenant or Engineer, to a Certificate of Service as First-class Engineer, and if an Engineer Sub-Lieutenant or Assistant Engineer, to a Certificate of Service as Second-class Engineer. These officers may be examined for a Certificate of Competency on the same conditions as Engineers of the Mercantile Marine.

An officer who has attained the rank of Chief Artificer Engineer in His Majesty's Navy is also entitled without examination to a Certificate of Service as Second-class Engineer.

53. **Examination of Engine-room Artificers.**—Artificer Engineers, Chief Engine-room Artificers, Engine-room Artificers, and Mechanicians in the Royal Navy may be examined for Certificates of Competency on the same conditions as Engineers of the Mercantile Marine.

54. **Application by Naval Officers.**—The Lords Commissioners of the Admiralty have directed that applications from officers of the Navy for Certificates of Service or for permission to be examined for Certificates of Competency must, in the case of officers on the active list, be made through the Commanding Officer to the Secretary to the Admiralty, and in the case of officers who are on half-pay or who have retired, direct to the Secretary to the Admiralty, who in either case will forward the applications to the Port Officer.

It is not necessary for applications of Chief Engine-room Artificers and Mechanicians, who have left the Royal Navy and who desire to be examined for Certificates of Competency as Engineers in the Mercantile Marine, to be forwarded either through their Commanding Officers or through the Admiralty. Men who are still serving in these ratings in the Royal Navy should make their applications through their Commanding Officers.

Artificer Engineers, however, being Warrant Officers, should make their applications in the same manner as that laid down for other officers of the Royal Navy.

55. **Masters' and Mates' Examination in Steam.**—Particulars of the examination of Masters and Mates in steam will be found in Appendix E.

56. **Certificates.**—The term "Certificate" in these regulations means a Certificate issued by the Board of Trade, or by a British Possession under Order in Council in accordance with section 102 of the Merchant Shipping Act, 1894. A list of the Colonial Certificates issued under Order in Council is given in Appendix F; and the holder of a Certificate so issued must not be examined in the United Kingdom for a Certificate of the grade already held.

57. **Colonial Local Certificates.**—The holder of a Colonial Certificate of Competency not granted under the Merchant Shipping Act, or of a Certificate granted after examination on board one of His Majesty's ships, who wishes to be examined for a Government Certificate of the same grade, must prove that he has performed the amount of service required by these regulations for that grade, and complied with the conditions laid down as to testimonials.

All Colonial Certificates of Competency, whether local or issued under Order in Council, must be given up before a further Certificate is issued by the Government of Bengal.

CHAPTER III.

CONDUCT OF THE EXAMINATIONS.

58. **Commencement and Duration of Examinations.**—The examinations will, as a rule, commence at 10-30 A.M., and will be continued from day to day until all the candidates are examined.

59. **Candidates to be Punctual.**—Candidates are required to appear at the examination room punctually at the time appointed.

60. **Tables to be cleared.**—Before commencing the examination, the tables and desks must be cleared of all scraps of paper, or books that are not used in the examination, and care should be taken that the candidates while in the examination room do not have in their possession any book or paper.

61. **Strangers not admitted.**—No persons will be allowed in the rooms during the examinations other than those whose duties require them to be present.

No instructors will be allowed on the premises.

62. **Face Sheet and Blotting Paper.**—At the commencement of the examination the working paper, containing the rules, should be given to each of the candidates and they should be instructed to read the rules. A sheet of blotting paper will be issued to each candidate with the first examination paper, and it must be returned to the Examiner when the last paper is completed each day. The Examiner will be careful to see that the blotting

paper has not been used by the candidate in solving his problems, or for conveying information to other candidates.

63. **All Work to be Shown.**—No candidate will be allowed to work out his problems on a slate or on waste paper, or to write on the blotting paper supplied for his use in the examination. Violation of this rule will subject the candidate to all the penalties of failure.

All worked papers must be signed and dated and the name of the port of examination inserted by the candidate.

Additional sheets of paper will be supplied by the Examiner if required, but they must be attached to, and form part of, the examination papers.

64. **Books and Papers Strictly Forbidden.**—All books necessary for the use of candidates under examination will be provided by the Board of Trade, and candidates are prohibited from bringing into the examination room books or papers of any kind whatever, except as specified in paragraph 70. The slightest infringement of this regulation will subject the offender to all the penalties of failure, and he will not be allowed to present himself for re-examination for a period of three months.

65. **Drawing Instruments.**—All candidates have to pass an examination in working drawing, which may, at the candidate's option, consist either of hand sketches clearly dimensioned and complete in the necessary views and sections, or of drawings to scale (*see* Appendix C). Drawing boards and T squares will be provided by the Board of Trade, but the applicants will have to bring with them any drawing instruments they may require.

66. **Candidates' Places.**—Candidates should be so placed as to prevent one copying from another, and no communication whatever between the candidates should be allowed.

67. **Leaving Room or Building.**—No candidate may leave his seat or the examination room without permission and, in the latter case, without giving up the paper on which he is engaged. In no circumstances will the same paper be returned to him, but the Examiner may substitute other questions.

68. **Injury to Books.**—If a candidate defaces, blots, writes in, or otherwise injures any book or form belonging to the Board, his papers will be retained until he has replaced the damaged book or document. He will not be allowed to remove the damaged book or document, and will be subjected to all the penalties of failure.

69. **Silence.**—Perfect silence is to be preserved in the examination room.

70. **Order of Examinations.**—The examination of candidates for both First and Second-class Certificates consists of four parts: arithmetic, drawing or sketching, elementary questions, and *viva voce*. (*See* rules 25, 26, 29 and 30.)

71. **Examination Papers.**—One set of the arithmetical questions should be given to the candidate for the morning's work at 10-30 A.M. and one for the afternoon's at 1-45 P.M. and collected not later than 1 and 4-30 P.M.

72. **Arithmetic.**—When the number of marks obtained in arithmetic amounts to 28, that is, two-thirds of the maximum, the candidate passes in arithmetic, if less than 21 he fails.

If the marks obtained amount to 21, but not to 28, and if the applicant has had long experience, his testimonials and service should be taken into account, and his examination continued, if deemed advisable by the Examiner, and he may be passed if showing sufficient superiority in practical knowledge to compensate for the deficiency in arithmetic.

73. **Drawing.**—With regard to a candidate's drawing, if it is not wholly satisfactory, the examination may be proceeded with so far as the drawing is concerned, and the candidate passed if in the remaining part of it he shows a superiority in practical knowledge. If no such superiority is shown and the candidate's practical knowledge is such as would otherwise have been accepted he should be failed in Drawing, but if it is below the ordinary standard he should be failed in Elementary or Practical Knowledge, as the case may require.

74. **Elementary Questions.**—All candidates will be required to fill up form Exn. 15*b* (*see* Appendix A) and to give written answers to ten questions which may be selected from Elementary Questions shown in Appendix B, or may be new questions somewhat similar in form and covering much the same ground. These questions are intended to test the candidate's knowledge at the time of his examination, and also to furnish evidence as to his handwriting, composition and spelling.

The elementary questions will, as a rule, be given on the second or third day of the examination to candidates for Second-class, and on the third day to candidates for First-class, but candidates who have time after working the arithmetical papers on the first day or the drawing on the second day may be allowed to go on with the Elementary Questions.

Candidates for First-class Certificates are expected to show their superiority by giving answers to the Elementary Questions more complete than those of the other candidates.

75. **Viva Voce.**—Having regard to the fact that, when the verbal examination is held, the candidate has already passed in arithmetic, and in drawing or sketching, and has also written answers to the elementary questions, the Examiners should deal with practical, rather than theoretical, questions in this division of the examination; and no candidate should be failed in the verbal examination without having been well cross-questioned on the points for which failure takes place. Candidates may, however, if the Examiner is satisfied that the written paper fairly represents their knowledge, be failed in the written elementary paper without being examined *viva voce*. In cases where the Examiner approves of the elementary paper, but fails the candidate for lack of either practical or elementary knowledge, a written account of the points on which he failed must be forwarded to the Port Officer with the elementary papers and the Report Exn. 15.

It is considered of great importance that Engineers presenting themselves for examination should have an extensive knowledge of the particulars of actual casualties which have occurred at sea, and be able to state how these might have been prevented, and how remedied. Sometimes an Engineer presents himself who has had no personal experience of any defects, and who can tell nothing about casualties to machinery which have occurred in the experience of others: such candidates should be closely questioned as to their knowledge of boiler and engine construction and the repairs of same.

Questions on the management of engines and boilers at sea, the duties of the Engineer on watch, the work to be done to the engines, boilers, and auxiliary machinery in port, and the periodical examinations of the working parts, should form part of the *viva voce* examination.

76. **Failure in Examination.**—If the candidate fails in practical knowledge he may not present himself for re-examination until he can produce proofs of three months' further service at sea in a qualifying capacity as Engineer on watch on the main engines or boilers of a foreign-going steamer, or its equivalent in the home trade (four and a half months) subsequent to the date of failure. If he fails in arithmetic, elementary knowledge, or drawing only, he may come up again at any time, but in all cases of failure any re-examination must begin entirely afresh

Failure in a number of elementary questions involving fundamental principles, or in questions ignorance of which might lead an Engineer to do something actually unsafe in the management of any part of a ship's machinery, will be regarded as failure in practical knowledge.

77. **Penalty for Copying, &c.**—In the event of any candidate being discovered referring to any book or paper, or copying from another, or affording any assistance or giving information to another, or communicating in any way with another, during the time of examination, or copying any part of the problems for the purpose of taking them out of the examination room, he will subject himself to all the penalties of failure, and will not be allowed to be again examined for a period of six months.

In the event of the offence being repeated double the penalty specified will be enforced.

78. **Penalty for Breach of Rules.**—Any candidate violating any of the regulations, or being guilty of insolence to the Examiner, or of disorderly or improper conduct in or about the examination room, will render himself liable to the postponement of his examination, or, in the event of his having passed, to the detention of his Certificate for such period as the Government may direct.

79. **Reports of Examinations.**—Reports of Examinations on the form Exn. 15, together with the examination papers and forms Exn. 37, should be forwarded to the Port Officer, immediately the examinations are completed, together with the candidate's application to be examined (form Exn. 3) duly filled up, and his previous Certificate, if any.

APPENDIX A.

Form to be filled up by all candidates at the examination.

Form Exn. 15*b*.

Port	Class for which examined
Date	Candidate's Name

A. Where and how long did you serve in works at the making or repairing of engines and boilers?

B How long and in what capacity did you serve in works on shore other than at the making or repairing of engines and boilers?

C. How long have you served in the engine-room at sea, and in what capacities?

D. With what descriptions of engines have you served at sea? What sizes were the engines?

E. With what descriptions of boilers have you served at sea?

F. What engine defects, or defects to auxiliary machinery, have come under your notice; what caused these defects, and how were they remedied? Give the names of the steamers for verification.*

G. What boiler defects have come under your notice, what caused these defects, and how were they remedied? Give the names of the steamers for verification.*

* It is not necessary that the casualties or defects described should have occurred within your own personal experience; you should however give a full and complete description of those you select.

APPENDIX B.

ELEMENTARY QUESTIONS.

NOTE.—The following questions will not necessarily be used in the elementary paper referred to in rule 74. Questions should be read in the light of their context. Thus in question 209 the pipe referred to is that described in the previous question.

1. What parts of an engine are generally made of wrought iron?
2. What parts of an engine are generally made of cast iron?
3. For what parts of an engine is steel generally used?
4. What parts of an engine are generally made of brass or gun metal?
5. Where is "white metal" generally used? On account of what property possessed by it is it adopted? What objection is there to its more general use?
6. For what parts is Muntz metal sometimes used? Is it malleable? For what properties is it valued?
7. What difference is there in the composition of cast iron, of wrought iron, and of steel?
8. How can cast iron, wrought iron, and steel be distinguished from each other?
9. What are the different properties of cast iron, of wrought iron, and of steel?
10. What is meant by the terms, "breaking stress," "proof stress," "safe working stress"?
11. What is the cohesive strength, or breaking stress, of (*a*) good ordinary wrought iron, and (*b*) mild steel?
12. What is meant by the tempering of steel? What kind of steel can be tempered? Describe the process in each case.
13. What is the object of case-hardening? Describe the process.
14. Which of the common metals or alloys can be forged, and which of them are brittle or "short"?
15. What is meant by "welding"? Which of the common metals can be welded?

16. Give examples of the expansion of metals by heat in the engine and in the boiler.

17. In the construction of steel cylindrical marine boilers, for what parts have the plates to be worked hot? What precautionary treatment of these plates is afterwards necessary?

18. In what parts of cylindrical marine boilers is the strongest riveting employed? In which of the shell seams is it most necessary?

19. What is "caulking," and how are seams prepared for caulking?

20. Describe the different ways of fastening the ends of the main stays of a boiler. What are the merits of, or objections to, the different methods?

21. What stress per square inch is allowed on iron and on steel boiler stays?

22. Describe a riveted stay, and state where such stays are sometimes used.

23. Where are thin plates to be looked for in a boiler as it wears, and how is the thinness to be detected?

24. How are boiler tubes fixed? What are "stay tubes," and how are they secured?

25. Where do boiler tubes generally leak? How is this defect repaired? What are the causes of this leaking?

26. What are the causes of cracked tube plates? Where are the cracks usually situated? How are they repaired?

27. What is the difference between a "dry uptake" and a "wet uptake"? Which requires more repair? Why? In what types of boiler are wet uptakes now fitted?

28. What is a superheater? What is its construction? What valves are on it? There is sometimes a gauge-glass on it; what is that for? Are superheaters now in general use?

29. What parts of a marine multitubular boiler are first injured by shortness of water?

30. Where are angle irons sometimes used in the construction of a boiler, and where are flanged plates used?

31. To what causes is priming attributed? What means are applied to prevent it? What evils may be produced by it?

32. What creates funnel draught? What checks it?

33. Flame is sometimes seen at the top of the funnel; what causes it? Is it beneficial or is it detrimental? Why so?

34. How many bottom blow-off cocks are generally fitted in connection with each boiler, and why are they so fitted?

35. For what purpose are blow-off cocks sometimes fitted with a spanner guard? Describe how the guard is formed.

36. Where are water-gauge test-cocks placed? At what heights? Must the cocks themselves be at those heights? What provision is made for cleaning these cocks should they ever become choked? When there are no test cocks how is the height of the water ascertained?

37. What are the different types of safety valves in general use? How is a lock-up valve arranged to admit of lifting it or of turning it round, and to prevent adding to the weight?

38. About what area of safety valve per square foot of fire grate is now required by the Board of Trade? What is the effect of suddenly opening a safety valve when steam is up? To about what extent do safety valves lift when blowing off without being eased by hand?

39. What advantages have spring-loaded safety valves that are not possessed by dead-weight valves? What are the disadvantages, if any, as compared with dead-weight valves?

40. Of what parts does a glass water gauge mounting consist? How does it act? Where is it placed? At what height? Is it liable to derangement? How is its working tested?

41. Glass water gauges have sometimes pipe connections at the top and bottom; in what cases is this necessary? Should there be cocks at the extremities of these pipes? Give your reasons.

42. Describe a Bourdon steam gauge. Some gauges have inverted syphon pipes below them; what is their use?

43. Why is a small cock sometimes put on the pipe leading to a steam gauge? Where should it be placed, and what error might be made by omitting to use it?

44. Do steam gauges indicate the total pressure of the steam or only a portion of that pressure? What is the pressure measured from?

45. What is meant by the salting of the boiler? How is this prevented? What is the density of ordinary sea water? How is the density ascertained? What is the difference between the formation of scale and the salting of the boiler? What is the maximum density at which boilers should be worked at sea? In the event of condenser tubes leaking what is the minimum density at which boilers should be worked? Give your reasons.

46. How are scum cocks and pipes arranged? Where are they placed? At what height in the boiler? When are they used? When must they be shut? What dangers may result from neglect of these cocks?

47. Of what does scale consist? Where is it most objectionable? How is it removed? How is its formation prevented? What evil effects are produced by it?

48. What is a salinometer? Of what does it consist? How does it act? How is it graduated? Can it be used at any temperature indiscriminately?

49. In what ways might the check valve of one of a set of boilers become defective while under way? What would be the result in each case and what action would be necessary?

50. How is a leak from a split tube in a boiler stopped at sea? Describe the operation.

51. What is the use of dampers? Where are they fitted? When should they be used?

52. If the funnel damper were inoperative what steps would you take to reduce evaporation? What injuries to the boiler are sometimes attributed to some of these? Are such results affected by the condition of the heating surfaces?

53. Describe the piston of a steam cylinder, with its different rings and their uses? Round pieces are generally let in flush on one side of a piston; what are they? How are these pieces fixed?

54. What is the use of cylinder drain cocks? Valves were sometimes placed upon these cocks; what purpose did they serve?

55. Of what do cylinder escape valves consist? How are they protected? How are they regulated? When are they most needed? To what danger do they expose the engineer? What precaution is generally used to obviate this danger?

56. What is a compound engine? What different kinds are there for screw steamers, in respect to the number and arrangement of their cranks and cylinders?

57. What is a link motion? What are some of its advantages? In modern engines for the screw propeller, when there is no link motion, what takes its place?

58. What arrangement is applied to reduce the friction of a slide valve? To what is the friction due?

59. Describe a loose eccentric; how does it act? In what engines are loose eccentrics still employed?

60. What is the travel of the eccentric rod? How is it measured on the eccentric? What is the travel of the slide valve when the link motion is in mid gear, and the engine still moving?

61. What are "double beat valves"? What objections are there to their use?

62. What is a circulating pump? Is it always worked by the main engine? Give an example from your last steamer of the three water temperatures generally noted by careful engineers.

63. An air valve is sometimes fitted to reciprocating circulating pump; what purpose does it serve?

64. What is the difference between a bucket and a piston air-pump? Are double-acting air-pumps made with plungers, with pistons, or with buckets?

65. What is an air-pump trunk? When is it necessary? How is it attached to the bucket?

66. What class of air-pump requires both foot and delivery valves, and in what other class is it possible in some cases to dispense with either of these valves?

67. Describe the construction and action of reciprocating and centrifugal circulating pumps.

68. What are marine governors? What is their general construction? Ho do they act?

69. With a surface condenser and a single-acting air-pump what is the effect of a leaky foot valve, and what is the effect of a leaky bucket when there is also a foot valve?

70. Where is the air-pump pet cock or valve placed? How does it act? What is its object? Does it in every case reduce the effective capacity of the pump? Is it equally applicable to double-acting pumps?

71. At about what temperature is the hot well worked? What is the effect of higher temperatures? What is the effect of lower temperatures? What limits the lowness of temperature? Has a very low temperature any disadvantages?

72. When surface condensers are used, what takes the place of the bilge injection? To what is the connection made? How is its valve formed? Why is this necessary?

73. What are the practical guides to the proper amount of opening of the inlet valve for the circulating pump?

74. Where is a feed-pump pet cock or valve placed? What is its use? How does it act? Is it always a necessary fitting?

75. What are the usual ways of fastening the ends of surface condenser tubes? About what size and about what thickness are these tubes? What parts of a surface condenser are made of brass?

76. What connections are generally fitted to the donkey pump, and to what services can it be applied?

77. When the engines are stopped in harbour with steam up, which cocks or valves should be shut and which opened?

78. How is an engine heated up before starting? What precautionary examinations are made before starting?

79. What is a separator or interceptor? Where is it fixed, what is its construction, how does it act, and what attention does it require?

80. Describe an air-pump bucket, with its valve or valves and its packing. Of what are the valves generally made?

81. Of what materials are air-pump rods made? Why?

82. What is the racing of an engine? When does it occur? What danger attaches to it? What is done to prevent it?

83. What is meant by the "pitch" of a screw propeller? How is it measured?

84. Explain the difference between a "right hand" and a "left hand" propeller, and state how each of them revolves.

85. What is the slip of a screw propeller? How is its amount expressed in figures?

86. Which of the valves about engines and boilers have to be worked by hand, which of them are self-acting, and which are worked by the motion of the engine?

87. Why is soda sometimes put into a boiler, and how is it put in when under way? What is the kind of soda used?

88. Does a self-acting cylinder escape-valve allow all the water to escape? If not, how much is left in the cylinder?

89. Describe the usual methods of lubricating slide valves and pistons.

90. Of what is the centre of a common paddle wheel made? Of what are the arms formed? What is the form of the bolts which attach the floats to the arms? How are the arms attached to the centres?

91. Why have some paddle wheels one or more floats in each wheel heavier than the rest? With what engines are these most required? At what part of the circumference are they placed?

92. Why are paddle wheel floats sometimes made of different breadths in the same wheel? With what description of engine is this most needed? Where are the broad floats placed and where are the narrow floats placed in the circumference of the wheel?

93. What difference is there between a radial paddle wheel and one with feathering floats? What is the object of feathering floats? Are all the eccentric rods attached in the same way, and are they all of the same form?

94. Whereabout is the centre of the eccentric of a paddle wheel with feathering floats placed? In the case described are the feathering levers on the striking face or on the back of the float? When the paddle shaft has an outer bearing how is the eccentric made?

95. Of what materials are the working surfaces of a paddle wheel with feathering floats made? How are they lubricated?

96. What is a "Disconnecting Paddle Engine"? At what place is the disconnecting effected? How is it accomplished? In which of the cranks of a disconnecting engine are the crank pins fixed?

97. Is link motion valve gear or the loose eccentric generally used for disconnecting paddle engines? For what steamers are disconnecting paddle engines frequently employed?

98. What are expansion joints? Where are they necessary? What attention do they require? Of what should the working surfaces be made?

99. What omission in the construction of expansion joints may lead to a serious accident when steam is first applied? How is this prevented in the construction of a steam trunnion pipe for an oscillating engine?

100. Describe an oil cup with a syphon worsted. How is the worsted arranged? How is it cleaned? How far down the tube does it extend?

101. Describe a thrust bearing; which of the surfaces wear?

102 What parts of a screw shaft are generally covered with brass? Why is this necessary? About what thickness is the brass?

103. What is the stern tube? Why is a tube of such a length required? Of what is it made? How is it fixed at each end?

104. What is a *lignum vitæ* bearing? How is the wood fitted? Where is such a bearing generally used?

105. How is a screw propeller fixed on the shaft? What means are used to prevent its getting loose at sea?

106. With a condensing engine what valves or cocks are on the skin of the ship in the engine-room, and in the stokehold?

107. What are the necessary fittings of a marine boiler?

108. With a surface condensing engine, what cocks or valves are opened some time before the engine is started so as to be ready for starting whenever the order is given?

109. What is a steam jacket? What cocks are on it? In what engines are jackets most generally used? Do they require to be lagged or covered with non-conducting materials?

110. What parts of an engine or its fittings should be felted or otherwise protected against radiation?

111. What are the small cylinders sometimes fitted on the slide valve casing cover of vertical engines? Explain their action. To what are they connected by a pipe? Why?

112. Name the principal pipes in connection with the engines and boilers of a steamer, and state to what the ends these pipes are connected?

113. Through what cocks or valves, pipes and chambers does the water pass on its way from the sea inlet rose-plate to the water space of the boiler, with a jet condenser?

114. Through what cocks or valves, pipes and chambers does the circulating water of a surface condenser pass?

115. Through what cocks or valves, pipes and chambers does the steam pass from the boiler until it is in the form of water in the hot well?

116. Name, in the order in which they act, the parts of the engine through which the pressure of the steam is transmitted from the piston to the screw propeller.

117. What is an air vessel? How does it act? At what parts of an engine or of its fittings are air vessels generally fixed?

118. What is the construction of a mudbox? Where should mudboxes be placed? Why are they necessary? How should the space be divided by the rose-plate, and why?

119. What is an oscillating engine? For what steamers are oscillating engines generally adopted? Why? How is the steam conveyed to and from the slide valve casing?

120. Of what parts does the valve motion gear of an oscillating engine consist?

121. What types of geared marine engines are now used? Describe the gearing.

122. At what part of a screw steamer is the pressure that propels it applied to the hull?

123. At what part of a paddle steamer is the pressure that propels it applied to the hull?

124. About how much fuel per indicated horse-power per hour is required by modern steam-engines, bi-compound, triple and quadruple expansion?

125. What is the explanation of the economy of the surface condenser?

126. What is the construction of a surface condenser? Of what are its tubes made? How are they fixed? How are they kept tight? What is done with a split tube?

177. A screw propeller is getting loose, and has a little play on the shaft, sideways on the key or feather; how will this show in the engine-room?

178. How would you prove whether the centre line of the trunnions of an oscillating cylinder is fair with the centre line of the main shaft?

179. How can the fairness of a line of screw shafting be tested without lifting the shafts?

180. Where a steel forgings generally used in marine engines?

181. What is the composition of nickel-steel? Where is it sometimes used in engines and boilers?

182. How is forced draught generated on board ship and supplied to boiler-furnaces? Is the air heated before delivery? If so, how?

183. What is "induced" draught? Compare the merits of "forced" and of "induced" draughts.

184. How is the intensity of forced or induced draught measured? What is the usual pressure employed in the mercantile marine?

185. An explosive gas is liberated from bunker coal. Usually in well-ventilated bunkers this gas escapes into the atmosphere without doing harm. In ill-ventilated bunkers the gas after mixing with a certain proportion of common air has been known to explode when a naked light has been brought into contact with it. What is the composition of the gas? Where is it found, in bunkers, 'tween decks, pockets, and coal shoots? How may it be got rid of as soon as it is given off by the coal? How many cubic feet of air to one of the gas forms a violently explosive mixture?

186. A lighted lamp or candle has sometimes been lowered into an apparently empty paraffin tank and produced an explosion resulting in injury to the person holding the light. What did the tank probably contain, and what produced the explosion?

187. At what point in vessels carrying coal-cargoes does the gas which escapes from the body of the coal tend to accumulate? Why should this be so?

188. A light lowered into recently-opened ballast tanks, double-bottoms and boilers, is sometimes extinguished. What would, in all probability, cause this?

189. In double-bottom steamers where does the bilge water lie, and where are the roses of the bilge pipes fitted?

190. What is the advantage of a large rose over a small one?

191. Why should engine bilge suctions be fitted to both wings of the bilge, especially in vessels carrying cargoes liable to shift?

192. In a heavily listed vessel, why is it difficult to keep steam?

193. If the engine bilge pumps get choked and water accumulates in the stokehold bilges, what effect does the water have upon the bilge boards and stokehold plates, when the ship is rolling violently?

194. In a triple-expansion engines, what spare gear do you consider necessary in the case of a foreign-going ship? Also what stores would you provide for a voyage to New Zealand?

195. What means are sometimes provided for temporarily coupling together the broken parts of, say, a tunnel-shaft? Describe the fitting.

196. Does the pressure on the thrust-collars vary with the horse-power, or with the speed of the ship, or how?

197. If the holding-down bolts of a thrust-bearing should become slack, what effect would it have upon the working of the engines?

198. In an engine with three cranks, which of the three is subject to the greatest torsional stress (1) in going ahead, (2) in going astern?

199. Is it usual to make the crank shaft of a triple or quadruple expansion engine in one piece? Is the diameter of the shaft uniform from end to end? Explain the practice which obtains?

200. In a "built" crank shaft how are the webs rigidly secured to the pins and to the body of the shaft?

201. There are various descriptions of donkey engines in use on board ship for pumping purposes. Some pumps are fitted with escape-valves, some are not. Why should this be?

202. Explain the function of an air-vessel fitted to a feed pump. Make rough hand sketches of (1) a satisfactory vessel, (2) an unsatisfactory vessel, where, say, the air-spring has been destroyed by carelessness, or has never been properly provided.

203. Should cocks or escape-valves be fitted to air-vessels? Why or why not?

97. Is link motion valve gear or the loose eccentric generally used for disconnecting paddle engines? For what steamers are disconnecting paddle engines frequently employed?

98. What are expansion joints? Where are they necessary? What attention do they require? Of what should the working surfaces be made?

99. What omission in the construction of expansion joints may lead to a serious accident when steam is first applied? How is this prevented in the construction of a steam trunnion pipe for an oscillating engine?

100. Describe an oil cup with a syphon worsted. How is the worsted arranged? How is it cleaned? How far down the tube does it extend?

101. Describe a thrust bearing; which of the surfaces wear?

102. What parts of a screw shaft are generally covered with brass? Why is this necessary? About what thickness is the brass?

103. What is the stern tube? Why is a tube of such a length required? Of what is it made? How is it fixed at each end?

104. What is a *lignum vitæ* bearing? How is the wood fitted? Where is such a bearing generally used?

105. How is a screw propeller fixed on the shaft? What means are used to prevent its getting loose at sea?

106. With a condensing engine what valves or cocks are on the skin of the ship in the engine-room, and in the stokehold?

107. What are the necessary fittings of a marine boiler?

108. With a surface condensing engine, what cocks or valves are opened some time before the engine is started so as to be ready for starting whenever the order is given?

109. What is a steam jacket? What cocks are on it? In what engines are jackets most generally used? Do they require to be lagged or covered with non-conducting materials?

110. What parts of an engine or its fittings should be felted or otherwise protected against radiation?

111. What are the small cylinders sometimes fitted on the slide valve casing cover of vertical engines? Explain their action. To what are they connected by a pipe? Why?

112. Name the principal pipes in connection with the engines and boilers of a steamer, and state to what the ends these pipes are connected?

113. Through what cocks or valves, pipes and chambers does the water pass on its way from the sea inlet rose-plate to the water space of the boiler, with a jet condenser?

114. Through what cocks or valves, pipes and chambers does the circulating water of a surface condenser pass?

115. Through what cocks or valves, pipes and chambers does the steam pass from the boiler until it is in the form of water in the hot well?

116. Name, in the order in which they act, the parts of the engine through which the pressure of the steam is transmitted from the piston to the screw propeller.

117. What is an air vessel? How does it act? At what parts of an engine or of its fittings are air vessels generally fixed?

118. What is the construction of a mudbox? Where should mudboxes be placed? Why are they necessary? How should the space be divided by the rose-plate, and why?

119. What is an oscillating engine? For what steamers are oscillating engines generally adopted? Why? How is the steam conveyed to and from the slide valve casing?

120. Of what parts does the valve motion gear of an oscillating engine consist?

121. What types of geared marine engines are now used? Describe the gearing.

122. At what part of a screw steamer is the pressure that propels it applied to the hull?

123. At what part of a paddle steamer is the pressure that propels it applied to the hull?

124. About how much fuel per indicated horse-power per hour is required by modern steam-engines, bi-compound, triple and quadruple expansion?

125. What is the explanation of the economy of the surface condenser?

126. What is the construction of a surface condenser? Of what are its tubes made? How are they fixed? How are they kept tight? What is done with a split tube?

177. A screw propeller is getting loose, and has a little play on the shaft, sideways on the key or feather; how will this show in the engine-room?

178. How would you prove whether the centre line of the trunnions of an oscillating cylinder is fair with the centre line of the main shaft?

179. How can the fairness of a line of screw shafting be tested without lifting the shafts?

180. Where is steel forgings generally used in marine engines?

181. What is the composition of nickel-steel? Where is it sometimes used in engines and boilers?

182. How is forced draught generated on board ship and supplied to boiler-furnaces? Is the air heated before delivery? If so, how?

183. What is "induced" draught? Compare the merits of "forced" and of "induced" draughts.

184. How is the intensity of forced or induced draught measured? What is the usual pressure employed in the mercantile marine?

185. An explosive gas is liberated from bunker coal. Usually in well-ventilated bunkers this gas escapes into the atmosphere without doing harm. In ill-ventilated bunkers the gas after mixing with a certain proportion of common air has been known to explode when a naked light has been brought into contact with it. What is the composition of the gas? Where is it found, in bunkers, 'tween decks, pockets, and coal shoots? How may it be got rid of as soon as it is given off by the coal? How many cubic feet of air to one of the gas forms a violently explosive mixture?

186. A lighted lamp or candle has sometimes been lowered into an apparently empty paraffin tank and produced an explosion resulting in injury to the person holding the light. What did the tank probably contain, and what produced the explosion?

187. At what point in vessels carrying coal-cargoes does the gas which escapes from the body of the coal tend to accumulate? Why should this be so?

188. A light lowered into recently-opened ballast tanks, double-bottoms and boilers, is sometimes extinguished. What would, in all probability, cause this?

189. In double-bottom steamers where does the bilge water lie, and where are the roses of the bilge pipes fitted?

190. What is the advantage of a large rose over a small one?

191. Why should engine bilge suctions be fitted to both wings of the bilge, especially in vessels carrying cargoes liable to shift?

192. In a heavily listed vessel, why is it difficult to keep steam?

193. If the engine bilge pumps get choked and water accumulates in the stokehold bilges, what effect does the water have upon the bilge boards and stokehold plates, when the ship is rolling violently?

194. In a triple-expansion engines, what spare gear do you consider necessary in the case of a foreign-going ship? Also what stores would you provide for a voyage to New Zealand?

195. What means are sometimes provided for temporarily coupling together the broken parts of, say, a tunnel-shaft? Describe the fitting.

196. Does the pressure on the thrust-collars vary with the horse-power, or with the speed of the ship, or how?

197. If the holding-down bolts of a thrust-bearing should become slack, what effect would it have upon the working of the engines?

198. In an engine with three cranks, which of the three is subject to the greatest torsional stress (1) in going ahead, (2) in going astern?

199. Is it usual to make the crank shaft of a triple or quadruple expansion engine in one piece? Is the diameter of the shaft uniform from end to end? Explain the practice which obtains?

200. In a "built" crank shaft how are the webs rigidly secured to the pins and to the body of the shaft?

201. There are various descriptions of donkey engines in use on board ship for pumping purposes. Some pumps are fitted with escape-valves, some are not. Why should this be?

202. Explain the function of an air-vessel fitted to a feed pump. Make rough hand sketches of (1) a satisfactory vessel, (2) an unsatisfactory vessel, where, say, the air-spring has been destroyed by carelessness, or has never been properly provided.

203. Should cocks or escape-valves be fitted to air-vessels? Why or why not?

204. Where, by preference, should the escape valve of a feed pump be placed? Why?

205. Scum cocks are sometimes fitted to boiler-shells at a height convenient for engineers to manipulate when standing in the stokehold; the scum pipes in such cases are led upward, inside the boiler, to a little above the combustion chamber tops What danger may arise from this arrangement?

206. Cocks for testing the water-level of boilers are sometimes fitted within reach of the engineer who is standing in the stokehold. These may have internal pipes leading upward and terminating at various levels. Under what circumstances may these become misleading?

207. Why should the pipe which leads from the bottom of the water-gauge column to the bottom of the boiler-front be covered with non-conducting material? Why also should it never have lengthy horizontal bends?

208. In your own experience, how frequently is this pipe removed and cleared?

209. Why, even with the best of water-gauges, is it advisable occasionally to use the drain-cock?

210. Steam loops have sometimes been inadvertently made in the length of piping leading from the top of the water-gauge column to the top of the boiler. Roughly sketch such a loop and explain the danger arising from its existence.

211. Describe your method of thoroughly testing the water-gauge system to satisfy yourself that all the cocks and pipes are clear. Hand sketches, mere lines indicating pipes, and circles indicating cocks, should be made. Identify the cocks and pipes by letters or numerals.

212. Describe the construction of a water-tube boiler, mentioning the type selected. Of what materials are the various parts usually made?

213. In a water-tube boiler, how is an economiser fitted, and what is its duty?

214. How is the water-gauge fitted in a water-tube boiler? Are glass-gauges used?

215. The pressure of the steam in water-tube boilers is sometimes greater than at the engines. Why is this, and how is this difference of pressure maintained?

216. Describe any automatic method of feeding water-tube boilers.

217. Describe the construction of any steam turbine you are acquainted with, which is used on board ship How is the expansion of steam effected? How many propeller shafts are employed, and how many propellers?

218. Is the same power in a steam turbine available to go astern as to go ahead?

219. Of what material are the propellers usually made in a steam turbine, and why is this material adopted?

220. About how many pounds of coal per indicated horse-power per hour are burnt with turbine engines? Name the type of boiler in use.

221. Describe one of the several classes of refrigerating machinery in use on board ship. Several types exist. Which is the most economical?

222. Describe the defects to which the selected type is subject. How are the defects overcome?

223. How frequently are the parts opened out for examination? Name the parts.

224. How frequently are the condensers of refrigerating plants opened for examination? How frequently are the coils tested by hydraulic pressure? On which side of the coil is corrosion most commonly found? Why should this be so?

225. Where ammonia is used in refrigerating machines, should the machinery by preference be isolated? Why? Give what information you possess bearing on the matter, naming the ships for purposes of identification.

226. Explain how the ammonia is removed from the tubes in which it is supplied, and how passed into the refrigerating machine.

227. What objection is there to the presence of water in the ammonia?

228. Describe the ammonia process of refrigeration.

229. Of what material are the parts made which are in contact with the ammonia?

230. Are escape-valves fitted to the compressors of ammonia machines? What is the reason for the usual practice?

231. What is the maximum pressure found in the compressors of ammonia machines?

232. What kind of pressure and other gauges are used in ammonia machines?

233. Explain how carbon dioxide (CO_2) is removed from the tubes in which it is supplied, and how passed into the refrigerating machine.

234. What objection is there to the presence of water in carbon dioxide (CO_2)?

235. Describe this process of refrigeration.

236. Of what material are the parts made which are in contact with the carbon dioxide (CO_2)?

237. Are escape-valves fitted to the compressors of these machines?

238. What is the maximum pressure attained in the compressors of carbon dioxide (CO_2) machines?

239. What kind of pressure and other gauges are used in such machines?

240. In which type of refrigerating machine is brine used? What is its composition and density? Where does it circulate?

241. Are fans for circulating air used in any of the refrigerating processes? If so, why are they necessary?

242. What means are in some cases employed for ascertaining the temperatures of refrigerating chambers without entering them?

243. What effect may the swabbing of the compressor piston rods have upon the working of the refrigerating machinery?

244. What is a rectifier? Explain its use.

245. Describe the cold-air process of refrigeration.

246. Of what material are the air suction and delivery valves of a cold-air machine made? How are the valves kept on their seats?

247. How many compressors are there to a cold-air machine?

248. What is the duty of the expansion cylinder of a cold-air machine?

249. What objection is there to the presence of moisture in the air passed through the cold-air machine?

250. How is water to some extent removed from the air? What is the minimum temperature of the air?

251. What is the maximum pressure found in the compressors of cold-air machines?

252. What kind of pressure and other gauges are used in cold-air machines?

253. In refrigerating engines generally, where is the exhaust steam led?

254. Cold-air chambers on board ship are insulated. How and why?

255. Is it prudent to allow the wires of an electric circuit to pass through the insulation? Explain fully.

256. Describe the construction of a feed water-heater and give the name of its manufacturer.

257. To about what temperature is the feed water raised by passing through a feed-heater?

258. What fittings are usually placed on a feed-heater? Why are they necessary?

259. Describe any well-known ash-ejector.

260. Describe any well-known independent feed pumps.

261. Are independent feed pumps automatic in their action? Explain the action.

262. What advantage, if any, have independent feed pumps over feed pumps worked by the main engines?

263. Describe the construction of a feed-filter, enumerating its valves and cocks.

264. How can the filter be cleaned? What ingredients are generally removed when cleaning takes place?

265. What is the intercepting material in a filter made of? How is it fitted?

266. Describe an evaporator, and mention the type.

267. What fittings are necessary with evaporators?

268. How is the brine got rid of in an evaporator?

269. How may the evaporator coils be cleaned?

270. What is a dynamo? Describe its various parts. For what is it used?

271. In what respect does an electric motor differ from an electric generator? Where are electric motors sometimes used on board ship?

272. Describe a system of electric lighting employed on board ship?

273 How is the position of a fault in the electric circuit discovered?

274. What is "sparking" in an electric lighting circuit? In what circumstances may it be dangerous?

275. What is "short-circuiting," and to what evil may it give rise?

276. What means are employed to prevent any part of the circuit becoming overheated?

277. Describe the features of an arc lamp.

278. Describe the construction of an incandescent lamp.

279. What is the usual candle-power of the small incandescent lamps in general use on board ship?

280. Define the following terms:—Ampère, volt, ohm, watt. What is the measure of an electrical horse-power?

281. Explain the uses of switches, brushes, commutators, cutouts, field-magnets, armatures and resistance-coils.

282. Why is it desirable to fit a dynamo in a cool place on board ship?

283. What undesirable effect will ultimately occur to an electric wire whose sectional area is constantly diminishing, say, through corrosion?

284. What danger might arise from leading electric wires through coal bunkers?

285. Is it better to lead electric wires above or below side-scuttles? Why?

286. What instruments are used on board ship to ascertain the strength of an electric current?

287. Many ocean-going steamers are fitted with hydraulic cranes, etc. Where do they obtain their power? How is the hydraulic pressure kept at a relatively constant amount?

288. Is any difficulty experienced in working hydraulic cranes in frosty weather? If so, why?

289. Describe any steam steering gear with which you are acquainted.

290. When the helm is put hard over and the ship is going full speed ahead, what prevents the rudder from returning to the amidship position.

291. In the case of a steamship under way, does the helmsman manipulating the steam steering wheel overcome any resistance exerted by the rudder?

292. Explain clearly what is being done by a helmsman manipulating the wheel of a steam steering engine.

293. Is there any difference between the amount of horse-power required to put a helm hard over, in a given time when the vessel is going full speed ahead, and when she is going full speed astern? This question refers to the case of a steamer fitted with one rudder only, and demands a more complete answer than merely "yes" or "no."

294. What precautions should be taken before removing a manhole-door of a steam boiler? In the absence of such precautions what casualties might occur?

295. Describe the chief features of the engine-governor fitted to a steamer you have served in. Describe its action. Give the maker's name, and name of ship.

NOTE.—The following six questions refer to oil-motors fitted to launches.

296. Name the principal parts of an oil-motor, and briefly state their functions. State the type of motor and the name of the makers.

297. What kind of oil is usually employed in oil-motors? What is its flash-point? What is its specific gravity? What is its calorific power? What precautions are taken in its storage to guard against casualty by fire or explosion?

298. How many cylinders are generally used in oil-motors? What kind of pistons are fitted? How frequently (measured in revolutions) is explosion per cylinder effected? How is explosion in the cylinder carried out?

299. Describe how an oil-motor is started. If starting prove difficult, where would you chiefly look for defects? How is piston speed modified? How is the speed of vessel varied? How is reversing effected?

300. Before examining an oil-motor with a naked light, what steps should be taken for safety's sake?

301. How frequently should an oil-motor, working 12 hours a day, be opened up for examination, cleaned, and its parts readjusted? What difficulty arises when the internal parts become foul with carbonized oil?

APPENDIX C.

EXAMINATION IN WORKING DRAWING AND SKETCHING.

FIRST-CLASS ENGINEER. (FORM EXN. 17.)

1. The rules in regard to the qualifications of a candidate for a First-class Engineer's Certificate of Competency specify that—

> "He will be required to make an intelligible hand sketch, or a working drawing of one or more of the principal parts of an engine, boiler, or other part of the machinery, and to mark upon it all the necessary dimensions in figures, so that the sketch or drawing could be worked from."
>
> "He must be able to state the general proportions borne by the principal parts of the machinery to each other."

2. In accordance with these clauses, the candidate is required to make a working drawing of the parts specified, such as are given below. He is expected to be familiar with the construction of these parts, as an engineer should have a general idea of the details of the engines and boilers with which he has served.

3. Fine drawing is not expected, and, should the candidate prefer this alternative, clear hand sketches will be accepted. In the proportions a wide margin will be allowed, but really absurd design or dimensions will entail failure in practical knowledge. It is, however, imperative that sufficient views be shown, and that these be so completely dimensioned that if the drawing were sent into the workshops the parts could be made from it without further information being supplied, or the drawing requiring to be measured.

4. The candidate should not draw more parts than the subject requires, or begin more than he can completely finish in the time allowed. A portion only of the parts specified, if satisfactory and fully dimensioned, may be accepted in place of the whole, if there is no reason to suppose that the remainder of the work has been evaded through inability or ignorance. If the work be incomplete owing to lack of time, the names of the parts omitted, or not fully dimensioned, should be clearly stated on the face of the sheet.

5. The "Statement by the Candidate" should be filled up carefully and as completely as possible; and should there be any defect in the design selected this should be referred to. A bad design presented without comment or an absurd "Statement" will be considered to imply a want of practical knowledge.

6. The candidate is advised not to begin more than he can finish in the time allowed. Nothing should be pencilled in after four. All the dimension figures and darts must be inked in, and the remaining time should be employed in checking the dimensions and the work generally. It is important that the dimension lines be not confused with centre lines.

7. Extra paper will be provided if required.

8. *Caution.*—In the event of any candidate being discovered referring to any book or paper, copying from or assisting another, or in any way communicating with another during the time of the examination, he will be regarded as having failed, and will be turned back for six months, and no part of the fees he may have paid will be returned to him.

SUBJECT FOR EXAMINATION IN WORKING DRAWING.

Read the foregoing general instructions.

THREE VIEWS OF A BILGE DIRECTING VALVE CHEST CONTAINING AT LEAST TWO BILGE SUCTION VALVES AND ONE SEA SUCTION VALVE.

The candidate should fill up the following and hand in this paper with his drawing.

STATEMENT BY THE CANDIDATE.

The accompanying drawing, made by me this day without referring to any document, and without the assistance of any person, is intended by me to be sufficient for the construction of the parts above described to fit the places of similar parts which are to be renewed.

The parts to be made of brass are _____

The parts to be made of cast iron are _____

What precautions are taken to prevent the sea water from running into the bilges? _____

What appliances are fitted to prevent the valves from being fouled by chips or dirt? _____

Can the ballast pump be used to pump from the bilges through this valve box? _____ If so, what other fitting is considered to be necessary? _____

It is required that all the parts shall be fully dimensioned in ink, but if owing to want of time, this has not been done, the parts not fully dimensioned must be stated; otherwise it will be understood that the candidate considers the dimensions given sufficient.

The parts omitted or not fully dimensioned are _____

Port _____

Date _____ day of _____ 191 _____

_____ Applicant.

SECOND-CLASS ENGINEER.

The Regulations respecting the qualifications for a Second-class Engineer's Certificate specify that—

"He must be able to make a dimensioned working sketch or drawing of some simple part of the machinery."

The subjects for examination in drawing given to Second-class candidates will be of a more simple character than those given to First-class men. The general requirements and regulations for the examination will, however, be similar to those stated above.

The candidate will be expected to show that he is capable of making a dimensioned sketch or drawing of a part of the machinery, such that, if it were sent home from a foreign port, the part in question could, if necessary, be accurately reproduced and the new article be fitted in place on board the ship on her return without amendment or alteration.

APPENDIX D.

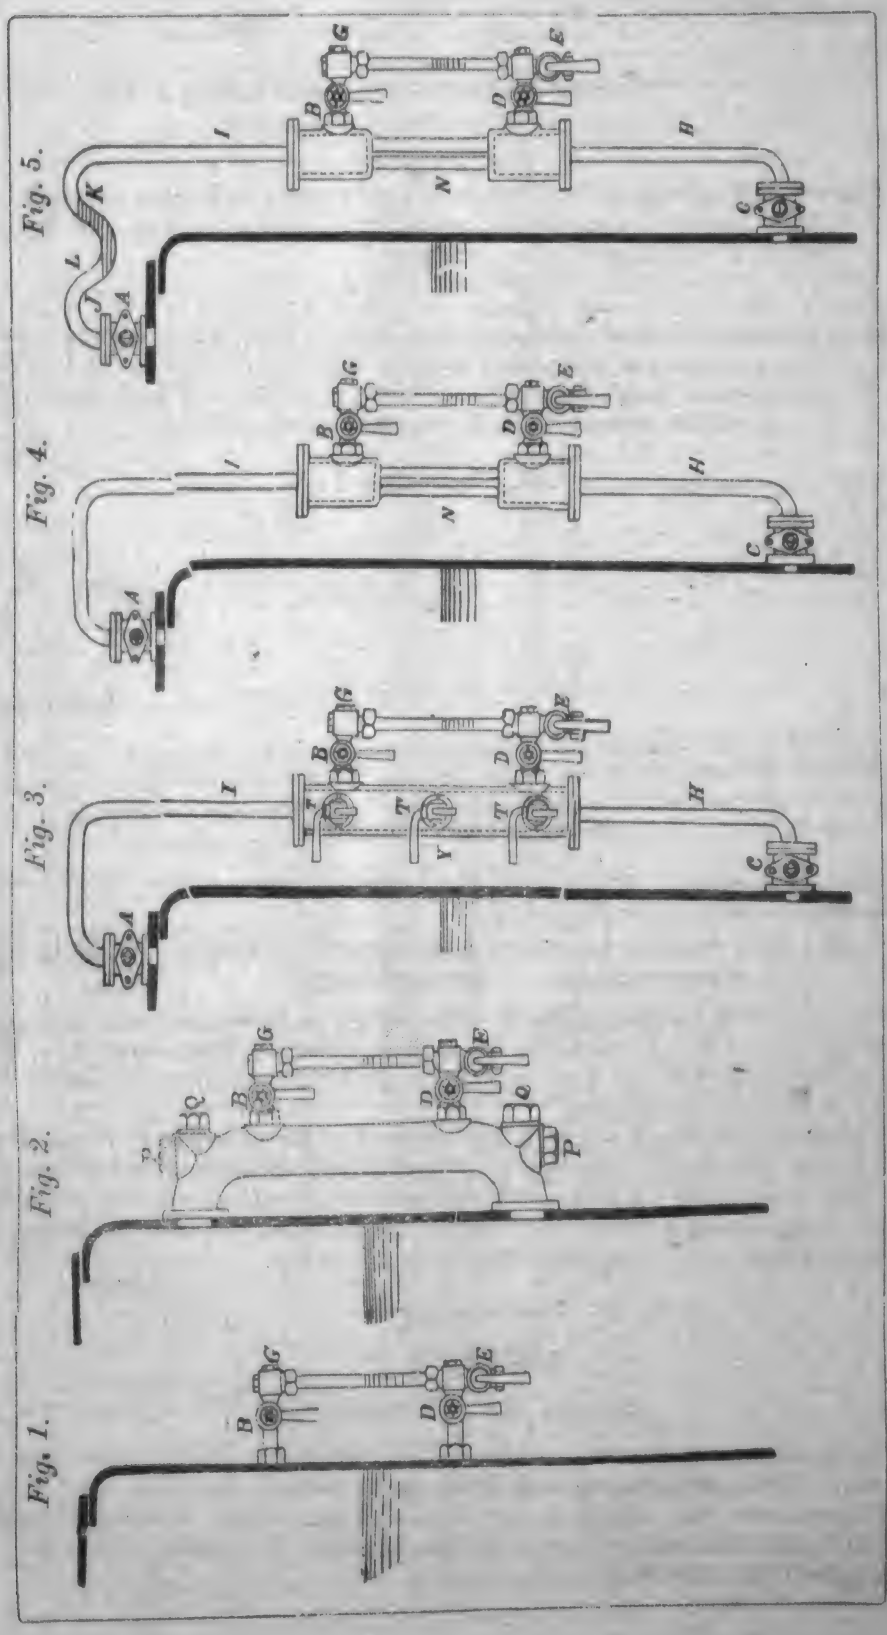
READING THE WATER-GAUGES.

Notwithstanding that the reading of the water-gauge is made a special feature in the examination of Engineers, many boiler casualties result from the Engineer of the watch either not understanding the construction of the water-gauge fittings or not satisfying himself by actual trial that the cocks, pipes, etc., are clear.

Unless a candidate under examination is able to prove that he understands how to verify the indications of the water-gauge, he should not be passed in practical knowledge, and, as failure in practical knowledge involves the candidate going to sea for another three months before being eligible for re-examination, the Examiner should explain to such candidate his error, after failing him, in order to prevent further casualties resulting from his want of knowledge on this subject.

The sketches, Figures 1, 2, 3, 4 and 5, Plate I, represent the usual methods of attaching water-gauge mountings to marine boilers. The important features in each gauge and the method of verifying its indications are dealt with separately in the following remarks:—

Plate I.



REFERRING TO FIGURE 1 ONLY.

In this case the water-gauge cocks are attached direct to the boiler, and the accuracy of the gauge when the boiler is under steam can be tested as follows:—

First.—Let B remain open, then close cock D and open cock E, and if steam issues it proves that cock B and the passage through the top fitting and gauge glass are clear. If no steam or water issues, either cock B or the passage through the top fitting and gauge glass is choked and the gauge cannot act properly until the obstruction is removed.

Second.—Close cock B and open D and E, and if water issues, cock D is clear. If no water or steam issues, either cock D or the passage from the boiler through the lower fitting is choked and must be cleared before the gauge can act properly.

REFERRING TO FIGURE 2 ONLY.

In this case the gauge cocks are attached to a bent pipe of comparatively large diameter (at least 3 inches in the bore), the upper end of which communicates with the steam space, and the lower end with the water space of the boiler. Owing to the bore of the pipe being large it is not likely to become choked or stopped under the ordinary conditions of working. The water-gauge is, therefore, in practically the same condition as if it were attached direct to the boiler, as in Figure 1. This gauge, when at work, is tested in precisely the same manner as the one shown in Figure 1.

Screw plugs are inserted at P.P. and Q.Q. by the removal of which the apertures in the pipe can be cleared, if necessary, by the insertion of a wire or rod when steam is down.

REFERRING TO FIGURE 3 ONLY.

In this gauge there is an open communication from A to C through the column Y, and in order to "blow through the *glass*" it is only necessary to shut cocks D and B alternately, keeping E open. But to "blow through the *water-gauge*," including the pipes H and I, it is necessary, after blowing through the glass as described above, to shut A and C alternately, at the same time keeping B, D and E open for such time as will ensure the complete discharge of the contents of the gauge and its connections. When B, D and C are clear and A choked, the steam lodging in the glass and in the pipe I leading from column Y to A becomes condensed and the water flowing through C to take its place rises in column Y and in the glass to a level above that of the water in the boiler. In other words, the gauge shows a false level. If now E be opened and water is blown out, then on E being again closed the water in the gauge will rise higher than before and be still further misleading. On the other hand, when B, D and A are clear and C choked, the water, if any, in the glass is trapped and no longer rises and falls with the water in the boiler or with the motion of the vessel; it, however, slowly rises in the glass owing to the condensation of the steam in the upper part of the gauge until such time as E is opened when the whole of the water in the glass is blown out, and on E being closed the glass does not show any water notwithstanding that the water in the boiler may be at the proper level. When the test cocks T T T are attached to column Y, as shown in Figure 3, they cease to be reliable when either cock A or C or the pipe in connection therewith is choked, or nearly choked.

REFERRING TO FIGURE 4 ONLY.

Sometimes the water-gauge fittings are arranged as shown in Figures 4 and 5, with no passage up the column, the central portion (N) of the column being simply a pillar or connecting piece of any convenient section

between the upper and lower portions to which the cocks B and D are attached.

By this arrangement double communications are obviated and there is no need for what is known as "double shut off" in testing the accuracy of the gauge. When, however, the gauges are constructed in this manner the cocks B and D are unreliable as test cocks in the event of there being no glass in the gauge. This feature should be carefully noted. Moreover, when in working condition the reduction of pressure in the glass which arises when E is opened causes the water in pipe H to rise above its normal level. This objectionable feature should also be noted.

REFERRING TO FIGURE 5 ONLY.

Sometimes there is a bend, L, in the steam pipe I leading from cock A to cock B. This has occasionally escaped observation when new boilers have been fitted on board ship. In most cases this bend arises from the pipe being led in an abnormal direction to escape other pipes, beams or fittings near the smoke box. With such a bend the condensed steam collects in the pipe and falls to the bottom of the bend, and in time it completely fills the pipe from J to K. The steam from K down to the level of the water in the glass is thereby trapped and, as condensation proceeds, leads to a reduction of pressure in the pipe below that of the boiler and an equivalent rise of the water in the bend and also in the gauge glass. When the vessel is quiescent the water in the gauge glass increases in height until cock E is opened or until the pressure in the boiler is so much in excess of that in the lower part of pipe I as to cause the water in the bend to be blown into the gauge glass In either case instantaneous change of water level in the glass ensues.

In the ordinary course of working the phenomenon described above is more or less modified by the presence of air in the upper part of the gauge and by the rise and fall of the water in the boiler and gauge glass arising from the rolling or pitching motions of the vessel.

OTHER SPECIAL POINTS TO BE NOTED.

When the cocks A and C are omitted, as in Figure 2, it is owing to the bore of the stand pipe being sufficiently large to enable it to be regarded as part of the boiler. Such pipes require, however, to be examined and cleared at intervals by passing a rod through the holes provided for the purpose at P.P. and Q.Q.

Cocks at A and C are not necessary for the testing of gauges arranged as shown in figures 4 and 5. Examiners ought, however, to make sure that candidates are aware of the impossibility of testing the reliability of the indications of water-gauges arranged as in Figure 3 when the cocks A and C are absent and of the effect which the choking of cock A or C, or pipe H or I has on the indications of the test cocks T.T.T. attached to column Y.

Probably more than half the steamers afloat are fitted with water-gauges as shown in Figures 3 and 4, and it is therefore specially important that engineer candidates should thoroughly understand their construction, the principle on which they act, and the steps which must be taken to keep them in an efficient condition.

When fitting a gauge glass into its place it is specially important that it should not be placed so high as to prevent a clearing rod being inserted at G, Figures 1, 2, 3, 4 and 5. This defect, especially if it occurs in a water-gauge attached to a boiler subject to priming, permits a rapid accumulation of scum around the top of the glass and results in the choking of the orifice leading from cock B to the gauge glass in each of the figures.

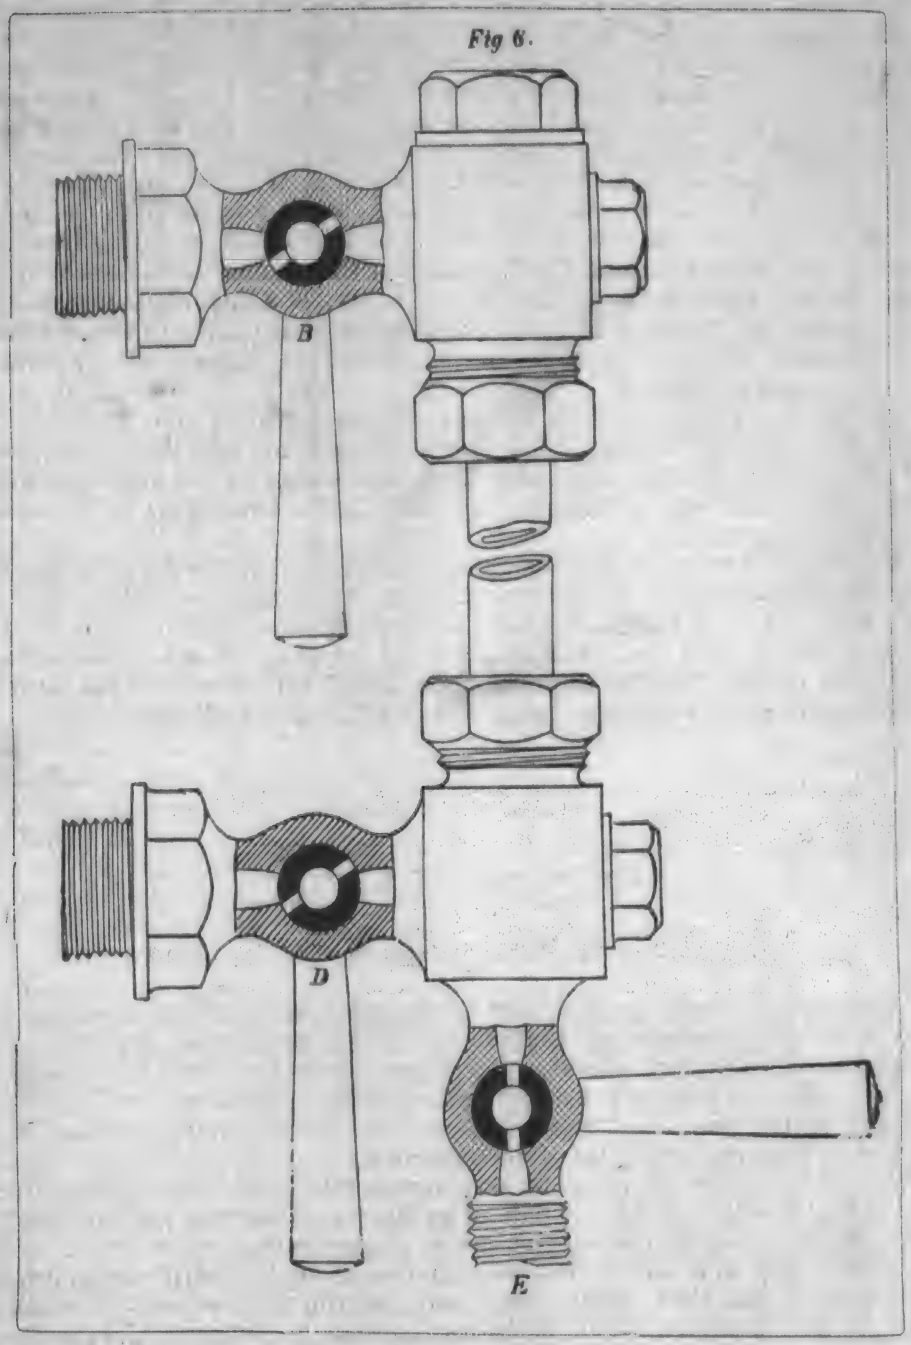
When a gauge glass is too short or is placed either too high or too low in the fittings, it is also liable to become choked by the packing material being forced over its ends by the glands whilst being screwed up.

The use of unsuitable or insecure internal pipes in connection either with the ordinary glass gauge cocks of the description shown in Figure 1, or with test cocks which are jointed to the boiler itself should also be carefully guarded against.

Boiler casualties have resulted from the cocks B and D having the parts wrongly placed as shown in Figure 6, Plate II. In one case of that kind

Plate II.

Fig 6.



which forms the subject of Report No. 208 under the Boiler Explosions Acts, the engineer in testing the water-gange omitted to see that the passages in the cocks B and D were clear *when the handles were in their proper working position.* This defect could easily have been discovered if proper attention had been paid to the condition of the cocks. A defect of this nature may be due to faulty construction originally, or to the handle of the cock having been overstrained, and the neck twisted. Whether the passages in the plugs are fair and clear can, however, be verified in a few minutes. As an illustrations, the water cock D, Figure 6, Plate II, can be verified by blowing through E with B shut and then moving the handle of D to one side until it is just closed, and then to the other side until it is again just closed; the proper working position of the handle is about equally distant from each of the above positions. The other cocks can be verified in the same manner.

Another serious casualty occurred through the handle of the cock A, Figure 3, having been twisted from its original position relatively to the orifice of the cock, resulting in the cock being shut when apparently open.

When a water-gauge, that is clear in all its parts, has been thoroughly blown through, the water in the glass rises above the level at which it formerly stood, immediately the drain cock E is closed, but if left undisturbed for a time it gradually falls to its former position. The amount of rise which occurs on these occasions depends chiefly on the temperature of the contents of the boiler and on the length of the pipes by which column Y is connected top and bottom to the boiler, but in cases where the gauge is of the description illustrated in Figures 3, 4 and 5, it amounts in high pressure boilers to about 4 inches, while the time occupied by the water in returning to its former level ranges from 30 to 40 minutes. The cause of this rise is twofold, namely (*a*) the displacement of the comparatively cold water in pipe H by hotter and proportionately lighter water from the boiler, and (*b*) a slight condensation of the steam and a corresponding fractional reduction of pressure in pipe I. The cause of the gradual subsidence of the water in the glass to its former level is also of a dual character, namely (*a*) the cooling of the water in pipe H, and *b*) the diminution in the condensation of steam in pipe I owing to the collection therein of air released from the steam condensed.

These results will, however, be somewhat modified if the water in the boiler is of higher density than in pipe H, and this will nearly always be the case owing to the condensation of the steam in the glass and upper fittings of the water gauge, causing the water in the lower part to be fresher than that in the boiler.

The examiner should impress upon candidates the necessity for periodically blowing through the water-gauge on each boiler (no matter what the form may be) in a systematic and thorough manner, and, in cases where a boiler is fitted with two water-gauges, of keeping both in constant use: finally he should further impress upon them the necessity for keeping the water-ganges well-lighted, clean, and in all respects efficient.

APPENDIX E.

EXAMINATION OF MASTERS AND MATES IN STEAM.

These examinations are provided for the purpose of giving Masters and Mates who are possessed of Certificates of Competency an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam engine. The endorsement of a Master's or Mate's Certificate for "Steam" does not, however, imply that he is qualified to perform the duties of an Engineer.

The examination is open to any person who holds a Certificate of any grade in the Foreign or Home Trade or as Master of his own pleasure yacht.

Candidates should fill up the form of application, form Exn. 2, at the Port Office, pay the fee of Rs. 15, and deposit their Certificates and testimonials with the Port Officer, who will inform them when and where to attend to be examined. The usual testimonials for sobriety and good conduct for at least the last 18 months preceding the date of application to be examined must be produced.

If the candidate passes, form Exn. 15, together with a written report of the examination, should be sent to the Port Officer and the candidate's Certificate, together with the form Exn. 2, will be sent to the Government. The words "Certified to have passed in Steam" with the date and place of examination will then be entered on the Certificate and its counterpart, and the Certificate will be sent to the Superintendent of the Mercantile Marine Office of the port named in the form Exn. 2, and will be delivered to the candidate in the usual manner.

If the candidate fails to pass his Certificate will be returned to him at once, but he may not present himself for re-examination until the expiration of three months from the date of failure.

The examination is for the most part *vivâ voce*, and extends to a general knowledge of the practical use and working of steam engines and boilers, and of the various valves, fittings, and pieces of machinery, connected with them and of the way in which electric lighting is carried out on board ship.

Candidates must—

(*a*) Know the names and understand the uses of the various parts of engines and boilers, and their connecting pipes, valves, cocks, etc.

(*b*) Have a thorough grasp of the construction of the steam-engine and boiler, to enable them to understand the nature and importance of any defect which may be reported to them by the Chief Engineer.

(*c*) Have a looking-on knowledge of what the principal repairs about engines, boilers and pipes are, and how these repairs are accomplished.

(*d*) Be able to form an independent opinion as to a break-down, and the consequent propriety or impropriety of proceeding under steam with temporarily repaired or defective machinery.

(*e*) Understand how to estimate approximately the reduction of fuel required for reduced speed, and be able to satisfy themselves as to the sufficiency of the coal on board for the voyage.

(*f*) Have an intelligent grasp of the general run of pipes and connections in the engine-room, the working of cocks, the opening and closing of cocks and valves, and know how mistakes of importance may be made and how best to guard against such mistakes.

(*g*) Be capable of being left in charge of the feeding of a set of boilers, understand the working of the water gauge, and be able to guard against being misled by false indications of the gauge glass.

(*h*) Understand the operations of blowing down and surfacing, the reasons for such practices and the danger which may result from the neglect of them in certain circumstances.

A Master or Mate presenting himself for examination in Steam must be understood to have made up for his want of practical experience by reading about the steam-engine. He ought, therefore, to show that he intelligently understands the rationale of its action. Under this head he should be able to state approximately the quantity of heat required in the formation of steam, the relation of "latent" heat to "sensible" heat, how much steam can be raised by the combustion of one pound of coal, what horse-power measure is, what indicated horse-power is, what is, the action of the slide valve, the course of the steam through the engine, the advantage of working expansively, and how the expansive action is shown by the indicator diagram.

He should know the uses of the various parts of the engines and dynamos used for electric lighting, and how they and the cables are fitted in the hull; how wires are joined, insulated and cased; why it is desirable that they should be led along places which are dry and accessible; what "short circuiting" is and what are the causes which produce it; what is its danger in coal bunkers and petroleum carrying steamers; what are the uses of switches and cut-outs, and why it is so important to prevent short circuiting taking place.

Candidates will be required to give written answers to sixteen out of twenty questions taken from the Elementary Questions printed in Appendix B and given on the sheets marked "Steam," or questions similar to these. These questions will be altered from time to time without notice. The twenty questions will not be difficult, theoretical, or book questions, but such as any man of ordinary capacity who has a fair amount of practical knowledge of the use of working of the steam-engine ought to answer.

Examiners will require all candidates to fill up a form Exn. 15*b*. (*see* Appendix A), and they will forward it to the Port Officer with the report of the examination.

Masters and Mates may cancel questions A, B and C, but they should fill up the form for questions D, E, F and G, as evidence of their practical knowledge.

If a candidate refers to any book, paper or memorandum, or obtains information from another candidate or any other person during the examination, he will be treated as having failed, will forfeit his fee, and will not be allowed to be re-examined for a period of six months.

The Examiners will report, in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engines or boilers in which the candidate was deficient.

Applicants for the voluntary examination need not necessarily have served on board steamships; all that is required is that they shall have a practical knowledge of the use and working of the steam-engine.

Practical knowledge is best gained in the engine-room; and the examination of an officer who does not produce official evidence of service in steamships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience.

The answers to the Elementary Questions are frequently given by candidates as learned by rote from a book. Candidates should, therefore, be asked such *viva voce* questions as will necessitate answers in different words, so as to discover whether they have the root of the matter in them.

A large part of the *viva voce* examination should be conducted on board a steamer, preferably one with which the candidate is unacquainted. He should be told to look about and try to find out the arrangement of the machinery without assistance, and the Examiner should be in the engine-room to see that this independent examination is properly carried out. When the candidate reports that he thinks he knows the arrangement, the Examiner will question him on the uses of the parts, get him to point out the different cylinders, pumps, valves, condenser, etc.; also the dynamo, its field magnets, armature, commutators, brushes, cables, etc. The candidate must show that he understands the run of the pipes in the bilges, not necessarily that he has gone over every one of them, but he ought to be directed to trace, at least, one important range of pipes, and to thoroughly satisfy the Examiner that he could be safely trusted to manipulate the valves or cocks in connection therewith. It will not often be practicable for the candidate actually to work engines under steam, but he must satisfy the Examiner that he knows how to do so, and that he is aware of the precautions to be taken in regard to water in the cylinders, etc. It is most important that a candidate should show that, in the event of an accident depriving him of the assistance of Engineers, he knows what to do to safely take his vessel to an anchorage, or to stop the engines and proceed under sail alone.

The examination of a Mate in steam is the same as that of a Master. The knowledge required has no reference to the Mate's position.

A mate may be examined, but such examination implies that the Mate may one day be a Master, when the possession of the knowledge will be an advantage to him in the discharge of his duties.

TECHNICAL SCHOOLS RECOGNISED BY THE GOVERNMENT.

The following is a list of Technical Schools attendance at which is recognised by the Government as affording remission of some period of the service required to qualify a candidate for examination for a Certificate of Competency as Engineer.

(I) DAY CLASSES.

When nothing is stated to the contrary, time spent in attending the day classes in Mechanical Engineering of a recognised Technical School is accepted as equivalent to artisan service at the ratio of three years of the former to two of the latter, provided the applicant was over 15 years of age and can produce the Principal's certificate for continuous and regular attendance at all the approved classes and for satisfactory progress. Such time cannot as a rule be accepted as equivalent to more than two years' artisan service.

[Third publication.]

The 24th July 1917.

No. 67Marine.—The following draft of amendments which, with the previous sanction of the Governor-General in Council, the Governor in Council, in exercise of the power conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), intends to make in the rules for regulating the importation, possession and transport of petroleum, published under Bengal Government Notification No. 143Marine, dated the 30th November 1914, is published for the information of persons likely to be affected thereby.

II. The draft amendments will be taken into consideration on or after the 25th August 1917, and any suggestion or criticism with regard thereto received by the undersigned before that date, will be duly considered.

F. A. A. COWLEY,
Secy. to the Govt. of Bengal.

Draft amendments.

1. *For* rules 14 and 15, Chapter II, Part II, the following shall be *substituted*, namely :—

"14. Petroleum which has been imported into any port specified in rule 1 of Part III and which has not been tested at the port of import in accordance with the rules contained in that Part, shall not be transported to any other port save one at which importation is permitted under rule 1 of Part III, and the provisions of all the rules of that Part, except rule 22, shall be deemed to apply to such petroleum when it arrives at such other port.

Transport by sea of petroleum which has not been tested.

15. Petroleum which has been tested at the port of import may be transported to any other port, and the provisions of rules 2, 3, 4, 14 (except the proviso), 16, 19 and 20 of Part III shall apply to such petroleum when it arrives at such other port."

Transport by sea of petroleum which has been tested.

2. *For* rules 20 and 21 of Part III, the following shall be *substituted*, namely :—

"20. When petroleum imported otherwise than in bulk is landed at a port, it shall be landed either at jetties provided for the purpose, or in cargo-boats, and except where electric light is exclusively used, only after sunrise and before sunset, and only at such place or places as the Conservator of the port shall direct, subject to any Customs Notification that may, for the time being, be in force :

Landing of petroleum otherwise than in bulk

Provided that the precautions laid down in rule 21A of this Part shall be observed.

21. Petroleum may be transhipped from one ship to another for conveyance to any other port, whether within or beyond the limits of British India, provided that the petroleum shall not be transhipped between sunset and sunrise, except when electric light is exclusively used, and provided further that the precautions laid down in rule 21A of this Part shall be observed.

Transhipment of petroleum

21A. The following precautions shall be taken by all vessels and cargo-boats loading or unloading petroleum, whether for transhipment or otherwise :—

Precautions to be observed in loading or unloading petroleum

(*1*) Vessels discharging or loading petroleum shall have fire-hoses connected and all fire extinguishing appliances in readiness for immediate use, and, if the petroleum is dangerous petroleum, shall have their awnings furled.

(*2*) No fire or light of any description (other than lights required by the port or harbour rules) or any detonating article or substance whatsoever, or matches, shall be, or shall be taken, on board any cargo-boat used for the transport of dangerous petroleum, or, within the limits of any port, for the transhipment of non-dangerous petroleum to or from any vessel.

(*3*) No cargo-boat used for the carrying of dangerous petroleum shall be fitted with a caboose for cooking purposes when engaged in such work.

(4) Dangerous and non-dangerous petroleum shall not be conveyed to the shore or to another ship at the same time on the same cargo-boat.

(5) Leaky tins containing dangerous petroleum shall not be discharged into a cargo-boat containing sound tins.

(6) The bilges of every cargo-boat which has carried a cargo of petroleum shall, immediately after the cargo-boat has been unloaded, be thoroughly cleared of all traces of such petroleum and dried and the holds shall be thoroughly ventilated."

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the Fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The Fund is now of ten years' standing and has a balance of over three and-a-half lakhs with Government on four per cent. interest. For forms of applications and rules of the Fund apply to the Comptroller, India Treasuries, Imperial Secretariat Buildings, Calcutta.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES viz.

CALCUTTA, MADRAS BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 6th August 1917.

Summary.—During the week under review moderate to heavy rain was general throughout the province. Transplanting of winter rice still continues but is nearing completion in some districts. Harvesting of autumn paddy and jute is proceeding. Floods due to rise of rivers are reported from parts of Burdwan, Howrah and Midnapore, but the extent of damage has not been ascertained. The condition and prospects of jute and other standing crops are on the whole fairly good. Damage by insects to jute continues to be reported from the 24-Parganas, Nadia, Murshidabad, Khulna and Hooghly districts. Cattle-disease is reported from five districts. The average price of common rice remained stationary as compared with that of the previous week, with just a slight tendency to rise.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade of the Calcutta Block* in certain selected articles during the months of April and May, 1917, by all routes, *i.e.*, by rail, river, canal, road, and sea. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the District Magistrates of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta by rail river, canal, road and sea (coastwise) during the months of April and May 1917, amounted to 1,644,000 maunds as against 2,941.000 maunds in the corresponding period of the preceding year—a decline of 44 per cent§. There was a slight decrease in the imports of coal and coke (18,242,000 maunds as against 19,615,000 maunds last year). The imports by rail, river, road and sea (coastwise) of Indian cotton piece-goods showed a decrease of 23 per cent, the total value amounting to Rs. 44,73,000 as against Rs. 57,96,000 in 1916. The quantity of indigo imported during the months of April and May, 1917, fell by 60 per cent (400 maunds as against 1,000 maunds last year), the decline being solely due to the absence of any supply from Madras. The imports of raw jute amounted to 359,000 bales as against 302,000 bales—an increase of 18 per cent. The importations of gunny bags also showed an increase of 22 million bags or 40 per cent (76 million bags as against 54 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) decreased by 50 per cent (1,436,000 maunds as against 2,869,000 maunds). There was a considerable increase in the imports of tea by 42 per cent (211,000 maunds as against 149,000 maunds), and in those of sugar by 36 per cent (162,000 maunds as against 119,000 maunds).

Exports.—The exports of cotton piece-goods, foreign, from Calcutta by all routes during the months of April and May, 1917, increased by nearly 1 per cent (Rs. 4,45,39,000 as against Rs. 4,42,94,000 last year). The exports of gunny bags, including the exports by sea to foreign countries, increased from 167 million bags to 206 million bags. The shipments of gunny bags to foreign countries other than the United Kingdom increased by 19 million bags in the period under review, and those to the United Kingdom by 18 million bags. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 908.000 maunds to 896,000 maunds.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.
§ The import of Burma rice into Calcutta has been prohibited with effect from April, 1917.

REVENUE DEPARTMENT.

NOTIFICATIONS.

No. 5964For.—The 13th August 1917.—Mr. J. C. Carroll, Deputy Conservator of Forests, Bengal, is allowed combined leave for six months, with effect from the 8th July 1917, viz., privilege leave for three months under article 260 of the Civil Service Regulations, and furlough for the remaining period under article 308 (*b*) of the Regulations.

No. 5742L.R.—The 6th August 1917.—The following rules are published for general information :—

Rules for the Suspension and Remission of Land Revenue on account of Agricultural Calamities.

Introduction.

1. The Resolution of the Government of India, No. 3—99-2, dated the 25th March 1905 lays down the principles to be followed in granting suspension and remission of land revenue during agricultural calamities. The main object in view is to give relief to the cultivating classes when they are unable to pay their rents on account of failure of crops. The following rules are based on these principles for the general guidance of Revenue Officers.

Classification of calamities.

2. Agricultural calamities shall be classified as—

(*a*) "Widespread," such as famine, drought, and general failure of crops over whole estates and over large areas, and

(*b*) "Local" or isolated, such as are occasioned by hail, floods, locusts and the like, in which the failure of crops is not uniform and does not extend over large areas.

Applicability of the rules.

3. The rules below apply, however, in the main to both classes of calamities; the only specific exceptions relating to "local" calamities are those contained in rules 8 and 13, which contemplate a field-to-field inquiry in such cases. In dealing with "widespread" calamities, on the other hand, relief, if it is to be as prompt as is essential, must be based on information relating to entire villages or homogeneous groups of villages.

Effect of suspension or remission of land revenue on cess demand.

4. In deciding what proportion of the land revenue should be suspended or remitted, the Collector should take into account the fact that, in accordance with the principles laid down in Government of India's Resolution No. 13—356-10, dated the 21st August 1906 (*vide* Appendix H to the Cess Manual), where only a proportion of the land revenue of an estate is suspended or remitted, the cess will nevertheless continue to be collected as usual; but that where an instalment of land revenue is wholly suspended or remitted, the cess demand will be suspended and should be realized with the next instalment of land revenue which is collected.

I.—ESTATES DIRECTLY MANAGED BY GOVERNMENT.

Inquiry in the case of widespread calamity.

5. When the Collector has reason to believe that there has been, or will be, so great a failure of crops as to render it probable that suspension or remission of land revenue may be necessary, he shall at once either himself proceed, or shall depute an officer of as high a rank as may be available, but not below the rank of a kanungo, to make an inquiry into the extent of the failure in the estates affected by the calamity.

Proportion of land revenue to be suspended or remitted.

6. On receipt of the officer's report and after such test of the report as may be possible, the Collector shall decide whether the calamity is to be treated as belonging to class (*a*) or to class (*b*), and shall proceed to determine the amount of revenue which should be recommended for suspension or remission, as the case may be.

Immediate relief.

7. In the case of widespread calamity, the enquiry under rule 5 shall be made as promptly as possible, and, to obviate delay therein, the Collector may, in submitting his original proposal, base his report as to the degree of immediate relief necessary on the agricultural conditions of entire villages or homogeneous groups of villages.

If, after making such report, the Collector finds reason to believe that the agricultural conditions of any village have been incorrectly reported, he may submit a modification of his original proposal accordingly.

Form of relief.

8. In the case of a widespread calamity, relief shall, where possible, be given in the first instance in the form of suspension of land revenue.

In cases of local calamities where field-to-field inspections have been made and properly checked, remissions may be made without preliminary suspension when the circumstances, in the opinion of the authority competent to sanction remissions, justify it.

Method of calculation of damage.

9. In submitting his proposals for suspension or remission, the Collector shall have regard to rule 4 above, and shall take into consideration the relation which the crop which has failed bears to the sum total of the crops of the year on the area affected, as well as the previous history of the tract affected.

Explanation.—If the *aghani* crop normally represents 60 per cent. of the year's crops, and the *bhadoi* 20 per cent. and the *rabi* 20 per cent., and if 50 per cent. of the *aghani* is lost and the *bhadoi* has been an 80 per cent. crop, and a 75 per cent. *rabi* may be anticipated, the calculation is $(\frac{60}{100} \times \frac{50}{100}) + (\frac{20}{100} \times \frac{80}{100})$ or $\frac{30+16}{100} = 46$ per cent. for the crops already secured, and a probable $\frac{75}{100} \times \frac{20}{100}$ or 15 per cent. on account of the *rabi* expected. Such a loss of crops would not ordinarily by itself constitute a sufficient ground for recommending suspension of revenue, unless the previous history of the tract is unfavourable.

Limitation on grant of relief.

10. The suspension or remission of revenue shall not ordinarily be granted, except in the case of a failure which causes a loss of more than half the normal crops of the whole year. The case of every village or homogeneous group of villages shall be considered on its merits, and no relief shall be given, unless it is found necessary.

Consideration of crops of previous years.

11. The Collector shall, however, take into consideration the crops of the two preceding years, and where the crops of these two years have been less than half the normal, or where any revenue is already under suspension, the provisions of rule 10 may be relaxed and a special recommendation for suspension or remission may be made. Similarly, if the result of such an examination is favourable to the area, the suspension or remission may be less than the scale.

Scale of relief.

12. A scale of relief is laid down below for general adoption, which shall be taken as a maximum scale and should not be exceeded except in special cases for which there is a full and satisfactory explanation :—

Actual outturn of year's crops (normal outturn being 100.)	Degree of relief.
40 per cent. and less than 50 per cent. of the year's normal crops...	25 per cent.
25 " " 40 " " " " ...	50 "
Less than 25 per cent. of the year's normal crops ...	100 "

Inquiry in the case of local calamity.

13. In dealing with local calamities falling under class (*b*), as a field-to-field inquiry will have been made of the extent of the failure, consideration shall also be given to the loss suffered by each tenant in comparison with his total income, and no relief shall necessarily be given to a tenant whose crops or whose sub-tenants' crops have been destroyed upon fields forming only a small portion of his entire tenancy.

Principles of remission.

14. It shall be the business of the Collector to make recommendations for the remission of revenue when he considers it necessary, and in doing so he shall be guided by the principles laid down in paragraph 12 of the Resolution of the Government of India (cited in rule 1), which are here reproduced :—

"As soon as it becomes clear that it will be inadvisable to collect suspended revenue or any particular portion of it, it should be remitted at once. It is most undesirable to keep suspensions hanging for long over the heads of the revenue-payers; and the Government of India are of opinion that revenue which has been under suspension for three years should ordinarily be remitted as a matter of course. They are also prepared, in the case of fully assessed tracts with an outturn which is fairly constant, to

accept a rule which would limit the amount of revenue under suspension at any given time to the equivalent of the revenue demand of an ordinary year. In the latter case it would not follow that, when suspensions exceeded the limit, the whole amount suspended should be remitted, and, logically speaking, only the balance by which they were in excess should be so dealt with. But in the case of calamities so severe as to call for heavy suspensions, greater liberality than this will, no doubt, be desirable. An absolute and general rule that the amount under suspension should never exceed a year's revenue would be open to objection, since there are many areas of fertile soil where there is no irrigation and the rainfall is uncertain in amount, and where on account of this uncertainty revenue is pitched so low that, in a really bumper year, the people could pay very much more than the revenue assessed without the slightest inconvenience."

Remission and collection of suspended revenue.

15. Where the damage caused to the crop is so severe that the Collector thinks that no portion of the suspended revenue should be collected afterwards, he shall, except in cases in which under the ordinary rules he has power to sanction remissions, at once report to the Commissioner the amount to be remitted. Where, however, he thinks that only a portion of the revenue should be remitted, he shall report to the Commissioner the percentage of revenue to be remitted. The balance in such case and, in cases in which no remission is granted, the whole of the suspended revenue shall be recovered from the tenants in such instalments as may be fixed, with the approval of the Commissioner, with reference to the character of the succeeding harvests from which it is recovered and the condition of the tenants at the time.

Intimation to tenants.

16. In every case full notice shall be given to the tenants concerned of the order of suspension or remission, if possible, one full month before the date when the *kist* falls due, and in any case before collection of the *kist* would ordinarily begin. The system of merely abstaining to collect without any declaration as to the amount to be suspended shall be discarded.

Postponement of collection until after one harvest.

17. As a general rule, no suspended revenue shall be collected until after one fair harvest subsequent to the failure has been reaped in the affected tract.

Report to Commissioner before recovery of an instalment.

18. The Collector shall report to the Commissioner, at least two months before the first instalment for any harvest falls due, the amount which he proposes to recover out of the suspended demand from the proceeds of such harvest, in addition to the current demand payable for such harvest.

Relief to extend to under-tenants.

19. The grant of relief to rent-payers shall be made conditional on their giving relief to under-tenants of all degrees.

Power of sanction—Suspension.

20. The Collector has power to sanction the suspension of the collection of revenue or rent for the year in which suspension is granted, but where the amount involved exceeds Rs. 5,000 in the aggregate, such suspension shall be provisional only and shall be subject to the confirmation of the Commissioner. When the Commissioner sanctions suspensions exceeding Rs. 10,000 in any one district in the aggregate, he shall at once report the fact for the information of the Board and of the Accountant-General. All suspensions for a longer period than one year require the sanction of the Board.

N.B.—It is essential that, if suspension is to have its full beneficial effect, the amount to be suspended should be settled, and that the decision to suspend should be communicated to those who would otherwise have to pay rent or revenue before the day on which payment becomes due. In urgent cases, therefore, the Collector is authorized to pass immediate orders, subject to the approval of higher authorities. In all cases the orders should be so published as to reach the people concerned in proper time.

Power of sanction—Remission.

21. The power to sanction remissions of revenue or rent suspended on account of agricultural calamities shall rest with the authorities competent to sanction remission of unrealizable revenue or rent in estates managed direct. But where the amount exceeds the revenue or rent for a whole year, the sanction of the Board is necessary. Remissions should be granted as soon as it becomes clear, after proper inquiry, that it would be inadvisable to collect the revenue or rent or any portion of it.

Instalments of realization to be settled by Commissioner.

22. The Commissioner should settle the instalments in which suspended revenue, which is not remitted, should be collected.

II.—TEMPORARILY-SETTLED ESTATES.

Suspension and remission in temporarily-settled estates.

23. In all temporarily-settled estates in which collections are made by a person responsible for the revenue to Government, the above rules shall apply, but no suspension or remission shall be given unless the settlement-holder agrees in writing to suspend or remit a proportionate amount of the current rent payable by the cultivators, or there is a condition in his lease binding him to do so if suspension or remission is granted to himself. The proportion may be that of 1 to 2, or in the ratio which the total revenue of the estate bears to the total rent demand, and the Collector should state which proportion he proposes to adopt.

Cancellation of the order granting suspension or remission.

24. If a settlement-holder collects or sues for rent to which he is not entitled under the agreement referred to in rule 23, or under any similar condition of his lease, the order suspending or remitting his revenue may be cancelled in full, and he will be liable to pay revenue as though no such order has been passed.

III.—PERMANENTLY-SETTLED ESTATES.

Suspension in permanently-settled estates.

25. In a permanently-settled area in which, under the rules of the Bengal Famine Code, test-works have been opened, a proprietor may apply for suspension of collection of the revenue of any estate situated within the area in which test-works have been opened. The applicant shall give a written undertaking not to collect any rents, either directly or through the medium of the Courts, from his tenure-holders and raiyats during the period for which he applies for suspension of revenue, and shall satisfy the Collector from the zamindari accounts and from such inquiries as the Collector may find it possible to make, that there are substantial current and arrear rents which have not been collected.

The Collector shall submit such applications with his recommendations through the Commissioner for the orders of the Board of Revenue, and, where the amount involved exceeds in the aggregate Rs. 25,000 in any one district, for the orders of Government.

Remission in permanently-settled estates

26. In a permanently-settled area in which, under the rules of the Bengal Famine Code, test-works have been opened, and a proprietor has declared that he has remitted the rent of the current year or of any portion of that year, and the Collector is satisfied from an inspection of the proprietor's accounts and such inquiry from the tenure-holders and raiyats as may be practicable, that a legal and binding remission has actually been made and that due intimation of the remission has been given to the tenure-holders and raiyats of the estate, a recommendation for the remission of the land-revenue of that estate may be submitted through the Commissioner for the orders of the Board, and, where the amount involved exceeds in the aggregate Rs. 15,000, for the orders of Government.

The remission proposed shall bear the same proportion to the rent remitted as the total revenue demand bears to the rent demand.

Where rent-paying tenures intervene between the proprietor and the cultivator, no remission to such a tenure-holder shall be included in the calculation, unless the remission granted to the tenure-holder has been extended to the cultivator in the proportion which the rent of the tenure-holder bears to the total rents of his cultivating raiyats.

IV.—COURT OF WARDS' ESTATES.

Suspension and remission in estates under Court of Wards.

27. The foregoing rules will apply *mutatis mutandis*, and, so far as may be, to estates under the management of the Court of Wards.

V.—GENERAL.

No distinction between assigned and unassigned revenue.

28. In granting suspension or remission, no distinction shall be made between assigned and unassigned revenue.

29. In all cases of suspension under these rules subsequent collection of such revenue or rent shall be made without interest.

Collection of suspended revenue free of interest.

30. When suspension or remission is granted, the Collector will forward to the Courts in which rent suits for the estate are tried full particulars of the suspensions or remissions and of the conditions under which they are made and the period for which they have been granted.

Intimation to Courts.

31. All suspensions and remissions shall be reported to the Board. Special reports shall be remitted to the Board through the Commissioner showing to what extent any suspension and remission will affect the budget estimates under land revenue for the current year, compensating additions to the revenue being noticed and taken to account. When the amounts involved are large, the orders sanctioning the suspensions or remissions will be communicated to the Revenue Department for the information of the Financial Department of Government.

Report to Government.

No. 5928L.R.—The 11th August 1917.—With reference to Notification No. 381L.R., dated the 11th January 1917, published at page 56, Part I of the *Calcutta Gazette* of the 17th idem, it is hereby notified for general information that the estimate of the probable expenses to be incurred in respect of the repairs, maintenance and works connected therewith, of the Takavi embankments in the district of Midnapore named in the above-mentioned notification, for a period of fifteen years, commencing from the 1st April 1919, amounts to Rs. 8,89,125 at an annual rate of Rs. 59,275, and that the Governor in Council proposes, under section 63 of Act II (B.C.) of 1882, to issue an order fixing the aforesaid total sum of Rs. 8,89,125 as payable at an annual rate of Rs. 59,275 during the said fifteen years by the zamindars of the estates benefited by such repairs, maintenance and works, should no valid objection thereto be preferred. The areas of the several *huddas* to be benefited by the embankments, the existing and the proposed cess demands, together with the rates at which these demands are at present recovered and will be recovered from the 1st April 1919 from the proprietors of each *hudda*, and the average annual expenditure incurred by Government during the period of 12 years from 1904-05, are shown in the statement below:—

No. 154Eccle.—The 10th August 1917.—The following notification of the Government of India, Department of Education, is republished for general information.

L. S. S. O'MALLEY,
Secy. to the Govt. of Bengal.

No. 237, dated Simla, the 19th July 1917.

NOTIFICATION—By the Government of India, Department of Education, (Ecclesiastical).

THE Governor-General in Council is pleased to direct that the undermentioned alterations shall be made in the Ecclesiastical rules published with the Department of Education Notification No. 212, dated the 10th May 1913:—

To Rule 1 (5) in Part I *add* the following:—

"Local Governments and Administrations including the Director-General of Military Works Services may, however, sanction works in cemeteries attached to churches, and in cemeteries the expenditure on which is Imperial, up to a limit of Rs. 1,500 at one time when the works are administered under these rules." Also *delete* the words "under the Home Department orders Nos. 49-65, dated the 8th February 1907", and "under the Home Department orders Nos. 58-71, dated the 18th February 1909," in this rule and in rule 2 in Part V.

For the existing rule 23-A., in Part V and the note to it *substitute* the following:—

"23-A Local Governments and Administrations including the Director-General of Military Works Services may sanction an original work including additions and alterations required for an existing Government church up to a limit of Rs. 1,500 at one time, provided that the total expenditure on the church does not exceed the total grant permissible under the rules in Part V. They are also authorised to incur, when necessary, expenditure in excess of that permissible under or not covered by the preceding rules on additions and alterations to a Government church or to a building subsidiary thereto, subject to a maximum aggregate of Rs. 500 in each case.

"*Note.*—The second sentence of this rule has effect from the 11th September 1910. Local Governments may also sanction such expenditure up to the limit mentioned above, even if the permissible grant had been exceeded prior to that date irrespective of the amount of such excess."

Also *add* the rule below:—

"23-B. The Government of India are authorised to sanction expenditure on the erection or alteration of a church which is either in excess of the permissible limit, or is not covered by the rules, subject to a limit of Rs. 1,500 for any one church."

To rule 27 in Part V *add* the following:—

"Local Governments and Administrations including the Director-General of Military Works Services may sanction proposals relating to the renewal and repairs of furniture and articles of service which are admissible under this rule."

No. 572San.—The 6th August 1917.—In exercise of the power conferred by section 2, sub-section (*1*) of the Epidemic Diseases Act, 1897 (III of 1897), and by the Notification of the Government of India in the Education Department, No. 143, dated the 13th April 1917, the Governor in Council is pleased to prescribe the following regulations for the prevention and control of cholera, for the medical inspection, isolation, observation and surveillance of persons suffering from or suspected of being infected with cholera in the Asansol Mining Settlement:—

Regulations for the Prevention and control of cholera in the Asansol Mining Settlement.

Definition.

1. In these regulations, unless there is anything repugnant in the subject or context:—

(*a*) the expression "Chief Sanitary Officer" shall mean the Chief Sanitary Officer appointed by the Local Government for mining settlements under section 5 of the Bengal Mining Settlements Act, 1912 (Bengal Act II of 1912);

(*b*) the expressions "Agent," "employed," "mine" and "owner" shall have the same meaning as in section 3 of the Indian Mines Act, 1901 (VIII of 1901);

(*c*) the expression "Board" shall mean the Mines Board of Health of Asansol;

(*d*) the expression "District Magistrate" shall have the same meaning as in section 101 of the Code of Criminal Procedure (Act V of 1898);

(*e*) the expression "suspected cholera" means any disease accompanied by vomiting and diarrhœa.

Notices.

2. Whenever any land is held jointly by two or more persons, whether as owners or occupiers of that land, such persons shall be held jointly and severally liable for carrying out any measure ordered in a notice under these regulations, and the names of any one or more of such joint-holders may be entered upon such notice at the discretion of the Chief Sanitary Officer and the Chief Sanitary Officer shall not be bound to enter the names of all the joint-holders in the notice.

3. If in any case the Chief Sanitary Officer considers that the issue of a notice is likely to lead to such an amount of delay as might facilitate the spread of cholera, he may forthwith take such steps as he may think fit, for carrying out the work, and shall thereafter as soon as possible issue a notice on the person concerned stating the reason why such work has been carried out.

4. If any measure which the Chief Sanitary Officer has, by a notice issued under any of these regulations, required to be carried out, be not carried out to his satisfaction or within the time stated in the notice the Chief Sanitary Officer shall be entitled to carry out the measure.

Costs and Compensation.

5. (*1*) Expenses incurred in carrying out any work required to be done in pursuance of an order issued under these regulations shall be paid by the Board except in cases where the order requires action to be taken by any person as regards property in his possession in which cases the expenses shall be paid by that person:

Provided that where the conditions, which led the Chief Sanitary Officer to pass such an order, are not attributable to the act or default of the person in possession of the property, the Board may pay to such person the whole or part of the expenses incurred by him in carrying out the order.

(2) The Board may recover all expenses incurred by the Chief Sanitary Officer in carrying out the measures under regulation 4 from the person or persons to whom the notice was originally issued.

5A. The Board shall pay adequate compensation to any person who has sustained substantial loss or damage by reason of anything done under these regulations:

Provided that no person shall receive any compensation for anything done or suffered under these Regulations, if he has failed to carry out an order issued under these Regulations within the time specified in the order, or to the satisfaction of the Chief Sanitary Officer.

The Location of Diseases.

6. Every owner, agent or manager of a mine shall supply to the Chief Sanitary Officer such periodical returns of births and deaths and of the persons residing upon their property as he may call upon them to furnish.

7. Every village headman, village accountant, village watchman, village police officer, owner or occupier of land and the agent of such owner and occupier, and every officer employed in the collection of rent on behalf of Government or the Court of Wards shall forthwith communicate to the nearest servant of the Board or to the office of the Board any information he may obtain regarding the occurrence in such village or land of any case or suspected case of cholera.

8. Every owner, agent or manager of a mine shall supply to the Chief Sanitary Officer such periodical returns of cases of sickness as he may from time to time call upon them to furnish.

9. Every owner, agent and manager of a mine shall furnish to the Chief Sanitary Officer immediate information regarding the occurrence of any case or suspected case of cholera occurring within the boundaries of the property or mineral rights of such mine.

10. The Board may employ a suitable staff for the purpose of making enquiries as to the existence of any case of cholera.

11. The Chief Sanitary Officer may examine any person who is, or is suspected to be, suffering from cholera or who, in his opinion, may be infected with or is likely to spread cholera.

Isolation and Segregation, and Evacuation of Houses.

12. When the Chief Sanitary Officer considers that the isolation of any person suffering from cholera is a precaution necessary for the protection of the neighbouring population, he may order such person to be isolated in such a manner and for such a time as may be approved by the Chief Sanitary Officer.

13. The Chief Sanitary Officer may order that any person who has been in contact with a person found to be suffering from cholera shall be segregated for a period not exceeding 10 days in a manner and in a place to be approved by the Chief Sanitary Officer.

14. No person shall enter any place wherein persons are isolated or segregated under regulations 12 or 13 without the permission of the Chief Sanitary Officer.

15. The Board shall provide free of charge suitable places with necessary attendants, diet, food, etc., for persons isolated or segregated by order of the Chief Sanitary Officer, and the Chief Sanitary Officer may certify places provided by private individuals as being fit for the purpose of isolation or segregation of persons under regulation 12 or 13 as the case may be.

16. (1) When the Chief Sanitary Officer under regulation 12 or 13 has ordered the isolation or segregation of any person residing upon any colliery lands, the Chief Sanitary Officer may notify the fact in writing to the owner, agent or manager of such colliery.

(2) If such person disobey the order, such owner, agent or manager shall furnish to the Chief Sanitary Officer immediate intimation of the movements of that person.

17. No person who is or has been suffering from cholera shall leave the place where he has been staying until he has received from the Chief Sanitary Officer written permission to do so.

18. The Chief Sanitary Officer may by a notice in writing (1) require any person to carry out, or allow to be carried out by such agency as the Chief Sanitary Officer may appoint, within a time to be stated in the order, such measures for the disinfection or evacuation of his dwelling house or for the disinfection or destruction of any of his personal effects as the Chief Sanitary Officer may consider necessary, and (2) direct any owner, agent or manager of a mine, or any landholder or his agent to carry out any such measures on behalf of any person resident or staying upon the land belonging to the owner or landholder.

19. Every owner, agent or manager shall make such arrangements for the immediate disinfection of infected premises and personal effects and of evacuation and excreta of persons employed by the colliery and resident in a building owned by the colliery who are suffering or suspected to be suffering from cholera as the Chief Sanitary Officer may from time to time direct by general or special order.

20. The Board shall from time to time provide, without any charge to the person on whom an order is passed under regulation 18 (1), temporary shelter or house accommodation with necessary attendants for the members of any family who have been compelled to evacuate their dwellings under regulation 18.

21. The Chief Sanitary Officer may order any owner, agent or manager of a mine to provide such hospitals, temporary shelters or house accommodation as the Chief Sanitary Officer may approve for the purpose of isolating, segregating or accommodating, under regulations 12, 13 and 20, persons or the families of persons employed on or about such mine by such owner, agent or manager.

Closing of Infected Sources of Water-supply and Draining or Levelling of Land.

22. (*1*) When the Chief Sanitary Officer is of opinion that the water in any well, tank, pool or other possible source of water-supply is contaminated or is likely to be contaminated, he may at once take such steps as he deems necessary to close such well, tank, pool or other source of water-supply, or may by a notice in writing require the owner or occupier of land upon which such well, tank, pool or source of water-supply is situated, to take steps to close the same to the satisfaction of the Chief Sanitary Officer within such time as may be specified in the notice.

(*2*) The Chief Sanitary Officer may by a notice in writing require such owner or occupier to keep closed during such a period as shall be specified in the notice any well, tank, pool or other source of water-supply closed under paragraph (1) of this regulation.

Explanation.—To close includes the placing of chowkidars to prevent access to the well, tank, pool or other source of water-supply.

23. When the Chief Sanitary Officer is of opinion that the water in any well, tank, pool or source of water-supply is contaminated he may disinfect it or order its owner or occupier to disinfect it with such disinfectants as he may specify in such quantities and at such times as he may think fit.

24. (*1*) When the Chief Sanitary Officer is of opinion that the water in any well, tank, pool or other source of water-supply is contaminated or is likely to be contaminated, he may at once take such steps as he deems necessary to drain or otherwise empty such well, tank, pool or source of water-supply, or may by a notice in writing require the owner or the person in possession of such well, tank, pool or water-supply to drain or empty the same in such a manner and within such a time as shall be specified in the notice.

(*2*) The Chief Sanitary Officer may by a notice in writing require such owner or person in possession to keep drained or empty during such a period as shall be specified in the notice any tank, well, pool or other source of watersupply drained or emptied under paragraph (*1*) of this regulation.

25. The Chief Sanitary Officer may by a notice in writing prohibit persons from entering into or using for drinking, bathing, or any other purpose, during such period as may be specified in such notice, the water in any well, tank, pool or other possible source of water-supply which in his opinion is contaminated or likely to be contaminated.

26. The Chief Sanitary Officer may by a notice in writing require the owner or occupier of any land which in the opinion of the Chief Sanitary

Officer is not properly drained to drain such land to the satisfaction of and in a manner approved by the Chief Sanitary Officer within a period to be fixed in the notice.

27. The Chief Sanitary Officer may by a notice in writing require the owner or occupier of any land—

(*i*) to fill up, deepen, or cleanse as the Chief Sanitary Officer may direct any well, tank, pool, or source of water-supply situated on such land, or

(*ii*) to fill up or level any hollow or inequality situated wholly or in part upon such land, within such time as may be specified in the notice.

Provision of Water-supply.

28. The Chief Sanitary Officer may, by an order published at such places as he may think fit, set apart any well, tank, part of a river, stream or channel not being private property, or being private property with the consent of the owner, for the supply of water for drinking or culinary purposes and may prohibit therein or within a distance therefrom to be stated in the order all bathing, washing of clothes or animals, or other acts calculated to pollute the water; and may similarly set apart any well, tank, part of a river, stream or channel for the purpose of bathing or for the purpose of washing animals or clothes or for any other purpose connected with the health and cleanliness of the people using such water-supply.

29. The Chief Sanitary Officer may require every owner, agent or manager of a colliery to supply plans of the colliery on a scale determined by the Chief Sanitary Officer showing all buildings and all sources of water-supply on such colliery and the means of distribution of water from such sources above ground, together with a statement showing which of such sources of water-supply is proposed to be used for the supply of water for drinking and culinary purposes.

30. The Chief Sanitary Officer may by a notice in writing order any owner, agent or manager of a mine to provide on his colliery such supply of water for drinking and bathing as may be approved by the Chief Sanitary Officer.

31. If the Chief Sanitary Officer certifies that in his opinion the supply of good drinking water on a colliery is not adequate, the District Magistrate, on the application of the Chief Sanitary Officer and on being satisfied of the necessity of the measure, may make an order for the colliery to stop work until an adequate water-supply has been provided on the colliery to the satisfaction of the Chief Sanitary Officer or until all risk of a cholera epidemic has ceased. Any person dissatisfied with such order may appeal to the Mines Board of Health, who may allow such period for the provision of an adequate water-supply to the satisfaction of the Chief Sanitary Officer as they may think fit

32. The Chief Sanitary Officer may by an order in writing prohibit persons from easing themselves, or throwing, depositing or discharging any rubbish, sewage or offensive matter, into any well, tank, pool or other source of water-supply which is used by the public, or within such a distance from such well, tank, pool or source of water-supply as he may fix.

Conservancy and Sewage disposal.

33. The Chief Sanitary Officer may require the owner, agent or manager of a mine to provide receptacles or places for the deposit of sewage, offensive matter or rubbish, and may require occupiers of houses or such other classes of persons as the Chief Sanitary Officer may from time to time determine to deposit sewage, offensive matter or rubbish in no place other than in such receptacle, or places and may also fix the time of such deposit.

34. The Chief Sanitary Officer may by a notice in writing require the owner, agent or manager of any mine to make effective arrangements for the collection and disposal of nightsoil, sewage, rubbish or offensive matter within such a time as may be specified in the notice.

35. The Chief Sanitary Officer may (1) prohibit the committal or continuance of any nuisance, or (2) require the person causing any nuisance or the person occupying the premises on which any nuisance exists to remove such nuisance.

Explanation.—"Nuisance" means anything which in the opinion of the Chief Sanitary Officer is likely to spread or to cause the outbreak of cholera.

36. Whenever the Chief Sanitary Officer is satisfied that the condition of any privy, urinal, drain, sewer or cesspool is such as to cause risk of cholera to the inhabitants of the neighbourhood he may order the occupier of the land in which such privy, urinal, drain, sewer or cesspool is situated to disinfect, or to allow an officer of the Board to disinfect, the same with such disinfectants in such quantities and at such times as the Chief Sanitary Officer shall think fit.

37. The Chief Sanitary Officer may order the owner or occupier of any land to repair or make efficient to the satisfaction of the Chief Sanitary Officer any drain, sewer, privy, urinal or cesspool which is situated upon such land or to remove any such drain, sewer, privy or urinal or close any such cesspool within such time as may be fixed by the Chief Sanitary Officer.

Miscellaneous Powers.

38. The Chief Sanitary Officer may during the prevalence of any outbreak of cholera order that any market, shop or other public place shall remain closed for such time as may appear to him to be necessary and may forbid the holding of any fair, *mêla* or other gathering to which people from several villages commonly or periodically resort.

39. The Chief Sanitary Officer may issue general orders that by a specified date certain sanitary precautions of a simple nature, such as lime-washing of houses, cleaning of latrines or the removal of filth or rubbish shall be carried out to his satisfaction.

40. The Chief Sanitary Officer may prohibit persons from retaining or selling clothes taken from the bodies of persons who have died from cholera and may cause any such clothes to be destroyed.

41. The Chief Sanitary Officer may direct that any one burning or causing to be burnt any corpse believed by him to be infected with or likely to spread cholera at any burning-ground or burning-ghat, shall cause the same to be completely reduced to ashes, and shall likewise cause the clothes or other articles brought with such corpse to be reduced to ashes.

42. The Chief Sanitary Officer may direct that no person shall bury or cause to be buried, in any burial-ground, any corpse believed by him to be infected with or likely to spread cholera in a grave, not constructed of masonry, which shall be less than 6 feet deep.

43. The Chief Sanitary Officer may by a notice in writing require the owner or occupier of any land to clear and remove, within a period specified therein, any vegetation upon such land the existence of which in the opinion of the Chief Sanitary Officer conduces to the committing of nuisances upon such land.

44. The Chief Sanitary Officer may order that no *dome* or other servant of the Board employed for the disposal of corpses shall withdraw from his duties without the permission of the Chief Sanitary Officer unless such *dome* or other servant of the Board has given notice in writing not less than one month previously of his intention so to withdraw.

45. The Chief Sanitary Officer or any person authorised by him in that behalf may—

(*1*) seize and destroy any article of food or drink, and

(*2*) seize and dispose of any corpse

which in the opinion of the Chief Sanitary Officer is infected with, or likely to spread, cholera.

46. Every owner, agent or manager of a mine shall make such arrangements for the accommodation and treatment of all cases of sickness among its employés as the Chief Sanitary Officer may direct, provided that mines with an output of less than 5,000 tons per month and not more than two miles apart may, with the consent of the said officer, combine for the purpose.

47. Every owner, agent or manager of a mine in which are employed persons residing or staying in the mining settlement, and every owner or occupier of any land or premises within such mining settlement, shall furnish the Chief Sanitary Officer or any officer of the Board authorised by him in that behalf, with all reasonable facilities for carrying out any measures or making any entry, inspection, examination or enquiry under these regulations.

48. (*1*) The Chief Sanitary Officer or any other Sanitary officer of the Board authorised by him in that behalf, making any enquiry authorised by these regulations, may by an order in writing require the attendance before himself of any person being within the limits of a mining settlement or part of a mining settlement for which such officer has been appointed, who appears to be acquainted with the circumstances of a case or suspected case of cholera; and such person shall attend as so required.

(*2*) When the person summoned to appear under paragraph (*1*) is a female who, by the custom of the country, does not appear in public, suitable precautions shall be taken to respect the said custom.

49. (*1*) The Chief Sanitary Officer or any other Sanitary officer of the Board authorised by him in that behalf, making any enquiry authorised by these regulations, may examine orally any person supposed to be acquainted with the facts and circumstances of a case or suspected case of cholera.

(*2*) When the person to be examined under paragraph (*1*) is a female who, by the custom of the country, does not appear in public, the Enquiring officer shall take the statement of such female under such conditions as shall admit of due respect to the said custom.

(*3*) Such person shall be bound to answer all questions relating to such case put to him by such officer, other than questions the answers to which would have a tendency to expose him to any criminal charge.

50. Every owner, agent or manager of a colliery shall maintain a register of all premises situated on such colliery and ordinarily used or intended to be used for housing persons employed on or about such colliery, together with such fuller particulars as the Chief Sanitary Officer may from time to time direct by general or special order.

51. The Chief Sanitary Officer or any other Sanitary officer of the Board authorised by him in that behalf may, with such assistants (if any) as he thinks fit, enter upon any land or mine, or, after two hours' notice in writing, any premises or building used for human habitation at all reasonable times by day or by night, for the purpose of carrying out any measure or making any enquiries authorised by these regulations.

Females	...	20			
Total	...	172			

The total number of admissions fell short by 65, as compared with the year 1915. Of these there were 20 children admitted into the first class, 25 in the intermediate, 65 into the second class, and 26 into the third class, making a total of 136 children against 11, 48, 64 and 45, respectively admitted during the year 1915.

From the above figures it will appear that there has been a slight increase of residents in the intermediate class only, and a fall in number in all other classes during the year 1916.

6. Owing to the fall of the residents in all classes except intermediate, the receipts also fell by Rs. 3,164-1-7 during the year under report, as compared with the year 1915.

7. The cause of less admissions cannot be definitely ascertained. Owing to the war the cost of living in the hills has become very expensive, and this may have prevented many people from coming up to a costly hill station like Darjeeling.

8. The number of patients treated in 1916 was 172 against 271 in the year 1915. The hospital attached to the Sanitarium was occupied by patients for a longer period as compared with the year 1915.

9. The daily average number of people for the whole year works out at 30, but for the period the Sanitarium was open it was 41 as compared with 31 and 47, respectively, during the year 1915.

10. The average stay of each resident was 17 days during the year 1916 as compared with 19 days in the year 1915.

11. The localities from which the people were admitted are shown in Table D. As usual, the greater number came from Calcutta, while those from the Darjeeling district came next. It is interesting to note that people from very long distances, such as Allahabad, Assam, Bombay, Burma, Lahore and Madras, were attracted here for change and treatment.

12. There were a few complaints regarding food, and they were promptly dealt with by the Superintendent himself.

13. The free beds in this institution were occupied by 18 patients against 18 in the year 1915. The names of the patients will be found in Statement C attached to the report. Five deserving patients were treated in the Superintendent's free bed against 4 in the year 1915. Six patients were treated in the free beds of the Medical College Hospital against 4 in the year 1915, and 7 patients were treated in the Presidency General Hospital free beds against 10 in 1915.

14. * * * * * * *

15. The following subscriptions were received in the year 1916 :—

		Rs.
(1)	Darjeeling Improvement Fund	1,000
(2)	Darjeeling Municipality	1,000
(3)	Tukvar Company, Ltd.	100
(4)	D. P. Mackenzie, Esq.	250
(5)	Messrs. Mackintosh Burn & Co.	25
(6)	Messrs. Hamilton & Co.	25
(7)	Messrs. Cooke & Kelvy	25
(8)	Messrs. T. E. Thomson & Co.	25
(9)	Darjeeling-Himalayan Railway Co.	100
(10)	Messrs. R. Knight & Sons	25
	Total ...	2,575

16. European Government servants on receipt of Rs. 400 per month, their families, and the annual subscribers to this institution were admitted into the first class on payment of intermediate class rates under rules 20 and 45(*a*). The Committee, on the representation of the Sisters, extended this concession to the Sisters' guests, who are at present admitted into the first class on payment of Rs. 2-8 per day. A first class room is allowed to them on condition that there is no demand for such room, and their visits are limited in total to two months during a season. This concession is also allowed at present to any member of the Sisterhood requiring nursing or medical attendance, and is considered apart from the first concession allowed to the Sisters. In 1916 four guests of the Sisters were allowed to occupy the first class for 107 days.

17. The Committee, on the representation of the Superintendent, added a new rule which runs as follows :—

"If the Civil Surgeon is asked to attend a confinement case admitted into the first class the fee payable to the Sanitarium is Rs. 120. Confinement cases admitted into the intermediate class are attended by the Resident Medical Officer" [rule 27(*a*), page 10].

Seven labour cases were attended by the Civil Surgeon during the year 1916, and the fees realised from the patients were paid to him as an honorarium.

18. During the year 1916 the advantage of rule 45(*a*) was taken by one person against one in the year 1915.

19. . . . . .

(1) There were 5 cases of "Enteric fever" against 4 in 1915. The patients were cured.

(2) There were 3 cases of Kala-Azar against one in the year 1915. The patietns were sent up here from the plains for change of climate and were discharged cured.

(3) There were 16 cases of "Malarial fever" against 36 in the year 1915. The patients were all cured except one, who left the hospital being much relieved.

(4) There were 3 "Pneumonia" cases against 2 in 1915. The patients were cured.

(5) There were 4 cases of "Appendicitis' against one in 1915. The patients were all cured. One of the patients was operated on.

(6) One case of "Bright's disease" was treated and the patient was cured.

(7) There were 13 normal and 1 abnormal labour cases treated in the Hospital, against 8 normal and 6 abnormal labour cases treated in 1915. The patients were all cured.

(8) There were 81 operations performed in 1916 against 47 in the year 1915. Of these 15 were selected operations and were performed by Lieutenant-Colonel Clayton Lane, M.D., I.M.S., 7 were obstetric operations which were performed by him, and the other 9 unimportant operations were also performed by Lieutenant-Colonel Clayton Lane. The 50 minor operations were performed by Civil Assistant Surgeon Bijitendra Bose, who was appointed Resident Medical Officer in 1916.

20. There were altogether 4 deaths in 1916 against the same number in 1915. The cases were :—

(*i*) Diabetic Coma.	(*iii*) Cancer in stomach.
(*ii*) Colitis.	(*iv*) Purpura hœmorrhagica.

21. **Income and Expenditure.—**

Income.

(*a*) The increase in the receipts of the intermediate class is due to the greater number of admissions of people in that class in the year 1916 as compared with the year 1915.

(*b*) The increase of Rs. 1,500 against "Government grant" is due to the opening of a new head in accounts as will appear from the note below (Table G). In the year 1915 the amount was shown under "Donation."

(*c*) It will appear from the copy of letter No. 42 T.-A., dated 9th May 1917, from the Secretary to the Government of Bengal, Public Works Department, to the Superintending Engineer, Northern Circle, that the Government directed that the value of the buildings which was so long included as an asset in the accounts should henceforth be excluded from the balance-sheet. In order to give effect to this instruction the major head "Donation" and minor heads "Government of Bengal—Cost of construction," "Special grants," "Temporary grants" were abolished from the balance-sheet, and similarly the values of the buildings were also excluded.

(*d*) Owing to the increase of operations from 47 in 1915 to 81 in 1916 the operation fees increased by Rs. 241-8.

(*e*) The free beds of the Medical College Hospital and the Presidency General Hospital were fully occupied throughout the year, hence there has been an increase of Rs. 578.

(*f*) The fee realised for nursing patients in the Hospital under rule 26(*b*) and also for nursing patients outside under rule 47 showed an increase by Rs. 804-8-6. In spite of this increase in the receipts the amount spent on the nurses for salary and travelling allowance in 1916 was not fully compensated, and there was a deficit of Rs. 547-10-9 against Rs. 1,305-8-3 in 1915.

(*g*) The miscellaneous receipts, such as dooli hire, fees realised for issuing permits for the sale of articles at the Eden Sanitarium, and other petty receipts of a similar nature are shown under this head, and there was an increase of Rs. 41-15-6 during the year 1916 as compared with the year 1915.

(*h*) Though the number of patients treated in both Sanitarium and Hospital fell from 271 to 172 in the year 1916, and also the number of "Daily average sick" in both Sanitarium and Hospital fell from 20·19 in 1915 to 16·04 in the year 1916, the fee for the medical attendance increased for the longer stay of the patients in the Hospital in 1916 as compared with the year 1915.

(*i*) The increase of Rs. 27-15 against "Breakages" is due to the fact that the whole of the amount realised during the year 1916 was carried to the "Revenue account," instead of to the "Furniture account," as done in the year previous to it.

(*j*) The fall in receipts in the first, second and third classes is due to fewer admissions of people in the year 1916.

(*k*) The decrease in the receipts for "Interest on Investments" in the year 1916 is due to the fact that in 1915 a part of the interest accrued in 1914, but not transferred to the Eden Sanitarium account within that year, was taken into account in the year 1915. Hence the figures for 1915 showed an increase.

(*l*) The total receipts from the "Billiards" amounted to Rs. 112-2-6 and the expenditure amounted to Rs. 222-8. Thus the debit balance of Rs. 110-5-6 was carried to the Revenue account. The excess expenditure is due to the purchase of a new cloth for the Billiard table.

(*m*) The fluctuations against other heads of receipts are trifling and call for no remarks.

Expenditure.

(*a*) The increase of expenditure against "Free beds" is due to the longer stay of the patients.

(*b*) The increase in the allowance drawn by the Civil Surgeon in 1916 is due to the payment to him of confinement fees realised from the first class patients as an honorarium.

(*c*) The increase of expenditure against "General charges" is due to the greater consumption of kerosine oil used for the sterilization of the instruments in operation cases. The number of operations in 1916 was above that of 1915.

(*d*) The increase of expenditure against "Medical stores" is due to the war in Europe.

(*e*) The increase of expenditure against "Lighting" is due to the payment of Rs. 774 to Baghman & Co. for overhauling the electric wires in the Sanitarium and Hospital where leakage was detected, and also on account of keeping the Hospital open for a longer period than in 1915.

(*f*) The increase of expenditure by Rs. 110-5-6 on "Billiards" is due to the purchase of a new Billiard table cloth from Messrs. Lazarus & Co. at a cost of Rs. 195, as explained in paragraph 21 (*l*).

(*g*) The small increases against other heads of accounts are trifling and call for no remarks.

(*h*) The decrease of expenditure against "Diet" and other heads prove that the expenditure was economical in 1916.

(*i*) The debits of Rs. 2,349-6-7 as "Depreciation on Furniture" and Rs. 12-6-11 on account of "Depreciation on Library" are not really expenditures, and if they are excluded from the accounts there will be a surplus of Rs. 3,253 in the working of the institution for the year 1916.

22. Beyond the ordinary repairs to the buildings carried on by the Public Works Department no other improvements were carried out in the year 1916.

23. The daily average cost of diet for residents including the staff was Re. 1-7-5 as compared with Re. 1-9-1 in the year 1915. The decrease is mainly due to the alteration of rule 36.

24. The accounts of the Eden Sanitarium were audited by Messrs. Viney and Thurston, Chartered Accountants, of Calcutta.

General Remarks.—Sister Mary Francies and Sister Katherine Hope were in charge of nurses and linen room, respectively, in the year 1916.

The staff of this institution have worked hard and satisfactorily.

26. The Sanitarium was officially visited by the following House Visitors during the year 1916:—

(1) Dr. C. E. B. Seal.
(2) Rev. J. P. Reid, M.A.
(3) Rev. Father C. Grant.
(4) G. Nash, Esq.
(5) E. A. Wernicke, Esq.
(6) Rev. E. E. Benson.
(7) H. F. Samman, Esq., I.C.S.

27. The Committee held 8 meetings against 11 during the year 1916 The most important subject dealt with was the alteration of certain rules.

28. The sanitary arrangements of the bath-rooms of the second and third classes are not satisfactory The accommodation for patients in the Hospital is also inadequate. These matters cannot, however, be taken up by Government till the war is over.

29. The former Superintendent had issued notices under rule 11 (*b*) to certain inmates who did not follow the rules and the action is said to have produced the desired effect.

FIELD OPERATIONS.

No. 1285.

RESOLUTION—By the Government of India, Army Department.

READ—

HIS EXCELLENCY the Commander-in-Chief's Special India Army Order, dated the 10th August 1917.

Special Order of the day dated the 10th August 1917, by His Excellency General Sir Charles Monro, G.C.M.G., K.C.B., Commander-in-Chief in India.—On the dispersion of the Waziristan Field Forces, the Commander-in-Chief desires to express to all ranks his satisfaction at the manner in which the operations

against the Mahsuds have been brought to so speedy and successful a termination. This result has been due to the skilful manner in which the operations were conceived and carried out by the Generals in command, to the intimate co-operation between the arms engaged, but above all to the pluck and determination displayed by the troops, combatant and non-combatant, British and Indian, the Frontier Militias and Constabulary, and our gallant allies, the Nepalese Contingent.

There were many obstacles to be overcome in a climate and under conditions of the most trying description, but they were overcome in a manner worthy of the best traditions of the British Army. For the first time the tribesmen on this part of the Frontier have felt the power of the Royal Flying Corps which carried out its duties with the dash and daring to which the army has become accustomed. It gives the Commander-in Chief great pleasure to associate in this order the Political Officers on the Staffs of the Forces, to whom his thanks are due for the tact and firmness which have so largely contributed to a successful and speedy settlement and for the generous manner in which they placed their own residences at the disposal of the sick and wounded.

The Railway, Telegraph and Postal Departments were subjected to a severe strain, and it was due to their resource and devotion to duty that the requirements of the Forces were always met.

In conclusion the Commander-in-Chief, on behalf of the Army, gratefully acknowledges the assistance given by the "Red Cross" and "Comforts for Troops" Societies, whose generous efforts did much to alleviate the hardships and ameliorate the trying conditions of a summer campaign on the Frontier.

The Governor General having considered in Council His Excellency the Commander-in-Chief's Special India Army Order, dated the 10th August 1917 which deals with the conclusion of the recent Waziristan Operations, desires cordially to endorse all that the Commander-in-Chief has said in recognition of the excellent work performed by the troops and others concerned in these operations. The Governor General in Council further desires specially to record the thanks of the Government of India to Lieutenant-General Sir A. A. Barrett, K.C.B., K.C.S.I., K.C.V.O., who was in general control of these operations, to Major-General W. G. L. Beynon, C.B., C.I.E., D.S.O., who was in direct command and who was responsible for the admirable execution of the undertaking, to Sir J. S. Donald, K.C.I.E., C.S.I., the Chief Political Officer, and to Mr. J. A. O. Fitzpatrick, C.I.E., who, owing to Sir John Donald's temporary indisposition, had charge of the negotiations with the Mahsuds at a most critical time and conducted those negotiations with firmness and tact.

ORDER.—Ordered that a copy of this Resolution be communicated to the Hon'ble the Chief Commissioner and Agent to the Governor General, North West Frontier Province, Departments* of the Government of India, the Director-General, Indian Medical Service, and Heads of Branches of Army Headquarters for information and necessary action.

Notice.

THE Bengal and Madras Service Family Pension Fund which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted Service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the Fund are—(1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominees predecease them after five years of admission. The Fund is now of ten years' standing and has a balance of over three and-a-half lakhs with Government on four per cent. interest. For forms of applications and rules of the Fund apply to the Comptroller, India Treasuries, Imperial Secretariat Buildings, Calcutta.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES viz.

CALCUTTA, MADRAS BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

[*Note*:—"Reg. III of 1872" means the Sonthal Parganas Settlement Regulation, 1872 (III of 1872), as amended by the Sonthal Parganas Settlement (Amendment) Regulation, 1908 (III of 1908). "C. P. T." means the Central Provinces Tenancy Act, 1898 (XI of 1898). "Act XIII of 1900" means the Punjab Alienation of Land Act, 1900. "C. N. T." means the Chota Nagpur Tenancy Act, 1908 (Ben. Act VI of 1908).]

WHEREAS it is expedient to supplement and amend the Bengal Tenancy Act, 1885, in the manner hereinafter appearing; VIII of 1885.

And whereas the previous sanction of the Governor General has been obtained under section 79, sub-section *(2)*, of the Government of India Act, 1915, to the passing of this Act; 5 & 6 Geo 5, c. 61.

It is hereby enacted as follows:—

Short title. **1.** This Act may be called the Bengal Tenancy (Amendment) Act, 1917.

New Chapter VIIA **2.** After Chapter VII of the Bengal Tenancy Act, 1885, the following Chapter shall be inserted, namely:— VIII of 1885.

"CHAPTER VIIA.

"*Restrictions on alienation of land by aboriginals.*

Power to Local Government to declare this Chapter to be applicable to aboriginals. **"49A.** The Local Government may from time to time, by notification published in the *Calcutta Gazette*, declare that the provisions of this Chapter shall, in any district or local area, apply to such bodies of persons as may be specified therein, and that such bodies of persons shall be deemed to be aboriginals for the purposes of this Chapter; and such publication shall be conclusive evidence that the said provisions have been duly applied to such persons. [*Cf.* Act XIII of 1900, s. 4.]

Restrictions on transfer of tenant rights **"49B.** No transfer by an aboriginal tenure-holder, raiyat or under-raiyat of his right in his tenure or holding, or in any portion thereof, by private sale, gift, will, mortgage, lease or any contract or agreement, shall be valid to any extent except as provided in this Chapter. [*Cf.* C. N. T., ss. 46, 240; Reg. III of 1872, s. 27 *(1)*.]

Lease by tenure-holder. **"49C.** An aboriginal tenure-holder may grant a lease to another aboriginal, to hold the land as a tenure-holder, or to cultivate it as a raiyat, in accordance with the provisions of this Act. [*Cf.* C. N. T., s. 240 *(4)*.]

Sub-letting by raiyat **"49D.** Subject to the provisions of section 85, an aboriginal raiyat may sub-let his holding to another aboriginal to cultivate it as an under-raiyat. [*Cf.* Reg. III of 1872, s. 27*(1)*.]

The Bengal Tenancy (Amendment) Bill, 1917.

(Clause 2: sections 49E—49H.)

Usufructuary mortgage by tenure-holder, raiyat or under-raiyat.

"49E. An aboriginal tenure-holder, raiyat or under-raiyat may enter with another aboriginal into a complete usufructuary mortgage in respect of any land under his own cultivation, for any period which does not and cannot, in any possible event, by any agreement, express or implied, exceed nine years, or the period of his own right, whichever is less: [*Cf.* C. N T., ss. 46 (*1*), proviso, s. 240 (*3*).]

Provided that every mortgage so entered into shall be registered under the Indian Registration Act, 1908. XVI of 1908

Explanation.—A 'complete usufructuary mortgage' means a transfer by a tenant of the right of possession in any land for the purpose of securing the payment of money or the return of grain advanced or to be advanced by way of loan, upon the condition that the loan, with all interest thereon, shall be deemed to be extinguished by the profits arising from the land during the period of the mortgage. [*Cf.* C. N T., s. 3 (*ii*).]

Power to Collector to settle lands with non-aboriginals in certain cases.

"49F. If in any case an aboriginal tenure-holder or raiyat is unable to lease, or an aboriginal tenure-holder, raiyat or under-raiyat is unable to mortgage, his land to another aboriginal, as provided by sections 49C, 49D and 49E, he may apply to the Collector for permission— [*Cf.* Act XIII of 1900, ss. 5, 6.]

(*i*) to lease the same to a person who is not an aboriginal, or

(*ii*) to enter into a complete usufructuary mortgage, as provided in section 49E, with a person who is not an aboriginal,

and the Collector may pass such order on the application as he thinks fit.

Courts not to register, or recognise as valid, transfers in contravention of this Chapter.

"49G. No transfer by an aboriginal tenure-holder, raiyat or under-raiyat in contravention of the provisions of this Chapter shall be registered or in any way recognised as valid by any Court, whether in the exercise of civil, criminal or revenue jurisdiction. [*Cf.* C. N. T., ss. 46(*3*), 240(*6*); Reg III of 1872, s. 27 (*3*).]

Power to Collector to set aside improper transfers and usufructuary mortgages by tenure-holder, raiyat or under-raiyat.

"49H. (*1*) If a transfer of a tenure or holding, or any portion thereof, is made by an aboriginal tenure-holder, raiyat or under-raiyat in contravention of the provisions of section 49B, or if the period of a complete usufructuary mortgage is exceeded in contravention of the provisions of section 49E, the Collector may, on his own initiative or on application made in that behalf, by an order in writing, eject the transferee from such tenure, holding or portion: [*Cf.* C. P. T., ss. 47 and 71; Reg III of 1872, s. 27 (*3*).]

Provided that—

(*a*) the transferee whom it is proposed to eject has not been in continuous possession in contravention of this Act for twelve years, and [*Cf.* Reg III of 1872, s. 27(*3*), proviso.]

(*b*) he is given an opportunity of showing cause against the order of ejection.

The Bengal Tenancy (Amendment) Bill, 1917.

(Clause 2: sections 49J—49L.)

(*2*) When the Collector has passed any order under sub-section (*1*), he shall either—

(*a*) restore the transferred land to the aboriginal tenure-holder, raiyat or under-raiyat, or his heir, or

(*b*) declare that the right of settlement is vested in the landlord subject to the approval of the Collector.

"49J. (*1*) If an aboriginal tenant surrenders his tenancy, or abandons his residence and ceases to hold his tenancy, the right of resettling or otherwise dealing with the tenancy shall be deemed to be vested in the landlord subject to the approval of the Collector. [*Cf.* Act VIII of 1885, s. 87.]

Resettlement of surrendered or abandoned tenancies.

(*2*) If any landlord resettles or otherwise deals with any tenancy as aforesaid without the previous approval of the Collector, the Collector may take action, so far as may be, in accordance with the provisions of section 49H.

"49K. Notwithstanding anything in this Act, no decree or order shall be passed by any Court for the sale of the right of an aboriginal tenure-holder, raiyat or under-raiyat in his tenure or holding, or in any portion thereof, nor shall any such right be sold in execution of any decree or order: [*Cf.* Act XIII of 1900, s. 16; C. P. T., ss. 46 (*2*), 70 (*2*); C N. T., s. 47.]

Restrictions on sale of tenant rights under order of Court.

Provided as follows:—

(*a*) any such tenure or holding may be sold, in execution of a decree of a competent Court, to recover an arrear of rent which has accrued in respect of the tenure or holding; [*Cf.* C N. T., s. 47, proviso (*a*).]

(*b*) nothing in this section shall affect any right to execute a decree for the sale of any such tenure or holding, or the terms or conditions of any contract relating thereto, if such decree was passed, or such contract registered, at least one year before the date of the publication of the notification under section 49A in respect to the body of persons to which any tenure-holder, raiyat or under-raiyat who is a party to such decree or contract belongs; [*Cf.* C. N T., s. 47.]

(*c*) nothing in this section shall affect any right for the sale of any such tenure or holding for the recovery of any arrears of land-revenue, or any dues which are recoverable as arrears of land-revenue, in the manner provided by any law for the time being in force for the recovery of land-revenue. [*Cf.* C. N T., s. 47, proviso (*b*).]

"49L. (*1*) A decree against an aboriginal tenure-holder, raiyat or under-raiyat in respect of his tenure or holding, shall, if the sale of such tenure or holding be ordered in execution, be transferred, under section 68 of the Code of Civil Procedure, to the Collector for execution. [*Cf.* C. P. T., s. 84; Act V of 1908, s. 68.]

Transfer to Collector of decrees in respect of aboriginal tenures or holdings.

Act V of 1908.

The Bengal Tenancy (Amendment) Bill, 1917.

(Clause 2: sections 49M—49P.)

(2) The Collector executing the decree may, notwithstanding anything contained in Order XXI, rule 83, of the Code of Civil Procedure, allow the tenant time in which to pay the amount due. Act V of 1908

"**49M.** (1) An appeal, if presented within thirty days from the date of the order appealed against, shall lie to the Collector of the district from any order made under this Chapter by any officer in the district exercising the powers of a Collector, and the order of the Collector on appeal shall be final: [*Cf.* C. N. T., ss. 215, 216; Act VIII of 1885, s. 104G (1).]

Appeal and revision.

Provided that every order passed by the Collector on appeal shall be subject at any time to revision and modification by the Commissioner. [*Cf.* Ben. Act VII of 1876, s. 85.]

(2) Notwithstanding anything in sub-section (1), an appeal from any order made under this Chapter by an officer acting under Chapter X of this Act shall be to such officer as the Local Government may appoint in this behalf, and the orders of such officer on appeal shall be final:

Provided that, in every such case, every order passed by the said officer on appeal shall at any time be subject to revision and modification by such officer as the Local Government may appoint to deal therewith.

(3) An appeal, as provided in sub-section (1), shall lie to the Commissioner from any original order made by the Collector of the district under this Chapter. [*Cf.* Ben. Act III of 1913, s. 51 (1) (b) and (2).]

"**49N.** (1) The Collector may, in his discretion, by an order in writing, direct that the costs of any proceedings under this Chapter shall be realized from any of the parties concerned in such proceedings, as he may deem fit.

Costs of proceedings under this Chapter.

(2) The said costs shall be realizable from such party as an arrear of revenue.

"**49O.** Notwithstanding anything in this Act, no suit shall lie to vary or set aside any order passed by the Collector in any proceeding under this Chapter. [*Cf.* C. N. T., s. 258; Act XIII of 1900, s. 21.]

Bar to suits.

"**49P.** Nothing in this Chapter shall affect the validity of any transfer (not otherwise invalid) by a tenure-holder, raiyat or under-raiyat of his tenure or holding, or any portion thereof, made *bonâ fide* at least one year before the date of the publication of the notification under section 49A in respect to the body of persons to which such tenure-holder, raiyat or under-raiyat belongs." [*Cf.* C. N. T., s. 46 (5) and s. 240 (7).]

Saving of certain transfers.

STATEMENT OF OBJECTS AND REASONS.

Certain lands in Bengal are at present held or cultivated by persons belonging to aboriginal tribes. The object of this Bill is to place restrictions on the passing of these lands into the hands of persons not belonging to such tribes.

II. It has long been the policy of Government to restrict the alienation of lands by such tribes in other parts of India, in particular in Chota Nagpur and the Sonthal Parganas in the Province of Bihar and Orissa, but in the adjoining districts in Bengal, where the Bengal Tenancy Act is in force, there is no legal provision for such restriction, though it has, for some time, been the opinion of competent observers that such provision is required.

III. The present Bill is mainly the outcome of an inquiry instituted by Government into the condition of these tribes, particularly of the Sonthals, in the districts of Birbhum, Bankura and Midnapore, coupled with the information derived during settlement proceedings in the districts of Midnapore and Birbhum. The result is to leave no room for doubt that special legislation for the protection of cultivators of backward tribes against their own ignorance and thriftlessness, is urgently necessary.

IV. It is not intended that the Bill should apply to all aboriginal tribes, but only to such tribes and in such areas, as the Local Government may consider that the general provisions of the Bengal Tenancy Act relating to transferability are unsuitable. In particular it is intended to apply it to the Sonthals of Midnapore, Birbhum and Bankura.

V. It is proposed to attain these objects by supplementing and amending the Bengal Tenancy Act, 1885 (VIII of 1885), by the introduction of a new Chapter VIIA containing provisions based on the lines of similar legislation in other Provinces, namely :—

The Central Provinces Tenancy Act, 1898 (XI of 1898),

The Punjab Alienation of Land Act, 1900 (XIII of 1900),

The Chota Nagpur Tenancy Act, 1908 (Bengal Act VI of 1908), and

The Sonthal Parganas Settlement Regulation, 1872 (III of 1872), as amended by the Sonthal Parganas Settlement (Amendment) Regulation, 1908 (III of 1908).

NOTES ON CLAUSE 2 OF THE BILL.

Section 49A.—This section gives power to the Local Government to declare the new chapter, by notification, to be applicable to specified aboriginals in specified areas. It has not been considered desirable to define the word aboriginal, but in order to prevent litigation as to its meaning, provision has been made that the notification shall be conclusive evidence as to the extent of its application.

2. *Section 49B.*—This section renders invalid transfers by tenure-holders, raiyats or under-raiyats of notified classes except to the extent provided by the chapter.

3. *Sections 49C and 49D.*—These sections empower aboriginal tenure-holders or raiyats to sublet lands to other aboriginals.

4. *Section 49E.*—This section empowers aboriginal tenure-holders, raiyats or under-raiyats to mortgage land in their own cultivation, under certain restrictions, to other aboriginals. For this purpose the expression "complete usufructuary mortgage" has been introduced on the lines of the definition of a "*bhugut banda* mortgage" in the Chota Nagpur Tenancy Act, 1908 [section 3(*ii*)]. It has been thought inadvisable to empower aboriginals to mortgage the right to receive rents.

5. *Section 49F.*—In order that the above restrictions may not prevent agricultural lands from being put to profitable uses, provision is herein introduced for leases or mortgages to non-aboriginals with the permission of the Collector.

6. *Section 49G.*—As in Chota Nagpur and in the Sonthal Parganas, it is provided that no transfer by an aboriginal in contravention of the Bill shall be registered or in any way recognized as valid by any Court.

7. *Section 49H.*—This is one of the most important provisions of the Bill. Experience has shown that the prohibition or restriction of alienation is usually ineffective unless accompanied by definite provisions as to the disposal of land which is found to have been alienated contrary to the provisions of the law. The Bill, following the main lines of recent legislation in the Sonthal Parganas, incorporated in section 27 (*3*) of the Sonthal Parganas Regulation, 1872 (III of 1872), provides that when a person has been in illegal possession for less than twelve years the Collector may evict him and either restore the land to the original tenant or allow the landlord to settle the land subject to his approval.

8. *Section 49J.*—This is new, but experience shows that provisions regarding the prohibition or restriction of transfer are defeated by so-called surrenders or abandonments. Provision is therefore made for making the resettlement of such lands by the landlord subject to the approval of the Collector.

9. *Section 49K.*—The preceding sections deal with voluntary transfers. This section deals with involuntary transfers and declares that, with certain exceptions, no court can pass a decree or order for the sale of the land of an aboriginal tenant or execute such a decree. The exceptions are—

(*1*) rent decrees,

(*2*) decrees on account of contracts registered or passed at least one year before the notification,

(*3*) decrees or orders in respect of arrears of land-revenue or dues recoverable as such arrears, *e.g.*, under the Agriculturists' Loans Act, 1884, etc.

Following similar precedents in the Chota Nagpur Tenancy Act, 1908 (Bengal Act VI of 1908), and in the Bengal Tenancy Act, 1885 (*vide* section 120), it has been considered advisable in the case of (*2*) to prevent transfers or contracts therefor during the period of discussion regarding the issue of the notification by which any party to such decree or contract becomes an aboriginal under the Act, by saving decrees or contracts passed or registered one year before the issue of such notification.

10. *Section 49L.*—In order to prevent alienation as far as possible even in the above excepted cases of involuntary transfers, it has been thought advisable, following section 84 of the Central Provinces Tenancy Act, 1898 (XI of 1898), that decrees for sales in such cases should be transferred to the Collector for execution under section 68 of the Code of Civil Procedure, 1908 (Act V of 1908). Special provision is also made for the Collector allowing time to the tenant to pay up his dues.

11. *Sections 49M and 49N.*—Provision is herein made for the usual provisions regarding appeals, revision and recovery of the costs of proceedings.

12. *Section 49-O.*—This section follows the Chota Nagpur Tenancy Act, 1908 (section 258) and the Punjab Alienation of Land Act, 1900 (section 21), and its object is to prevent the Collector's powers under the Chapter from being fettered by litigation in the Civil Courts.

13. *Section 49P.*—This section validates all transfers (not otherwise invalid) previous to the issue of a notification under the proposed section 49A, but it has been considered advisable, following the precedents in the Chota Nagpur Tenancy Act and the Bengal Tenancy Act already referred to, to save decrees or contracts passed or registered one year before the issue of the notification, in order to prevent transfers during the period of discussion regarding such issue.

Wellington—Alteration in Time-Signals.

No. 199 (third publication)—The following particulars, etc., relative to the above, issued by the British Admiralty (No. 525 of 1917), are re-published:—

Position.—Hector Observatory, lat. 41° 17′ S., long. 174° 46′ E.

Details.—The time-signal arrangements have been altered, and are now as follows:—

(1) *Accurate time-signals.*—These time-signals are now given at 7 h. 30 m. 00 s., 8 h. 30 m. 00 s., and 9 h. 30 m. 00 s. New Zealand standard time, corresponding to 20 h. 00 m. 00 s., 21 h. 00 m. 00 s., and 22 h. 00 m. 00 s., respectively, G.M.T.

The method of switching on and extinguishing the *white*, *red*, and *green* lights is similar to that formerly adopted, the *green* light being switched on at 50 minutes, the *red* light at 10 minutes, and the *white* light at 5 minutes before the signal, all three lights being switched off simultaneously at the times mentioned above.

(2) *Approximate time-signals.*—When, owing to bad weather or other causes, accurate time signals cannot be given, approximate ones will be given on application being made for them to the Observatory; but in these cases the *green* light will not be shown. On application to the Observatory the error of these signals can usually be obtained.

(3) *Time-signals by telephone, by telegraph, and by wireless telegraph.*—Arrangements can usually be made to give time-signals by telephone, by telegraph, or by wireless telegraph on application being made to the Observatory.

Remarks.—The use of flag "T" International code in connection with the time-signals has been discontinued.

First Forecast of the Sugarcane Crop of Bengal, 1917-18.

(Note.—On an average of the five years ending 1915-16, the area under Sugarcane in Bengal represents some 9·2 per cent. of the total area under Sugarcane in British India.)

Character of the Season.—The weather, though dry at the outset, was generally favourable for planting operations as there was no lack of moisture in the soil. In a few places growth of the crop has been retarded through drought, untimely and excessive rainfall, but on the whole the season has been satisfactory so far.

Area planted.—The area planted with sugarcane is reported to be 209,300 acres this year against 220,100 acres last year, and against 223,300 acres reported in the corresponding forecast of last year.

APPENDIX I.

Preliminary Forecast of the Sugarcane Crop of Bengal, 1917-18.

District.	Estimated normal area under sugarcane.	ESTIMATED AREA UNDER SUGARCANE.		Date by which the planting of the sets generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.		
1	2	3	4	5	6
	Acres.	Acres.	Acres.		
24-Parganas ...	5,100	3,000	3,900	December. Normal ...	The increase in area is due to high price of *gur* and to favourable weather at the time of planting. The weather has continued favourable.
Nadia	7,900	5,700	5,500	End of January. Normal.	The decrease in area is due to drought at the time of planting. The drought continued for some time in the Ranaghat, Chuadanga and parts of the Sadar subdivisions.
Murshidabad ...	3,600	2,600	3,100	December to April ...	The increase in area is due to timely rainfall and to rise in the price of *gur*. The weather was favourable at planting time, but want of rain subsequently affected the crop.
Jessore	8,900	5,200	6,800	February and March. Normal.	The decrease in area is due to want of timely rain at the time of planting. The weather conditions have since been fair.
Khulna	1,800	1,800	1,800	February, Normal ...	The weather conditions have been favourable to the growth of the crop.
Burdwan	20,800	14,600	18,000	March to May. Normal	The increase in area is due to timely rain at planting time and plenty of water in the tanks for irrigation. The heavy rainfall of May retarded the growth to a certain extent in the Asansol subdivision.
Birbhum	9,000	6,000	11,000	End of April, Early ...	The increase in area is due to good rainfall at planting time. The weather has continued favourable and the growth of the crop good.
Bankura	15,000	10,000	11,500	Middle of May, Normal	The weather and the general condition of the crop are fair.
Midnapore ...	3,000	3,000	3,000	March and April. Normal.	The weather has been favourable.
Hooghly	7,200	6,000	6,200	March. Normal ...	The weather has been favourable.
Howrah	8,500	5,400	5,100	Beginning of January to beginning of April. Normal.	The weather has been favourable on the whole and the growth of the crop is good at present.
Rajshahi	18,000	12,300	13,100	End of January. Normal.	The increase in area is due to favourable weather at planting time. It has continued favourable since.
Dinajpur	25,000	30,200	29,900	November to March. Normal.	The weather has been on the whole favourable and the prospects of the crop are fairly satisfactory.
Jalpaiguri	6,300	3,800	3,800	End of February. Late	The weather was not favourable owing to continued drought till April last.
Darjeeling	100	100*	100*	Middle of March. Normal.	Untimely rain has not been favourable to the crop.
Rangpur	20,500	13,000	11,000	Last week of February. Normal.	The decrease of area is mostly reported from the Sadar subdivision where there is a corresponding increase in the area under jute. The weather has been favourable for the cultivation and growth of the crop.
Bogra	20,000	20,000	3,600	March and April. Normal.	The reduced acreage for this year is based on the figures supplied by thana officers. The Collector is enquiring as to their correctness. The crop suffered for want of rain at the sowing time, but the recent rains have done much good and the prospects are fair.
Pabna	10,000	10,000	10,000	Middle of April. Normal.	The weather conditions have not been favourable since the planting time.
Malda	300†	300*	300*	.....	The weather has been favourable since the planting time.
Dacca	21,100	21,900	22,100	January to March. Normal.	The increase in area is due to high prices of raw sugar. The weather was favourable at sowing time, but want of rainfall subsequently retarded the growth.
Mymensingh ...	11,100	10,800	10,800	The planting was normal in all subdivisions except in Jamalpur, where it commenced from the middle of May.	The weather has been favourable.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Cotton Crop of Bengal, 1917-18.

(Note.—On the average of the five years ending 1915-16, the area under the cotton crop in Bengal represents some 0·2 per cent. of the total area under cotton in India.)

There are two crops—early and late. The early crop is chiefly grown in the Chittagong Hill Tracts, in the State of Hill Tippera and to a small extent in the district of Bankura, Midnapore and Mymensingh. The late crop is grown in Bankura and Midnapore.

Character of the season.—The weather has been generally favourable to both varieties of the crop from the sowing time up till now. In the Chittagong Hill Tracts, however, long continued drought prevailed from the outset. Hence the germination has been bad and the present condition of the plants is unsatisfactory in that district.

Area sown.—The area sown with early cotton is reported to be 72,130 acres this year against 72,904 acres reported in the corresponding forecast of last year.

Of the late crop 700 acres are reported to have been sown up to date against the same figure in the corresponding forecast of last year.

CALCUTTA :

The 8th August 1917.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JULY 1917.

I. **Character of the season.**—The rainfall during the month was in excess of the normal excepting in some districts of Burdwan and Rajshahi Divisions. The usual rainfall statement is appended.

II. **Progress of Agricultural Operations.**—Transplanting of winter paddy was in full swing everywhere. Harvesting of autumn paddy and jute was proceeding in Eastern Bengal while the weeding of these crops was in progress in the Western districts, but here also in a few places the harvesting had just commenced.

III. **State of standing crops.**—The standing crops were on the whole reported to be doing well.

IV. **Prospects and probable outturn.**—The prospects of the winter rice crop were hopeful so far. A good outturn of jute and autumn paddy was expected.

V. **Damage to standing crops.**—No damage was done to the standing crops except to jute by insect-pests in parts of the 24-Parganas, Nadia and Murshidabad.

VI. **Condition of Agricultural stock.**—The condition of agricultural stock was fair. Reports of cattle-disease were received from thirteen districts.

VII. **Failure of pasturage and fodder.**—Fodder was reported to be scarce in parts of the 24-Parganas, Hooghly, Dacca and Mymensingh.

VIII. **Prices of food-grains.**—During the second fortnight of the month under review the prices of common rice rose in seven districts, fell in eight and remained stationary in the rest. It varied from 11 seers 4 chitacks per rupee at Suri to 7 seers 4 chitacks per rupee at Comilla.

IX. **Condition of Agricultural people.**—The condition of agricultural people was reported to be fairly good.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 13th August 1917.

Summary.—During the week under review the rainfall was almost general throughout the province. The fall was not evenly distributed being excessive in places of the Presidency, Burdwan and Dacca divisions and rather scanty in most parts of the Rajshahi division where the transplanting of winter rice and steeping and washing of jute have somewhat been retarded in consequence. Harvesting of autumn paddy and jute is in full swing. Weeding of winter paddy has commenced in places. The condition and prospects of jute and other standing crops are reported to be fairly good. Damage to the jute crop either by heavy rain, flood or insect-pests is reported from the 24-Parganas, Nadia, Murshidabad, Midnapore, Hooghly, Howrah, Pabna and Faridpur districts, but nowhere is the damage serious. Fodder is dear only in parts of the 24-Parganas and Mymensingh. The average price of common rice has again slightly fallen as compared with that of the previous week.

(a) Including ballast train miles, nil. (b) Audited figures to end of May 1917.
(c) Increase is partly due to favourable local and foreign outward traffic and to the fact that Bhangoora Serajgunge section was opened to coaching traffic on 25th July 1916.
(d) Decrease in goods earnings is due to less jute traffic booked from Serajgunj this year.

The decrease during the week in Coaching is mainly in Troops traffic.
The decrease during the week in Goods is mainly in Piece-goods, Iron and Cement traffic.
Though the traffic during July 1917 under both Coaching and Goods showed a falling off as compared with last year it is hoped that the estimated earnings of Rs. 6,80,000 for the half-year will be reached.
The up to date decrease in Coaching is small.
The up to date decrease in Goods is in Grains of all sorts, Ghee and Attah, Salt, but chiefly in Tea Traffic.

The increase during the week in Coaching is in Local passengers.
The increase during the week in Goods is mainly in rice traffic.
The traffic on this section is not as good as originally expected and it would now appear that the earnings for the half-year will reach Rs. 1,10,000 as against Rs. 1,15,000 as estimated in the rolls.
The up to date increase in Coaching is mainly in Local passengers.
The up to date increase in Goods is mainly in rice and wool traffic.
